ABSTRACT

Before the author writes about Hajj is a symbol of creation of the sky and earth with Allah's spirit, Allah's energy and Allah's particles, the writer first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Hajj is a symbol of creation of the sky and earth with Allah's spirit, Allah's energy and Allah's particles, based on deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret tools about Hajj is a symbol of creation of the sky and earth with Allah's spirit, Allah's energy and Allah's particles, namely the following verses:

"Then when I have completed the body and I have breathed on him my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"And to Allah the east and the west, so wherever you turn there is the face of Allah. Surely Allah is All-Wise, All-Knowing. (Al Baqarah: 2: 115)

"He causes the night to enter into the day and causes the day to enter into the night. And He is All-Knowing of all that is in the heart. (Al Hadiid: 57: 6)

"Allah takes care of the two places where the sun rises and Allah takes care of the two places where it sets (Ar Rahmaan: 55: 17)

"Who has created the seven skys, in layers. You do not see anything in the creation of the Most Gracious God that is unbalanced. So look again and again, do you see anything that is unbalanced? (Al Mulk: 67: 3)

"Indeed, Shafa and Marwah are part of the syi'ar of Allah. So whoever performs Hajj to the House of Allah or performs 'umrah, then there is no sin for him to do sa'i between the two. And whoever does a good deed with a willing heart, then indeed Allah is Grateful for goodness, All-Knowing (Al Baqarah: 2: 158)

"And among His signs is that you see the earth is dry and arid, so when We send down water on it, it will surely move and be fertile. Indeed, God Who gives life to it, can certainly give life to the dead. Verily, He is Almighty over all things. (Fushshilat: 41: 39)

"When both of them had surrendered and Ibrahim laid his son on his pelipis between the eyes and ears (Ash Shaaffaat: 37: 103)

"And We ransomed the child with a large sacrifice (Ash Shaaffaat: 37: 107)

"Allah said: "What prevented you from prostrating when I ordered you to? Answered the devil, I am better than him: You created me from fire, while You created him from clay (Al A'raaf: 7: 12)

In an effort to open the veil of Allah's secret about Hajj is a symbol of creation of the sky and earth with Allah's spirit, Allah's energy and Allah's particles, the author uses deoxyribonucleic acid as a basis.

HYPOTHESIS

Here the authors propose the hypothesis that Hajj is a symbol of creation of the sky and earth with Allah's spirit, Allah's energy and Allah's particles, seen from the point of view of Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

HAJJ IS A SYMBOL OF CREATION OF THE SKY AND EARTH WITH ALLAH'S SPIRIT, ALLAH'S ENERGY AND ALLAH'S PARTICLES

Now, we are still concentrating on uncovering the secret behind the verse: *"He causes the night to enter into the day and causes the day to enter into the night ... (Al Hadiid: 57: 6)"Allah takes care of the two places where the sun rises and...where it sets (Ar Rahmaan: 55: 17)"...Shafa and Marwah are part of the syi'ar of Allah...(Al Baqarah: 2: 158)"...You created me from fire...(Al A'raaf: 7: 12) "...seven skys, in layers...(Al Mulk: 67: 3)*

Well, here, Allah or Jahve or Adonai, has opened the secret of hajj to all people in the world, including all Muslims in the world, *"He causes the night to enter into the day and ...the day to enter into the night ... (Al Hadiid: 57: 6)"Allah takes care of the two places where the sun rises and...where it sets (Ar Rahmaan: 55: 17)"...seven skys, in layers...(Al Mulk: 67: 3)"...Shafa and Marwah are...syi'ar of Allah...(Al Baqarah: 2: 158) "...Allah created the devil from fire...(Al A'raaf: 7: 12)*

Apparently, from the declaration of Allah or Jahve or Adonai, 3 important factors were found, which had something to do with hajj.

Factor 1, is that the earth rotates on its axis, and revolves around the sun, *"He causes the night to enter into the day and ...the day to enter into the night ... (Al Hadiid: 57: 6)"Allah takes care of the two*

places where the sun rises and...where it sets (Ar Rahmaan: 55: 17) "...seven skys, in layers...(Al Mulk: 67: 3), which is the reference, when Muslims perform tawaf, 7 rounds.

That is, Muslims, when performing tawaf, start from the corner of the Black Stone facing east, turning northward, to the corner of Iraq, then westward, to the direction of Sham, continue south, to the corner of Yemen, back to the direction of the Black Stone, 7 rounds.

Just like the earth, around the sun, starting from the east, turning north, continuing to the west, continuing to the south, returning to the east.

Factor 2, is that when Muslims perform sa'i, they walk between Shafa - Marwah, Marwah - Shafa, *"...Shafa and Marwah are part of the syi'ar of Allah... (Al Baqarah: 2: 158).*

Where, sa'i is a symbol of *"...my spirit... (Shaad : 38: 72)* or *"...the spirit of Allah... (Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai which was built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

As kept in the secret behind the verse: *"... you see the earth is dry and arid, so when We send down water on it, it will surely move and be fertile... (Fushshilat: 41: 39)*

Well, actually what forms the water that makes the arid earth fertile are hydrogen atoms and oxygen atoms.

Now, with the presence of hydrogen atoms and oxygen atoms that unite to form this water, Allah declares *"...Shafa and Marwah are part of the syi'ar of Allah... (Al Baqarah: 2: 158).*

Or in other words, *"...my spirit... (Shaad : 38: 72)* or *"...the spirit of Allah... (Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai in which there are hydrogen atoms and oxygen atoms, which form the water that makes the arid earth fertile.

Factor 3, is that Muslims throw the jumrah, jumrah al-Ula, jumrah al-Wusta and jumrah al-Aqabah, which are symbols referring to *"...Allah created the devil from fire... (Al A'raaf: 7: 12)*

Or in other words, *"...Allah created the devil from an oxygen atom...(Al A'raaf : 7: 12)*

Where the oxygen atom is easily oxidized with other atoms, and is flammable.

Well, because the oxygen atom is flammable, then to extinguish it, the oxygen atom is mixed with a hydrogen atom. By mixing one oxygen atom with two hydrogen atoms, it becomes water.

This, is the secret, reversed, throwing the jumrah, that is, when Muslims throw a stone, in which there is a hydrogen atom, they throw it into the jumrah, which is symbolized by the devil, which is made of oxygen atoms, then when the hydrogen atoms in the stone meet with oxygen atoms, it becomes water or H₂O.

So, now, uncovered, the secret, behind the pilgrimage, is a symbol that refers to the creation of the skys and the earth with Allah's spirit, Allah's energy and Allah's particles.

CONCLUSION

The conclusions that can be drawn from the explanation above are the secret behind the verse: *"He causes the night to enter into the day and causes the day to enter into the night ... (Al Hadiid: 57: 6)"Allah takes care of the two places where the sun rises and...where it sets (Ar Rahmaan: 55: 17)"...Shafa and*

Marwah are part of the syi'ar of Allah...(Al Baqarah: 2: 158)"...You created me from fire...(Al A'raaf : 7: 12) "...seven skys, in layers...(Al Mulk: 67: 3)
