## ABSTRACT

Before the author writes about is it true followers of Abdul Wahhab in Saudi Arabia destroyed graves, the writer first asks forgiveness from Allah SWT. Here the author tries to open the veil covering the secret of is it true followers of Abdul Wahhab in Saudi Arabia destroyed graves, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about is it true followers of Abdul Wahhab in Saudi Arabia destroyed graves, namely the following verses:

*"Then when I have perfected the body and I have breathed on him my spirit, then you should fall down prostrating to him." (Shaad: 38: 72)*

*"Then He perfected and breathed into him His spirit and He made for you hearing, sight and heart, you are very little grateful. (As Sajdah: 32: 9)*

*"So Maryam made a veil over them; then We sent Our Spirit to her, so Our Spirit incarnated before her a perfect human. (Maryam: 19: 17)*

In an effort to uncover Allah's secret veil about is it true followers of Abdul Wahhab in Saudi Arabia destroyed graves, the author uses deoxyribonucleic acid as a basis.

## HYPOTHESIS

Here the author proposes a hypothesis is it true followers of Abdul Wahhab in Saudi Arabia destroyed graves, based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The

nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

## **IS IT TRUE FOLLOWERS OF ABDUL WAHHAB IN SAUDI ARABIA DESTROYED GRAVES**

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"..I breathed on him my spirit...(Shaad : 38: 72)"...He perfected and breathed into him His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

Well, here Allah has declared *"..I breathed on him my spirit...(Shaad : 38: 72)*

It turned out that, from what was declared by Allah, it was discovered that the Prophet Adam was a human being, like us who have lived until now. Allah's declaration, *"..I breathed on him my spirit...(Shaad : 38: 72)*

Well, the Prophet Adam was a human being, who has the same Deoxyribonucleic acid (DNA) as all humans that exist and live in the world today. Prophet Adam's DNA is not only the same as other humans, but also the same as DNA in the bodies of animals, in plants, as well as in other living organisms. So, actually, humans are related to animals, plants, bacteria, amoeba archaea and viruses.

Now, why DNA?

Now here Allah declares, *"...He perfected and breathed into him His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

Well, the source of *"...hearing, sight and heart...(As Sajdah: 32: 9)* is DNA

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Well, *"...His spirit...(As Sajdah : 32: 9)* or *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38 : 72)* is what builds DNA.

Or in other words, *"...His spirit...(As Sajdah : 32: 9)* or *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38 : 72)* are carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

So, actually, *"..I breathed on him my spirit...(Shaad : 38: 72)* are carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, which are the building blocks of DNA.

So, in fact, in every human, animal and other living organism that exists in the seven skies, there is *"...His spirit...(As Sajdah : 32: 9)* or *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38 :*

72)

Well, "...His spirit...(As Sajdah : 32: 9) or "...my spirit...(Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38 : 72) will come out of the human body, when humans die.

So, when "...His spirit...(As Sajdah : 32: 9) or "...my spirit...(Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38 : 72) out of the human body, when a human dies, then in the grave, there is no longer "...His spirit...(As Sajdah : 32: 9) or "...my spirit...(Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38 : 72)

So, actually, the grave, is a place, the human body, before "...His spirit...(As Sajdah : 32: 9) or "...my spirit...(Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38 : 72) comes out of the body of the deceased man.

After 30 days, "...His spirit...(As Sajdah : 32: 9) or "...my spirit...(Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38 : 72) out of the human body that died.

Precisely what must be paid attention to is, around the grave must be planted with flowers and trees, with the aim of the flowers and trees absorbing CO2 carbon dioxide that comes out of the human body that dies. Carbon atoms are used as food or glucose for flowers and trees, while oxygen atoms are released to be inhaled by humans and animals.

Well, this is what is called the incarnation, as declared by Allah "... *Our Spirit incarnated ...a perfect human. (Maryam: 19: 17)*

That is, the oxygen atoms that come out of the human body that died, are re-breathed by humans and animals that are still alive. Likewise with carbon atoms, sucked up by flowers and trees to serve as glucose, the food source of flowers and plants.

So, now the problem of graves, is a problem that is not so important, or you could also say the problem of graves, is a problem of twigs.

Now, why did Abdul Wahhab's followers in Saudi Arabia destroyed graves?

The answer is in the secret behind the hadith: **Abu'l-Hayyaj al-Asadi said that 'Ali (b. Abu Talib) said to him: Shall I not send you on the same mission as the Messenger of Allah sent me? Do not leave a statue without destroying it, or a high grave without leveling it. This hadith has been narrated by Habib with the same chain of narrators and he said: (Don't leave) the picture without erasing it. Reference : Sahih Muslim 969a, 969b In-book reference : Book 11, Hadith 120 USC-MSA web (English) reference : Book 4, Hadith 2115**

Well apparently, Allah has declared "...*I breathed on him my spirit...(Shaad : 38: 72)*

From what was declared by Allah, it was revealed, Prophet Adam was a human being, like us who have lived until now. Allah's declaration, "...*I breathed on him my spirit...(Shaad : 38: 72)*

Well, the Prophet Adam was a human being, who has the same Deoxyribonucleic acid (DNA) as all humans that exist and live in the world today. Prophet Adam's DNA is not only the same as other humans, but also the same as DNA in the bodies of animals, in plants, as well as in other living organisms. So, actually, the grave, is a place, the human body, before "...His spirit...(As Sajdah : 32: 9) or "...my

*spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38 : 72)* comes out of the body of the deceased man.

Or in other words, **Reference : Sahih Muslim 969a, 969b In-book reference : Book 11, Hadith 120 USC-MSA web (English) reference : Book 4, Hadith 2115** is a matter of graves, is a problem that is not so important, or it could be said the problem of the grave, is a problem of twigs.

Well, this is what Abdul Wahhab's followers in Saudi Arabia do not understand.

## CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"..I breathed on him my spirit...(Shaad : 38: 72)"...He perfected and breathed into him His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

Well, here Allah has declared *"..I breathed on him my spirit...(Shaad : 38: 72)*
