ABSTRACT

Before the author writes about human doesn't die, but incarnation as human again, the author first asked forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about human doesn't die, but incarnation as human again, based on Deoxyribonucleic acid (DNA)

There are several verses that reveal Alla's secret about human doesn't die, but incarnation as human again, namely the verses:

"So when I have perfected the body of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him (Shaad: 38: 72)

"...We sent Our spirit to Maryam, so Our spirit incarnated before Martyam the perfect human (Maryam: 19: 17)

"Do not think that those who fall in the way of Allah are dead, in fact they live with their God with sustenance (Ali 'Imran: 3: 169)

In an effort to open the veil about human doesn't die, but incarnation as human again, the author relies on deoxyribonucleic acid.

HYPOTHESES

Here the author proposes hypothesis human doesn't die, but incarnation as human again, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

HUMAN DOESN'T DIE, BUT INCARNATIONS AS HUMAN AGAIN

So now, we still continue to focus all our thoughts on uncovering the secret hidden behind the verse: *"...those who fall in the way of Allah are...they live with their God ...(Ali 'Imran: 3: 169)" ...Our spirit incarnated...perfect human (Maryam: 19: 17)*

Well, it turns out that here Allah declares *"...those who fall in the way of Allah are...they live with their God ...(Ali 'Imran: 3: 169)*

This means that humans do not die, but *"...incarnate...as humans (Maryam: 19: 17)*

Well, now the question arises,

Why don't humans die, but *"...incarnate...as humans (Maryam: 19: 17)?*

The answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which remains alive until the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000 000000 000000000 000000000 000000000 years.

So, actually, because the human body is built with 7 000000000 000000000 000000000 atoms, including carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, then when the heart no longer functions and the human dies, carbon atoms, hydrogen atoms, nitrogen atoms, oxygen and other atoms from the dead human body.

Well, oxygen atoms are inhaled by humans and animals, carbon atoms are used as food by plants, hydrogen atoms combine with oxygen atoms to form water, nitrogen atoms rise into the atmosphere.

Well, this is what is called when humans do not die, but are incarnated as humans again.

As for *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, comes out from dead human bodies, gathered in paradise and in hell.

Well, carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which form the building of *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* only a small part. Meanwhile, most of the carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms that come out of dead human bodies are used again by humans and other living creatures.

Or in other words, humans do not die, but are reincarnated as humans again.

This is a secret of Allah that is still not understood by most people, including most Muslims in the world.

CONCLUSION

Based on the description above we can conclude that the secret hidden behind the verse: *"...those who fall in the way of Allah are...they live with their God ...(Ali 'Imran: 3: 169)" ...Our spirit incarnated...perfect human (Maryam: 19: 17)*

Well, it turns out that here Allah declares *"...those who fall in the way of Allah are...they live with their*
