ABSTRACT

Before the author writes about empirical evidence, humans created, from star fuel, if humans die, burn, as in the belief of Hindu people, and it is done by most humans in the world, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of empirical evidence, humans created, from star fuel, if humans die, burn, as in the belief of Hindu people, and it is done by most humans in the world, based on deoxyribonucleic acid (DNA).

There are several verses that open Allah's secret regarding empirical evidence, humans created, from star fuel, if humans die, burn, as in the belief of Hindu people, and it is done by most humans in the world, namely the following verses:

"Then when I have perfected the body and I have breathed on him my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the body and have breathed into it my spirit, then submit to him with prostration (Al Hijr: 15: 29)

"Then He perfected the body and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"Allah holds spirit when it dies and spirit that has not died in its sleep; He holds spirit that He has determined its death and He releases another spirit until the appointed time. Indeed, these are signs of Allah's power for people who think (AzZumar: 39: 42)

"When the sun is rolled up, (At Takwiir: 81: 1)

"O people, if you are in doubt about the resurrection, then surely We have created you from soil, then from a drop of sperm, then from a clot of blood, then from a lump of flesh that is perfect and imperfect, so that We explain to you and determine in the wombs, what We want until an appointed time, then We bring you out as babies, then you come to maturity, and some of you pass away and some of you have extended their lives until they are senile, they don't know anything that used to be he knows. And you see that the earth is dry, then when We send down water on it, the earth will live and be fertile and grow all kinds of beautiful plants. (Al Hajj: 22: 5)

"Allah has created the seven skys in layers. You do not see in the creation of God the Most Gracious anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"So Maryam made a veil from them; then We sent Our spirit to Maryam, he was incarnated as a perfect human before Maryam (Maryam: 19: 17)

"Read your book, just be yourself at this time as your reckoning." (Al Israa' : 17: 14)

In an effort to open Allah's veil of secrets regarding empirical evidence, humans created, from star fuel, if humans die, burn, as in the belief of Hindu people, and it is done by most humans in the world, the authors use deoxyribonucleic acid as a basis.

HYPOTHESIS

Here the author proposes an empirical evidence hypothesis, if humans die, burn, as in the belief of Hindu people, and it is done by most humans in the world, then *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* quickly leaves the body, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

EMPIRICAL EVIDENCE, HUMANS CREATED, FROM STAR FUEL, IF HUMANS DIE, BURN, AS IN THE BELIEF OF HINDU PEOPLE, AND IT IS DONE BY MOST HUMANS IN THE WORLD

Now, we are still concentrating on uncovering the secret contained behind the verse: *"... We have created you from soil,... (Al Hajj: 22: 5)"... I... breathed into human my spirit...(Al Hizr : 15: 29)*

It turns out that here Allah or Jahve or Adonai declares 2 important factors regarding the creation of human beings, factor 1, is *"...the soil...(Al Hajj: 22: 5)* and factor 2, is *"...my spirit...(Al Hizr : 15: 29)*

So, now the question arises,

What is the relationship between *"...the soil...(Al Hajj: 22: 5)* and *"...my spirit...(Al Hizr : 15: 29) ?*

The answer is in the secret behind the verse: *"Allah has created seven skys... balanced (Al Mulk : 67: 3)*

As it turns out, whatever is in the "...seven skys...(Al Mulk: 67: 3) was created from scratch with quarks, which became hydrogen atoms, until they were formed as they are today.

Well, this hydrogen atom is what makes stars shine. That is, due to the 2 hydrogen atoms colliding with each other, that gives rise to energy.

So, in fact, in the presence of a hydrogen atom, there arises "...the soil...(Al Hajj: 22: 5) and "...my spirit...(Al Hijr : 15: 29)

In "...the soil...(Al Hajj: 22: 5) there is a hydrogen atom, in "...my spirit...(Al Hijr : 15: 29) or "...Allah's spirit.. (Al Hijr : 15: 29) or Jahve's spirit or Adonai's spirit there is a hydrogen atom.

So, humans were created from "...the soil...(Al Hajj: 22: 5) because in the soil there are hydrogen atoms.

"...Allah...breathed into human my spirit...(Al Hijr : 15: 29)

That is, hydrogen atoms that "... are breathed into human... (Al Hijr: 15: 29)

Now, another question arises,

Why in Hindu belief, when a human dies, he must be burned?

Well, the answer is, because according to Hindu beliefs, humans were created with star fuel, that is, with hydrogen atoms. When stars die, stars burn. Therefore, when humans die, they must be burned, as happens with stars.

Well, with humans, burned, then "...my spirit...(Al Hijr : 15: 29) or "...Allah's spirit.. (Al Hijr : 15: 29) or Jahve's spirit or Adonai's spirit quickly go out.

Also, the 7 000000000 000000000 000000000 atoms, including hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms, that are in the human body when burned, all come out.

Hydrogen atoms and nitrogen atoms rise into the atmosphere. Carbon atoms unite with oxygen atoms to form carbon dioxide, which is absorbed by plants and flowers. Oxygen atoms are inhaled by humans and animals. Carbon dioxide, which plants and flowers do not have time to absorb, rises into the atmosphere, pollutes the environment, and becomes toxic to humans, as well as destroying the ozone.

This, is the process of "...incarnation...(Maryam : 19: 17), for survival in "...seven skys...(Al Mulk : 67: 3)

Of course, "...my spirit...(Al Hijr : 15: 29) or "...Allah's spirit.. (Al Hijr : 15: 29) or Jahve's spirit or Adonai's spirit that comes out of a body that is burned , gathered in one place, waiting for the command of Allah or Jahve or Adonai, who will order "*Read your book, just be yourself at this time as your reckoner.*" (Al Israa' : 17: 14)

CONCLUSION

The conclusions that can be drawn from the explanation above are the secret contained behind the verse: "... We have created you from soil,... (Al Hajj: 22: 5)"... I... breathed into human my spirit...(Al

Hijr : 15: 29)

It turns out that here Allah or Jahve or Adonai declares 2 important factors regarding the creation of human beings, factor 1, is *"...the soil...(Al Hajj: 22: 5)* and factor 2, is *"...my spirit...(Al Hijr : 15: 29)*
