ABSTRACT

Before the author writes about humans from one self, their relationship with animals, plants, fungi, amoeba, bacteria and ancient humans, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about humans from one self, their relationship with animals, plants, fungi, amoeba, bacteria and ancient humans, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about humans from one self, their relationship with animals, plants, fungi, amoeba, bacteria and ancient humans, namely the following verses:

"And indeed We have created human from the essence of soil. (Al Mu'minuun: 23: 12)

"He Who created you from one self and from him He created his wife, so that he would be pleased with her...(Al A'raaf: 7:189)

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"So when I have perfected the existence of Adam, and have breathed into Adam My spirit, then you will bow to Adam by prostrating (Al Hijr: 15: 29)

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9)

"And indeed We have created human and know what his heart whispers, and We are closer to him than his jugular vein." (Qaf: 50:16)

"So Maryam created a veil from them, then We sent Our spirit to Maryam, then Our spirit incarnated before Maryam, the perfect human being. (Maryam 19: 17)

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the sky and the earth: "Our God, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran : 3: 191)

"Who has created the seven skys in layers. You do not see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

In an effort to uncover Allah's secrets about humans from one self, their relationship with animals, plants, fungi, amoeba, bacteria and ancient humans, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis humans from one self, their relationship with animals, plants,

fungi, amoeba, bacteria and ancient humans, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

HUMANS FROM ONE SELF, THEIR RELATIONSHIP WITH ANIMALS, PLANTS, FUNGI, AMOEBA, BACTERIA AND ANCIENT HUMANS

So now, we still continue to focus our minds on uncovering the secret contained behind the verses: *"He Who created you from one self...(Al A'raaf: 7:189)"...We have created human from the essence of soil (Al Mu'minuun: 23: 12) "...I breathed into Adam my spirit...(Shaad: 38: 72)*

Well, it turns out that Allah has clearly declared *"He Who created you from one self...(Al A'raaf: 7:189)*

Now the question arises,

What does Allah actually mean by *"He Who created you from one self...(Al A'raaf: 7:189)?*

The answer is in the secret behind the verse: *"...We have created human from the essence of soil (Al Mu'minuun: 23: 12)*

Well, it turns out that Allah *"...created human from...soil (Al Mu'minuun: 23: 12)*

Most people around the world understand that *"...soil (Al Mu'minuun: 23: 12)* contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms. Or in other words, *"...soil (Al Mu'minuun: 23:*

12) contains "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)*

So, because Allah created humans from "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)* or from carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, then whatever is in "*...the seven skys...(Al Mulk: 67: 3)* and all their contents, was built with "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)*

Well, based on Allah's declaration "*He Who created you from one self...(Al A'raaf: 7:189)* means, humans were created from one cell, in which there is "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)* which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now another question arises,

What about "*...the creation of the sky and the earth...(Ali 'Imran : 3: 191)*?

Well, "*...the sky and the earth...(Ali 'Imran : 3: 191)* were created with "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)* which was built with carbon atoms, hydrogen atoms, nitrogen and oxygen atoms.

So, in fact, whatever is in "*...the seven skys...(Al Mulk: 67: 3)*, was created by Allah with "*...the creation of the sky and the earth...(Ali 'Imran : 3: 191)* which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now, another question arises,

How were humans created by Allah, from one self, and their relationship with animals, plants, fungi, amoeba, bacteria and ancient humans?

The answer is hidden in the secret behind the verse: "*...He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

It turns out that "*...hearing, sight and heart...(As Sajdah: 32: 9)* are formed by Deoxyribonucleic acid (DNA), which in DNA contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where Deoxyribonucleic acid (DNA) forms chromosomes inside cells.

Well, "*He Who created you from one self...(Al A'raaf: 7:189)*, where, empirical evidence, is in the genetic code contained in DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has role in synthesizing proteins and carrying out catalytic activities.

This genetic code is used by almost all types of living organisms, from archaea, bacteria, plants, amoeba, fungi, animals to humans today. Because the genetic code is universal, the same genetic code applies to all types of living organisms.

With this similarity in genetic code, we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans have family relationships with all types of living organisms, from archaea, bacteria, plants, amoebas, fungi, animals, early humans including Homo habilis, Homo georgicus, Homo ergaster, Homo erectus, Homo antecessor, Homo heidelbergensis, Homo florensiensis and homo neanderthalensis.

So, in fact, Adam and his descendants down to us today, have a family relationship, with archaea, bacteria, plants, amoebas, fungi, animals, ancient humans including homo habilis, homo georgicus, homo ergaster, homo erectus, homo antecessor, homo heidelbergensis, homo florensis and homo neanderthalensis.

Well, this is still not understood by most people in the world, including most Muslims in the world.

CONCLUSION

Based on the description above we can conclude that the secret contained behind the verses: *"He Who created you from one self...(Al A'raaf: 7:189)" "...We have created human from the essence of soil (Al Mu'minuun: 23: 12) "...I breathed into Adam my spirit...(Shaad: 38: 72)*
