## ABSTRACT

First, by begging for forgiveness from Allah SWT, here the author tries to reveal the signs of the greatness of Allah SWT regarding paradise is around our house, based on photons, quarks and deoxyribonucleic acid (DNA).

In the Qur'an there are several verses that are the key to unlocking the secrets of paradise is around our house, namely the verses:

*"And hasten to forgiveness from your God and to a paradise that is as wide as the skys and the earth is reserved for those who fear Allah, (Ali 'Imran: 3: 133)*

*"And give good tidings to those who believe and do good, that for them are prepared paradise with rivers flowing in them. Every time they are given sustenance of fruit in those paradise, they say: "This is what was given to us first." They were given similar fruits and for them in them are holy wives and they will abide in them forever. (Al Baqarah: 2: 25)*

*"Then when I have perfected the body and I have breathed on him my spirit, you will fall down and prostrate to him." (Shaad : 38: 72)*

*"And We made a wall in front of them and behind them a wall and We covered them so that they could not see." (Yaasiin: 36: 9)*

In an effort to open the veil about paradise is around our house, the authors based on photons, quarks and deoxyribonucleic acid.

## HYPOTHESES

Here the authors propose the hypothesis that paradise is around our house, based on photons, quarks and deoxyribonucleic acid.

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and

which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## PARADISE IS AROUND OUR HOUSE

Now, we are still concentrating on revealing the secret hidden behind the verse: *"...a paradise that is as wide as the skys and the earth... (Ali 'Imran: 3: 133)*

Now, the question arises,

What exactly does Allah mean by *"...a paradise that is as wide as the skys and the earth... (Ali 'Imran: 3: 133)?*

Well, the answer is, it turns out that paradise is above the expanse of space or what is called the sky where the earth and other planets are above it.

That is, paradise is above the expanse of space as the earth is above it.

Now, because paradise and earth are both above the expanse of space or what is called the sky, then paradise is on earth today.

Now, because paradise is here on earth, paradise is all around our house.

Now another question arises,

Why can't humans see paradise, if indeed paradise is around our house?

Well, the answer is in the secret behind the verse: *"...We made a wall in front of them and behind them a wall and We covered them so that they could not see (Yaasiin: 36: 9)*

That is, the view of the human eye can only see objects that are in the electromagnetic spectrum area between 430 nanometers and 740 nanometers, if an object is below the electromagnetic spectrum area of 430 nanometers or is above the electromagnetic spectrum area of 740 nanometers, then the human eye's view cannot see that thing.

Well, because what lives in heaven is *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, which are below the electromagnetic spectrum area of 430 nanometers and above the electromagnetic spectrum area of 740 nanometers, the human eye cannot see *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, comes out from the body of a

deceased human.

Well, "...*my spirit...*(*Shaad : 38: 72*) or "...*the spirit of Allah...*(*Shaad : 38: 72*) which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, come out of human bodies who have died, gather around humans, around our homes and around cemeteries where humans are buried.

"...*my spirit...*(*Shaad : 38: 72*) or "...*the spirit of Allah...*(*Shaad : 38: 72*) which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, does not leave far away, from the place when it comes out of the body of a deceased human.

As for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, which do not become buildings "...*my spirit...*(*Shaad : 38: 72*) or "...*the spirit of Allah...*(*Shaad : 38: 72*), comes out of the body of a deceased human being, inhaled by living humans and animals, such as oxygen atoms. The carbon atoms sucked up by plants and flowers, which come out of the human body that has died, in the form of carbon dioxide CO<sub>2</sub>. Because the human body, is built with **7 000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, in fact, heaven is a gathering place for "...*my spirit...*(*Shaad : 38: 72*) or "...*the spirit of Allah...*(*Shaad : 38: 72*), that comes out of the bodies of humans who have died, near humans.

If there are still Muslims in the world who still believe that paradise is far away in the sky, that means they don't understand the real paradise.

## CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: "...*a paradise that is as wide as the skys and the earth...* (*Ali 'Imran: 3: 133*)

Now, the question arises,

What exactly does Allah mean by "...*a paradise that is as wide as the skys and the earth...* (*Ali 'Imran: 3: 133*)?

Well, the answer is, it turns out that paradise is above the expanse of space or what is called the sky where the earth and other planets are above it.

That is, paradise is above the expanse of space as the earth is above it.

Now, because paradise and earth are both above the expanse of space or what is called the sky, then paradise is on earth today.

Now, because paradise is here on earth, paradise is all around our house.

Now another question arises,

Why can't humans see paradise, if indeed paradise is around our house?

Well, the answer is in the secret behind the verse: "...*We made a wall in front of them and behind them a wall and We covered them so that they could not see* (*Yaasiin: 36: 9*)

That is, the view of the human eye can only see objects that are in the electromagnetic spectrum

area between 430 nanometers and 740 nanometers, if an object is below the electromagnetic spectrum area of 430 nanometers or is above the electromagnetic spectrum area of 740 nanometers, then the human eye's view cannot see that thing.

Well, because what lives in heaven is *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, which are below the electromagnetic spectrum area of 430 nanometers and above the electromagnetic spectrum area of 740 nanometers, the human eye cannot see *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, comes out from the body of a deceased human.

Well, *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, come out of human bodies who have died, gather around humans, around our homes and around cemeteries where humans are buried.

*"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, does not leave far away, from the place when it comes out of the body of a deceased human.

As for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, which do not become buildings *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)*, comes out of the body of a deceased human being, inhaled by living humans and animals, such as oxygen atoms. The carbon atoms sucked up by plants and flowers, which come out of the human body that has died, in the form of carbon dioxide CO<sub>2</sub>. Because the human body, is built with **7 000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, in fact, heaven is a gathering place for *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)*, that comes out of the bodies of humans who have died, near humans.

If there are still Muslims in the world who still believe that paradise is far away in the sky, that means they don't understand the real paradise.
