ABSTRACT

The author begs forgiveness from Allah SWT before continuing to reveal the secrets is it true most muslim in the world believe, humans die, live in graves until the day of resurrection, based on deoxyribonucleic acid (DNA)

Where are the signs of the greatness of Allah SWT regarding is it true most muslim in the world believe, humans die, live in graves until the day of resurrection, namely the verses:

"Did We not made the earth gather (Al Mursalaat: 77: 25)" the living and the dead (Al Mursalaat: 77: 26)

"Then when I have completed the body and I have breathed on him my spirit, then you will fall down and prostrate to him (Shaad: 38: 72)

"on the day they come out of the grave quickly as if they went quickly to the idols (Al Ma'aarij: 70: 43)

"Read your book, enough yourself at this time as a reckoning against you (Al Israa ': 17: 14)

In an effort to reveal the greatness of Allah SWT regarding is it true most muslim in the world believe, humans die, live in graves until the day of resurrection, the author uses deoxyribonucleic acid (DNA).

HYPOTHESES

Here the author proposes a hypothesis is it true most muslim in the world believe, humans die, live in graves until the day of resurrection, based on deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure form a double helix and which contain polynucleotide macromolecules arranged together repeatedly from the nucleotide polymer. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen

and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw material for the manufacture of humans, animals, fungi, amoebas, plants, bacteria and archaea.

IS IT TRUE MOST MUSLIM IN THE WORLD BELIEVE, HUMANS DIE, LIVE IN GRAVES UNTIL THE DAY OF RESURRECTION

Now, we are still concentrating on dismantling the secrets contained behind the verses: "*...they come out of the grave quickly...*(*Al Ma'aarij : 70: 43*)" "*...We made the earth gather (Al Mursalaat: 77: 25)*" "*the living and the dead (Al Mursalaat: 77: 26)*

Well, it turns out, Allah has declared "*...they come out of the grave quickly...*(*Al Ma'aarij : 70: 43*)

So now, the question arises,

How long "*...the dead (Al Mursalaat: 77: 26)*" "*...come out of the graves...*(*Al Ma'aarij : 70: 43*)?

The answer is in the secret behind the verse: "*...I breathed on him my spirit...*(*Shaad : 38: 72*)

Apparently, "*...my spirit...*(*Shaad : 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, "*... out of the graves... (Al Ma'aarij : 70: 43)*

How long "*...my spirit...*(*Shaad : 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, "*... out of the graves... (Al Ma'aarij : 70: 43)* ?

Well, a month after death, carbon atoms and oxygen atoms form carbon dioxide.

Then carbon dioxide is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in the green parts of plants.

Where glucose is used as food by plants while oxygen is inhaled by humans and animals.

Likewise after a month, this dead human body turns into ammonia. Ammonia is converted into nitrites by nitrosoma bacteria. Then the nitrites are converted to nitrates by nitrobacctor bacteria. Eventually nitrate through the denitrification process back into nitrogen and rises into the atmosphere.

So, within a month, "*...my spirit...*(*Shaad : 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, "*... out of the graves... (Al Ma'aarij : 70: 43)*

So, after a month, in the grave, there is no longer "*...my spirit...*(*Shaad : 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) built up with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, there are only bones.

Well, the process "*...my spirit...*(*Shaad : 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) comes out of the human body that dies in this grave, which is declared by Allah "*... the dead (Al Mursalaat: 77: 26)*" "*...come out of the graves...*(*Al Ma'aarij : 70: 43*).

Now, if the majority of Muslims in the world believe that humans die, live in graves until the day of resurrection, which will occur 4.5 billion years from now, that is an incorrect belief.

Well, I see, *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* comes out of the human body that dies in this grave and *"...out of the grave...(Al Ma'aarij: 70: 43)* commanded by Allah *"Read your book, enough yourself at this time as a reckoning against you (Al Israa ' : 17: 14).* *"...the book...(Al Israa' : 17: 14)* which contains records of life from birth to death.

This, the secret of Allah, which the majority of Muslims in the world, still do not understand.

CONCLUSION

From what has been explained above, it can be concluded that the secrets contained behind the verses:*"...they come out of the grave quickly...(Al Ma'aarij : 70: 43)"...We made the earth gather (Al Mursalaat: 77: 25)"the living and the dead (Al Mursalaat: 77: 26)*

Well, it turns out, Allah has declared *"...they come out of the grave quickly...(Al Ma'aarij : 70: 43)*

So now, the question arises,
