## ABSTRACT

Before the author writes about empirical evidence, how Adam was created in paradise, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of empirical evidence, how Adam was created in paradise, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about empirical evidence, how Adam was created in paradise, namely the following verses:

*"He created you from a single self and from him He created his wife, so that she would be pleased with him... (Al A'raaf: 7:189)*

*"And indeed We created human from an essence from the soil (Al Mu'minuun: 23: 12)*

*"Then when I have perfected the body and I have breathed on him my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)*

*"Then He perfected the body and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)*

*"And We said: "O Adam, dwell with you and your wife in this paradise, and eat its many good foods wherever you like, and do not approach this tree, which makes you one of the wrongdoers. (Al Baqarah: 2: 35)*

*"And they ask you about the spirit. Say: "The spirit is the interest of my God, and you are not given knowledge but a little." (Al Israa ': 17: 85)*

*"so Maryam made a veil over them; then We sent Our spirit to her, and Our spirit incarnated before her a perfect man. (Maryam 19: 17)*

*"Who has created the seven skys in layers. You never see in the creation of God the Most Gracious something that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)*

In an effort to uncover Allah's secret veil about empirical evidence, how Adam was created in paradise, the author uses the basis of deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes the hypothesis that empirical evidence, how Adam was created in paradise, through Deoxyribonucleic acid (DNA), based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

## EMPIRICAL EVIDENCE, HOW ADAM WAS CREATED IN PARADISE

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"He created you from a single self...(Al A'raaf: 7:189)"... We created human from an essence from the soil (Al Mu'minuun: 23: 12)*

Well, it turns out that here, Allah or Jahve or Adonai has revealed the real secret about how Adam was created with the declaration *"He created you from a single self...(Al A'raaf: 7:189)*

So, now the question arises,

What exactly does Allah or Jahve or Adonai mean by *"...a single self...(Al A'raaf: 7:189)?*

Apparently, the secret *"...a single self...(Al A'raaf: 7:189)* is in the secret behind the verse: *"...He perfected the body and breathed into it His spirit and He made for you hearing, sight and heart...(As Sajdah : 32: 9)*

So it turns out, *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or Jahve's spirit or Adonai's spirit is Deoxyribonucleic acid (DNA) which is the source of the occurrence *"...hearing, sight and heart...(As Sajdah: 32: 9)*

So, actually, what Allah or Jahve or Adonai mean by *"...a single self...(Al A'raaf: 7:189)* is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atom.

Or in other words, the creation of Adam from *"...a single self...(Al A'raaf: 7:189)* is from hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where the creation of Adam is the same as the creation of "...seven skys...(Al Mulk: 67: 3) which was originally from quarks, then from hydrogen atoms, until they became "...seven skys...(Al Mulk: 67 : 3) as it is now.

So, the creation of Adam and his wife is a chain of creation "...seven skys...(Al Mulk: 67: 3) which is still ongoing until now.

Now, to look for traces of human creation from "...a single self...(Al A'raaf: 7:189), we can use the genetic code contained in the molecular structure of nucleic acids or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role in synthesizing proteins and carrying out catalytic activity.

This genetic code is used by almost all types of living organisms from archaea, bacteria, plants, amoebas, fungi, animals to humans today. Since the genetic code is universal, the same genetic code applies to all types of living organisms. With the similarity of this genetic code, we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans, including Adam and his wife, are related to all kinds of living organisms, from archaea, bacteria, plants, amoebas, fungi to animals.

The living organisms that first appeared on Earth several billion years ago passed their traits on to their living organisms. Examples of these genetic codes or codons are for example CAA and CAG which are amino acids or the amino acid glutamine.

The existence of a kinship relationship between humans and all other types of living organisms proves the secret truth of Allah that is behind the verse "*He created you from a single self...(Al A'raaf: 7:189)*". Where Allah created humans from "...a single self...(Al A'raaf: 7:189), meaning from the start a type of living organism that has only one cell.

This is empirical evidence, how Adam was created in paradise, which most of the people in the world still don't understand.

## CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: "*He created you from a single self...(Al A'raaf: 7:189)*"... *We created human from an essence from the soil (Al Mu'minuun: 23: 12)*

Well, it turns out that here, Allah or Jahve or Adonai has revealed the real secret about how Adam was created with the declaration "*He created you from a single self...(Al A'raaf: 7:189)*

This is empirical evidence, how Adam was created in paradise, which most of the people in the world still don't understand.
