## ABSTRACT

Before the author writes about Allah's spirit was in human bones, through mitochondrial DNA, haplogroup F1a1a, 19,000 years ago in the locomotive cemetery in Irkutsk Siberia, and Allah's spirit , was in the bones of the youth of Kahfi, in the cave, 309 years, in Ephesos , near Izmir Turkey, First, the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about Allah's spirit was in human bones, through mitochondrial DNA, haplogroup F1a1a, 19,000 years ago in the locomotive cemetery in Irkutsk Siberia, and Allah's spirit , was in the bones of the youth of Kahfi, in the cave, 309 years, in Ephesos , near Izmir Turkey, based on deoxyribonucleic acid (DNA)

There are several verses that reveal the secret of Allah about Allah's spirit was in human bones, through mitochondrial DNA, haplogroup F1a1a, 19,000 years ago in the locomotive cemetery in Irkutsk Siberia, and Allah's spirit , was in the bones of the youth of Kahfi, in the cave, 309 years, in Ephesos , near Izmir Turkey, namely the verses:

*"When the youth sought shelter in the cave, then they prayed: "O our God, grant us mercy from Your side and complete for us straight guidance in our interests" (Al Kahf: 18:10)*

*"So We closed their ears for several years in that cave (Al Kahf: 18:11)*

*"Then We woke them up, so that We might know which of the two groups was more accurate in calculating how long they had stayed (Al Kahf: 18:12)*

*"Our people have made other than Allah their gods. Why don't they come up with clear reasons? Who is more unjust than those who invent lies against Allah? (Al Kahf:18:15)*

*"And they lived in their caves three hundred years and added nine years. (Al Kahf:18:25)*

*"So when I have perfected the body of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)*

In an effort to reveal the greatness of Allah SWT regarding Allah's spirit was in human bones, through mitochondrial DNA, haplogroup F1a1a, 19,000 years ago in the locomotive cemetery in Irkutsk Siberia, and Allah's spirit , was in the bones of the youth of Kahfi, in the cave, 309 years, in Ephesos , near Izmir Turkey, based on deoxyribonucleic acid (DNA).

## HYPOTHESES

Here the author proposes hypothesis Allah's spirit was in human bones, through mitochondrial DNA, haplogroup F1a1a, 19,000 years ago in the locomotive cemetery in Irkutsk Siberia, and Allah's spirit , was in the bones of the youth of Kahfi, in the cave, 309 years, in Ephesos , near Izmir Turkey, based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information which has a double structure that forms a double helix and which contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 nitrogen atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

**ALLAH'S SPIRIT WAS IN HUMAN BONES, THROUGH MITOCHONDRIAL DNA, HAPLOGROUP F1a1a, 19000 YEARS AGO IN THE LOCOMOTIVE CEMETERY IN IRKUTSK SIBERIA, AND ALLAH'S SPIRIT, WAS IN THE BONES OF THE YOUTH OF KAHFI, IN THE CAVE, 309 YEARS, IN EPHESES, NEAR IZMIR TURKEY**

So now, we still continue to focus our minds on uncovering the secrets contained behind the verses:  
*"When the youth sought shelter in the cave...(Al Kahfi: 18: 10)*

Well, here, Allah declares *"When the youth sought shelter in the cave...(Al Kahfi: 18: 10)*

It turns out that this cave is in a place called Efesos near Izmir in Turkey

Now, the question arises,

Why do *"...the youth sought shelter in the cave...(Al Kahfi: 18: 10)?*

The answer is in the secret behind the verse: *"Our people have made other than Allah their gods...(Al Kahf: 18: 15)*

Well, these the youth men said *"our people..." (Al Kahfi: 18: 15)*

Who are *"our people..."* (Al Kahfi: 18: 15)?

It turns out that these the youth men were under the rule of the reigning emperor Decius (249 - 51 AD)

These the youth men follow the teachings of the Prophet Isa. Where the ruler Decius did not want the teachings of the Prophet Isa to be embedded in the minds of these the youth.

To escape the pursuit of Decius' followers, these the youth men hid in a cave in Ephesos.

What happened to the youth men, who hid in the cave at Ephesos, *"...they lived in their caves three hundred years and added nine years.* (Al Kahf:18:25)

Apparently, the youth, hid in a cave in Ephesos for 309 years. This means that the youth men lived and died in the cave for 309 years.

So the question now is,

When *"...Allah woke them up...(Al Kahf:18:12)*, after 309 years the youth men lived and died in the cave, what exactly was it that *"...woke them up...(Al Kahf:18:12)?*

Well, the answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

It turns out that what woke up was *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)*

Where *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* is in the bones of the dead youth men.

Or in other words, in the bones of the dead youth men, 309 years old, there are hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms as well as other atoms, which are the building blocks of DNA.

So, as long as there are bones, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms and other atoms, there is DNA in the bones.

So, also in women's bones who died 19,000 years ago, mitochondrial DNA was found. Mitochondrial DNA found in female bones. Like mitochondrial DNA, Haplogroup F1a1a was formed about 19,000 years ago (FamilyTreeDNA) in the Lokomotiv Cemetery in Irkutsk, Siberia.

Or in other words, in the bones of a dead woman, in the Lokomotiv Cemetery in Irkutsk, Siberia, 19,000 years ago, was found *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)*

So, those who *"...wake up (from the bodies of) those (who died)...(Al Kahf:18:12 )* are *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is the building block of DNA and mitochondrial DNA

So, in fact, *"...Allah woke them up...(Al Kahf:18:12)* refers to *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which came out of women's bones who died 19,000 years ago and from the bones of people who died 309 years in the cave.

**CONCLUSION**

Based on the description above we can conclude that the secrets contained behind the verses:  
***"When the youth sought shelter in the cave...(Al Kahfi: 18: 10)***
