ABSTRACT

First, by asking forgiveness from Allah SWT, here the author tries to reveal the signs of Allah SWT's greatness regarding is it true, Allah creates anything that is in the seven skys indirectly, but through Allah's spirit, Allah's particles and Allah's energy, based on deoxyribonucleic acid. (DNA)

Signs of the greatness of Allah SWT regarding is it true, Allah creates anything that is in the seven skys indirectly, but through Allah's spirit, Allah's particles and Allah's energy, are found in several verses, namely:

"Allah is the Creator of the skys and the earth, and when He wills something, He only says to him: Be, then it be (Al Baqarah: 2: 117)

"He is Allah, who made everything on earth for you and He willed the skys, then made seven skys. And He is All-Knower of all things. (Al Baqarah: 2: 29)

"So when I have perfected what happened, and have breathed into him My spirit, then you bow down to him with prostration (Al Hijr: 15: 29)

"He is the one who gives life and causes death, so when He determines something, He only says to him: Be, then it be (Al Mu'min: 40: 68)

"Angels and spirits ascend to God in a day that is fifty thousand years Al Ma'aarij (70: 4)

"Then He perfected and breathed into him His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And when Moses came at the time We had appointed and God had spoken to him, Moses said, "O my God, show me so that I can see You." God said: "You cannot see Me at all, but look at the mountain, so if he stays where he is you will surely be able to see Me." When his Lord appeared to the mountain, he made the mountain crumble to pieces and Musa fell unconscious. So when Musa regained consciousness, he said: "Glory be to God You, I repent to You and I am the first person to believe." (Al A'raaf: 7: 143)

"He is the First and the Last, the Zhahir and the Inner; and He is All-Knower of all things. (Al Hadiid: 57: 3)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Surely Allah is All-Wise, All-Knowing. (Al Baqarah: 2: 115)

"Who has created the seven skys in layers. You never see in the creation of God the Most Gracious something that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"He made seven skys in two periods. He revealed to each sky its interests. And We decorated the near sky with bright stars and We took care of it in the best way. Such is the provision of the Almighty, All-Knowing. (Fushshilat: 41:12)

"He has created human from a clot of blood (Al 'Alaq: 96: 2)

In an effort to uncover the greatness of Allah SWT regarding is it true, Allah creates anything that is in the seven skys indirectly, but through Allah's spirit, Allah's particles and Allah's energy, the author uses the basis of deoxyribonucleic acid (DNA). .

HYPOTHESES

Here the author proposes a hypothesis, is it true, Allah creates anything that is in the seven skys indirectly, but through Allah's spirit, Allah's particles and Allah's energy, based on deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure form a double helix and which contain polynucleotide macromolecules arranged together repeatedly from the nucleotide polymer. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Berdasarkan pada Deoxyribonucleic acid (DNA) manusia adalah terdiri dari 32,20 % atom karbon, 25,43 % atom nitrogen, 6,78 % atom oksigen dan 35,59 % atom hidrogen. Dimana atom karbon, nitrogen, oksigen dan hidrogen banyak tersedia di sekeliling kita dan di atmosfer. Atom-atom ini merupakan bahan baku untuk pembuatan manusia, hewan, jamur, amuba, tumbuhan, bakteri dan arkaea.

IS IT TRUE, ALLAH CREATES ANYTHING THAT IS IN THE SEVEN SKY INDIRECTLY, BUT THROUGH ALLAH'S SPIRIT, ALLAH'S PARTICLES AND ALLAH'S ENERGY

Now, we are still concentrating on dismantling the secret behind the verses: *"... He only says...Be, then it be (Al Mu'min: 40: 68)"...He revealed to each sky its interests...(Fushshilat : 41: 12) "...I... breathed into human my spirit...(Al Hijr : 15: 29)*

Here Allah declares “... *He only says...Be, then it be (Al Mu'min: 40: 68)*

Apparently, Allah's declaration “... *Be, then it be... (Al Mu'min : 40: 68)* is a process that is not direct, but through “... *my spirit... (Al Hijr : 15: 29)* or “...*Allah's spirit...(Al Hijr : 15: 29)*

Now, the question arises,

Why does Allah create something indirectly, but through “... *my spirit... (Al Hijr : 15: 29)* or “...*Allah's spirit...(Al Hijr : 15: 29)*?

The answer is in the secret behind the verse: “...*He revealed to each sky its interests...(Fushshilat : 41: 12)*

So, before anything happens or is created in “...*the seven skys...(Al Mulk: 67: 3)*, Allah has “...*revealed to each sky its interests...(Fushshilat : 41: 12)*

That is, before the creation of stars, planets and moons, Allah has revealed to quarks, which will form atoms, and atoms will build suns, planets and moons, and whatever is in them.

So, in fact, the law of Allah **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)* is the law that first came into effect before the seven skys had Allah.

Or in other words, **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)* - Allah - Allah's energy is the law that makes Allah exist.

This means that **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)* - Allah - Allah's energy, can not be separated.

With the law of **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)*, Allah appears.

Likewise, with the existence of Allah - **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)*, the energy of Allah appears. Without the energy of Allah, there is no being of Allah.

So, with the law of Allah **kun fayakun** “... *Be, then it be (Al Mu'min: 40: 68)* - Allah - Allah's energy, then within a period of time **0.0000000000 0000000000 0000000000 0000000000 001** seconds, quarks are created, which will become the core of the atom.

This means that 1 second is divided by the sum of the digits **10000000000 0000000000 0000000000 0000000000 000.**

Now, when Allah declares “...*He revealed to each sky its interests...(Fushshilat : 41: 12)*, this refers to quarks, which will become the core of atoms, and atoms which will form stars, planets and month, and what is in it.

So, Allah revealed to the quarks that would become the core of the atom, and the atom that would make up the stars, planets and moons, and whatever was in them.

So, Allah revealed to the quarks that will form atoms and atoms that will form stars, planets and moons, and whatever is in them, which is above the expanse of space called the sky.

Or in other words, Allah “...*revealed to each sky its interests... (Fushshilat: 41: 12)*

So, when “*Allah made the seven skys... (Fushshilat: 41: 12)*, it's not like humans make cars and

houses, which are immediately visible, but "*Allah made the seven skys... (Fushshilat: 41: 12)* through the quarks that form atoms. These atoms are next, according to "*...revelations (of Allah)...(Fushshilat: 41: 12)* formed stars, planets and the moon and were above the space called the sky.

Or in other words, "*Allah made the seven skys... (Fushshilat: 41: 12)* through "*...Allah's spirit...(Al Hijr: 15: 29)*, Allah's particle "*...wherever you turn there is the face of Allah...(Al Baqarah : 2: 115)* and Allah's energy "*...the mountain crumble to pieces ...(Al A'raaf : 7: 143)*

Likewise, "*Allah created human from a clot of blood (Al 'Alaq: 96: 2)*.

That is, in "*...blood (Al 'Alaq: 96: 2)* there is "*...Allah's spirit...(Al Hijr: 15: 29)* which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Or in other words, "*Allah created human... (Al 'Alaq: 96: 2)* through sperm from the father's side and eggs from the mother's side, wherein the sperm and eggs contain Deoxyribonucleic acid (DNA). Human DNA is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So, "*Allah created human...(Al 'Alaq: 96: 2)* through quarks, then became carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

Or in other words "*Allah created human...(Al 'Alaq: 96: 2)* through "*...Allah's spirit...(Al Hijr: 15: 29)*

CONCLUSION

From what has been described above we can now conclude that the secret behind the verses: "*... He only says...Be, then it be (Al Mu'min: 40: 68)*" "*...He revealed to each sky its interests...(Fushshilat : 41: 12)* "*...I... breathed into human my spirit...(Al Hijr : 15: 29)*

Here Allah declares "*... He only says...Be, then it be (Al Mu'min: 40: 68)*

Apparently, Allah's declaration "*... Be, then it be... (Al Mu'min : 40: 68)* is a process that is not direct, but through "*... my spirit... (Al Hijr : 15: 29)* or "*...Allah's spirit...(Al Hijr : 15: 29)*
