ABSTRACT

Before the author writes about based on energy and matter, which exist in the universe, from the beginning, there is only one God, nothing else, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about based on energy and matter, which exist in the universe, from the beginning, there is only one God, nothing else, based on deoxyribonucleic acid (DNA).

There are several verses that reveal the secrets of Allah about based on energy and matter, which exist in the universe, from the beginning, there is only one God, nothing else, namely the following verses:

"Then when I have perfected the body and I have breathed on him my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"Allah has created the seven skys in layers. You do not see in the creation of God the Most Gracious anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"He is the First and the Last, the Zhahir and the Inner; and He is All-Knower of all things. (Al Hadiid: 57: 3)

"And to Allah the east and the west, so wherever you turn there is the face of Allah. Surely Allah is All-Wise, All-Knowing. (Al Baqarah: 2: 115)

In an effort to open the veil of Allah's secret about based on energy and matter, which exist in the universe, from the beginning, there is only one God, nothing else, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes a hypothesis based on energy and matter, which exist in the universe, from the beginning, there is only one God, nothing else based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building block of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

BASED ON ENERGY AND MATERIAL, WHICH EXIST IN THE UNIVERSE, FROM THE BEGINNING, THERE IS ONLY ONE GOD, NOTHING ELSE

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"...my spirit...(Shaad : 38: 72)"...the face of Allah...(Al Baqarah : 2: 115)*

Well, here, Allah or Jahve or Adonai, reveals the true secret about Allah or Jahve or Adonai, to all people in the world, *"...my spirit...(Shaad : 38: 72)"...the face of Allah. ..(Al Baqarah : 2: 115)*

Now, what is in *"...my spirit...(Shaad : 38: 72)* and *"...the face of Allah...(Al Baqarah : 2: 115)?*

In fact, based on empirical evidence, *"...my spirit...(Shaad : 38: 72)* contains atoms.

Well, these atoms are matter.

If the hydrogen atom, which is the building block of the human body, animals, plants and fruits and inanimate objects, is examined, one electron and one proton nucleus will be found. If the proton is examined more deeply, you will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

Apparently, from *"...my spirit...(Shaad : 38: 72)* quarks were found.

These quarks are formed by energy.

Now, the question arises,

Where does energy come from?

The answer is in the secret behind the verse: *"He is the First ...(Al Hadiid : 57: 3)*

Well, *"He is the First ...(Al Hadiid : 57: 3)* refers to energy that is one with God

That means, if written mathematically, **God – energy – God – energy – God.**

God and energy are inseparable.

When energy forms quarks, it's the same way God forms quarks.

Or in other words, **God – God energy**, forming quarks.

Now, this is empirical evidence, **energy – God**, is united.

Or in other words,

Based on energy and matter, existing in the universe, from the very beginning, there was only one God, there was no other

If now, there are many Gods worshiped by humans, it is not a God who unites with the energy that forms quarks, but a God who comes because he is formed from atoms.

Or it can be called also, God the result of human thoughts.

Allah or Jahve or Adonai is God who is united with energy, which forms quarks.
So, actually, Allah or Jahve or Adonai is God, there is no other god.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: *"...my spirit...(Shaad : 38: 72)"...the face of Allah...(Al Baqarah : 2: 115)*

Well, here, Allah or Jahve or Adonai, reveals the true secret about Allah or Jahve or Adonai, to all people in the world, *"...my spirit...(Shaad : 38: 72)"...the face of Allah. ..(Al Baqarah : 2: 115)*
