ABSTRACT

First, by asking forgiveness from Allah SWT, here I am trying to reveal the signs of the greatness of Allah SWT regarding how Allah can hear and see through photons and quarks based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There are several verses in the Al Quran that are the key to unlocking the secrets of how Allah can hear and see, namely verses:

"Allah chooses (His) messengers from angels and from humans; verily Allah is All-Hearing, All-Seeing. (Al Hajj: 22: 75)" That is because Allah (power) puts the night into the day and put day into the night and that Allah is All-Hearing, All-Seeing. (Al Hajj: 22: 61)

In an effort to uncover how Allah can hear and see this the author based on the photon, quark and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis that the existence of photons and quarks makes Allah able to hear and see when viewed from the point of view of photons, quarks and Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

THROUGH PHOTON CAN HEAR AND SEE

We now open the secret behind the verse: "*... Allah is All-Hearing, All-Seeing. (Al Hajj: 22: 75)* Well, how can Allah "*... See. (Al Hajj: 22: 75)* and "*... Hear ... (Al Hajj: 22: 75)*

It turns out that if we look at the waves of Allah's light layer, it will easily be seen that there are various frequency waves. Through these frequency waves, Allah can see and hear what is in the universe.

ALLAH SEES AND HEARS THROUGH THE WAVES OF LIGHT DIFFERENT FREQUENCY.

If Allah wants to see His people who exist and live on earth, then Allah will see through the light that can be seen by the human eye which is located in the area of the electromagnetic spectrum between 430 and 740 nanometers.

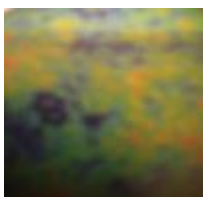

Through a layer of light waves of Allah between 430 and 740 nanometers, it is clear that all human life on this earth can be seen.

Likewise, if Allah wants to see His creatures that are outside the earth, who live in the area of the electromagnetic spectrum between the 740 nanometer to 100 micrometer electromagnetic spectrum, where only infrared rays exist.

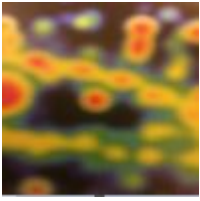

Through this layer of light waves of Allah between the electromagnetic spectrum of 740 nanometers to 100 micrometers of infrared light, Allah can see His creatures, which cannot be seen by human sight on earth.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic spectrum, between the electromagnetic spectrum between 100 micrometers and 1 centimeter, which only contains microwaves.

It is through this layer of light waves of Allah between the electromagnetic spectrum between 100 micrometers and 1 centimeter of microwaves (microwaves) that Allah can see His creatures, which cannot be seen by the human eye.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic spectrum, between the electromagnetic spectrum between 1 centimeter and 1 kilometer, which only has radio waves (radiowaves).

Through this layer of light waves of Allah between the electromagnetic spectrum between 1 centimeter and 1 kilometer of radio waves (radiowaves), Allah can see His creatures, which cannot be seen by the human eye.

Then also if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 10 and 100 nanometers where there is only ultraviolet light.

Through this layer of light waves of Allah between the electromagnetic spectrum between 10 and 100 nanometers of ultra violet waves, Allah can see His creatures, which cannot be seen by the human eye.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 0.05 and 10 nanometers, there are only X-ray waves.

Through this layer of light waves of Allah between the electromagnetic spectrum between 0.05 and 10 nanometers of X-ray waves, Allah can see His creatures, which cannot be seen by the human eye.

Then also if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 0.00001 to 0.05 nanometers where there are only gamma ray waves.

It is through this layer of light waves of Allah between the electromagnetic spectrum of 0.00001 to 0.05 nanometers of gamma ray waves that Allah can see His creatures, which cannot be seen by the human eye.

Now, what if God wants to speak, hear and see humans on earth?

Of course Allah will use waves located in the area of the electromagnetic spectrum between 430 and 740 nanometers.

CONCLUSION

Based on the description above we can conclude that the secret behind the verse: *"... Allah is All-Hearing, All-Seeing. (Al Hajj: 22: 75)*

It turns out that if we look at the waves of Allah's light layers, it will be easy to see the presence of various waves. frequency.

Through these frequency waves, Allah can see and hear what is in the universe. If Allah wants to see His people who exist and live on earth, then Allah will see through the light that can be seen by the human eye which is located in the area of the electromagnetic spectrum between 430 and 740 nanometers.

Through a layer of light waves of Allah between 430 and 740 nanometers, it is clear that all human life on this earth can be seen.

Likewise, if Allah wants to see His creatures that are outside the earth, who live in the area of the electromagnetic spectrum between the 740 nanometer to 100 micrometer electromagnetic spectrum, where only infrared rays exist.

Through this layer of light waves of Allah between the electromagnetic spectrum of 740 nanometers to 100 micrometers of infrared light, Allah can see His creatures, which cannot be seen by human sight on earth.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic spectrum, between the electromagnetic spectrum between 100 micrometers and 1 centimeter, which only contains microwaves.

It is through this layer of light waves of Allah between the electromagnetic spectrum between 100 micrometers and 1 centimeter of microwaves (microwaves) that Allah can see His creatures, which cannot be seen by the human eye.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic

spectrum, between the electromagnetic spectrum between 1 centimeter and 1 kilometer, which only has radio waves (radiowaves).

Through this layer of light waves of Allah between the electromagnetic spectrum between 1 centimeter and 1 kilometer of radio waves (radiowaves), Allah can see His creatures, which cannot be seen by the human eye.

Then also if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 10 and 100 nanometers where there is only ultraviolet light.

Through this layer of light waves of Allah between the electromagnetic spectrum between 10 and 100 nanometers of ultra violet waves, Allah can see His creatures, which cannot be seen by the human eye.

Furthermore, if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 0.05 and 10 nanometers, there are only X-ray waves.

Through this layer of light waves of Allah between the electromagnetic spectrum between 0.05 and 10 nanometers of X-ray waves, Allah can see His creatures, which cannot be seen by the human eye.

Then also if Allah wants to see His creatures that live in the area of the electromagnetic spectrum between the electromagnetic spectrum between 0.00001 to 0.05 nanometers where there are only gamma ray waves.

It is through this layer of light waves of Allah between the electromagnetic spectrum of 0.00001 to 0.05 nanometers of gamma ray waves that Allah can see His creatures, which cannot be seen by the human eye.

What if God wanted to speak, hear and see people on earth?

Of course Allah will use waves located in the area of the electromagnetic spectrum between 430 and 740 nanometers.
