ABSTRACT

First, by asking for Allah's forgiveness, here the author tries to uncover the signs of Allah's greatness about how human feel Allah is in own body, based on deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding how human feel Allah is in own body, are found in several verses, namely:

"Allah holds the nafs (soul) when it dies and the nafs (soul) that has not yet died when it sleeps, Allah holds the nafs (soul) for which Allah has ordained its death and Allah releases the other nafs (soul) until the appointed time. Verily in that case there are signs of Allah's power for people who think (Az Zumar: 39: 42)

"So when Allah perfected the body of Adam and Allah breathed on Adam Allah's spirit, then you fell down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the body of Adam, and have breathed into Adam Allah's spirit, then you bow down to him by prostrating (Al Hijr: 15: 29)

"Then Allah perfected the body and breathed into Adam Allah's spirit and Allah made for you hearing, sight and heart, you are very little grateful. (As Sajdah: 32: 9)

"And when My servants ask you about Me, then I am near. I grant the request of those who pray when he asks Me, then let them fulfill and let them believe in Me, so that they are always in the truth (Al Baqarah: 2: 186)

"...Allah is closer to man than his jugular vein, (Qaf : 50: 16)

In an effort to uncover the greatness of Allah SWT regarding how human feel Allah is in own body, the author uses the basis of deoxyribonucleic acid (DNA).

HYPOTHESES

Here the author proposes a hypothesis on how human feel Allah is in own body, based on deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure form a double helix and which contain polynucleotide macromolecules arranged together repeatedly from the nucleotide polymer. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

HOW HUMAN FEEL GOD IS IN HIS OWN BODY

Now, we are still concentrating on unraveling the secret behind the verse: *"Allah holds the nafs (soul) when it dies...and Allah releases the other nafs (soul) until the appointed time....(Az Zumar : 39: 42)" ...I am near...(Al Baqarah: 2: 186)"...Allah breathed on Adam Allah's spirit...(Shaad : 38: 72)*

It turns out that, here, Allah has revealed Allah's secret about *"... nafs (soul)... (Az Zumar: 39: 42)* through the declaration *"Allah holds the nafs (soul) ... (Az Zumar : 39: 42)"...I am near...(Al Baqarah: 2: 186)*

So, now the question arises,

What exactly does Allah mean *"...nafs (soul)...(Az Zumar: 39: 42)?*

Well, the answer is in the secret behind the verse: *"...Allah breathed on Adam Allah's spirit...(Shaad : 38: 72)*

Well, it turns out that what Allah declared with *"...nafs (soul)...(Az Zumar : 39: 42)* is *"...Allah's spirit...(Shaad : 38: 72)*

So, actually what Allah means, *"Allah holds the nafs (soul) when it dies...and Allah releases the other nafs (soul) until the appointed time....(Az Zumar : 39: 42)* is *"Allah holds... (Az Zumar : 39: 42)"...Allah's spirit...(Shaad : 38: 72)* and *"...Allah releases...(Az Zumar : 39: 42)"...Allah's spirit...(Shaad : 38: 72)*

Well, apparently *"Allah holds...(Az Zumar: 39: 42)"...Allah's spirit...(Shaad : 38: 72)* when humans are asleep.

That is, when the relationship between the brain and the body is less than perfect. Where when humans are sleeping, the brain continues to work, while the body is in a calm state, where the heart continues to work.

So, when the relationship between the brain and body is less than perfect, at that moment *"Allah holds...(Az Zumar: 39: 42)"...Allah's spirit...(Shaad : 38: 72)*

Why does *"Allah holds...(Az Zumar: 39: 42)"...Allah's spirit...(Shaad : 38: 72)*, when the brain and body do not have a perfect relationship?

The answer is,

There is a secret behind the verse: *"...Allah is closer to man than his jugular vein, (Qaf : 50: 16)*

Now, it was revealed, that Allah with Allah's energy through *"...Allah's spirit...(Shaad : 38: 72)* which *"...is closer to man than his jugular vein, (Qaf : 50: 16)* controls the brain and the human body through a network of nerves in the brain and throughout the body as well as blood vessels that come from the heart and enter the heart.

So, when humans are sleeping and *"...Allah holds the nafs (soul) for which Allah has ordained its death...(Az Zumar: 39: 42)* then it is Allah's energy that gives birth to *"...Allah's spirit...(Shaad : 38: 72)* stop the work of the heart.

Now, with the cessation of this heart work declared by Allah *"...Allah holds the nafs (soul) for which Allah has ordained its death...(Az Zumar: 39: 42)*

So actually, with Allah's energy that gives birth *"...Allah's spirit...(Shaad : 38: 72)* stops the heart from working, then that's when humans die.

Now, because Allah's energy that gives birth to *"...Allah's spirit...(Shaad : 38: 72)* is throughout the body and throughout the human brain tissue, in fact, humans will feel directly *"...Allah's spirit...(Shaad : 38: 72)* through the nerve network in the brain and throughout the body as well as blood vessels coming from the heart and entering the heart.

Or in other words, humans will feel Allah is in the human body through the beating of the heart that circulates blood throughout the human body. And through the neural network in the brain, when humans are thinking, working, reading, walking, talking, sitting, standing and whatever humans do.

Well, now it's been revealed, that it's very easy to know how humans feel Allah in their own bodies, but most people don't understand.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"Allah holds the nafs (soul) when it dies...and Allah releases the other nafs (soul) until the appointed time....(Az Zumar : 39: 42)" ...I am near...(Al Baqarah: 2: 186)"...Allah breathed on Adam Allah's spirit...(Shaad : 38: 72)*

It turns out that, here, Allah has revealed Allah's secret about *"... nafs (soul)... (Az Zumar: 39: 42)* through the declaration *"Allah holds the nafs (soul) ...(Az Zumar : 39: 42)"...I am near...(Al Baqarah: 2: 186)*

So, now the question arises,

What exactly does Allah mean *"...nafs (soul)...(Az Zumar: 39: 42)"*?

Well, the answer is in the secret behind the verse: *"...Allah breathed on Adam Allah's spirit...(Shaad : 38: 72)*

Well, apparently *"Allah holds...(Az Zumar: 39: 42)"...Allah's spirit...(Shaad : 38: 72)* when humans are asleep.

That is, when the relationship between the brain and the body is less than perfect. Where when humans are sleeping, the brain continues to work, while the body is in a calm state, where the heart continues to work.

The answer is,

There is a secret behind the verse: *"...Allah is closer to man than his jugular vein, (Qaf : 50: 16)*
