ABSTRACT

Before the author writes about paradise, hell and Allah's spirit will disappear, returning to Allah's energy, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secrets about paradise, hell and Allah's spirit will disappear, returning to Allah's energy, based on Deoxyribonucleic acid (DNA)

There are several verses that reveal Allah's secrets about paradise, hell and Allah's spirit will disappear, returning to Allah's energy, namely the verses:

"So when I have perfected the body of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"Those who were before and first from the Muhajirin and Ansar and those who followed them well, Allah was pleased with them and they were pleased with Allah and Allah has prepared for them paradise in which rivers flow forever. They remain in it eternally. That's a big win. (At Taubah: 9: 100)

"And whoever disobeys Allah and His Messenger and violates His provisions, Allah will surely put him in the fire of hell while he will remain in it eternally and for him will be a humiliating punishment. (An Nisaa': 4: 14)

"Allah, there is no God but He Who lives eternally and continues to take care, who does not slumber or sleep. To Him belongs what is in the skys and the earth. No one can intercede with Allah without His permission? Allah knows what is before them and behind them, and they know nothing from the knowledge of Allah except what He wills. Kursi of Allah encompasses the skys and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Exalted Big (Al Baqarah: 2: 255)

In an effort to open the veil covering Allah's secrets about paradise, hell and Allah's spirit will disappear, returning to Allah's energy, the author uses the basis of deoxyribonucleic acid.

HYPOTHESES

Here the author proposes hypothesis paradise, hell and Allah's spirit will disappear, returning to Allah's energy, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 nitrogen atom oxygen and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C)

contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PARADISE, HELL AND ALLAH'S SPIRIT WILL DISAPPEAR, RETURNING TO ALLAH'S ENERGY

So now, we still continue to focus all our thoughts on uncovering the secret hidden behind the verse:
"...Allah has prepared for them paradise in which rivers flow forever. They remain in it eternally...(At Taubah: 9: 100) "...whoever disobeys Allah and His Messenger and violates His provisions, Allah will surely put him in the fire of hell while he will remain in it eternally.. (An Nisaa' : 4: 14)

Well, it turns out that here Allah declared "*...for them paradise ...They remain in it eternally...(At Taubah: 9: 100)*"*...whoever disobeys Allah and His Messenger...Allah will surely put him in the fire of hell while he will remain in it eternally... (An Nisaa' : 4: 14)*

So, now the question arises, who actually goes to paradise and hell?

The answer is in the secret behind the verse: "...*I breathed into Adam my spirit...*(Shaad : 38: 72)

Well, it turns out "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* which goes to paradise and to hell"*...They remain in it eternally...(At Taubah: 9: 100)*

Now another question arises,

What does Allah actually mean "*...They remain in it eternally...(At Taubah: 9: 100)*"?

Well, the answer is behind the secret in the verse: "*Allah, there is no God but He Who lives eternally...*"
(*Al Baqarah: 2: 255*)

Well, it turns out "*...Who lives eternally...(Al Baqarah: 2: 255)* is "*Allah...(Al Baqarah: 2: 255)*

So actually, paradise, hell and "...my spirit...(Shaad : 38: 72) or "...Allah's spirit..(Shaad : 38: 72) is uneternal.

Why paradise, hell and "...*my spirit...*(*Shaad : 38: 72*) or "...*Allah's spirit..*(*Shaad : 38: 72*) is uneternal?

Because paradise, hell and "...*my spirit*...(Shaad : 38: 72) or "...*Allah's spirit*...(Shaad : 38: 72) are built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms .Where these atoms will not be eternal, these atoms have a limited life.

Hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will disappear when the nuclear energy that holds the quarks in the atom is lost. According to human calculations, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will disappear, returning to Allah's energy, after reaching the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, in fact what Allah declared "...for them paradise ...They remain in it eternally...(At Taubah: 9: 100)"...whoever disobeys Allah and His Messenger...Allah will surely put him in the fire of hell...he will remain in it eternally... (An Nisaa': 4: 14) is "...eternal...(At Taubah: 9: 100) according to human calculations with a period of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

Paradise is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Hell is built with hydrogen atoms, as fuel for hell.

Well, this is the secret of Allah, that paradise, hell and "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* lives "*...eternally. ..(At Taubah: 9: 100)* as long as the hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are the building blocks of paradise, hell and "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* has not disappeared.

CONCLUSION

Based on the description above we can conclude that the secret hidden behind the verse: "*...Allah has prepared for them paradise in which rivers flow forever. They remain in it eternally...(At Taubah: 9: 100)* "*...whoever disobeys Allah and His Messenger and violates His provisions, Allah will surely put him in the fire of hell while he will remain in it eternally... (An Nisaa' : 4: 14)*

Well, it turns out that here Allah declared "*...for them paradise ...They remain in it eternally...(At Taubah: 9: 100)*" "*...whoever disobeys Allah and His Messenger...Allah will surely put him in the fire of hell while he will remain in it eternally... (An Nisaa' : 4: 14)*

So, now the question arises, who actually goes to paradise and hell?

The answer is in the secret behind the verse: "*...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* which goes to paradise and to hell "*...They remain in it eternally...(At Taubah: 9: 100)*

Now another question arises,

What does Allah actually mean "*...They remain in it eternally...(At Taubah: 9: 100)*?

Well, the answer is behind the secret in the verse: "*Allah, there is no God but He Who lives eternally...(Al Baqarah: 2: 255)*

Well, it turns out "*...Who lives eternally...(Al Baqarah: 2: 255)* is "*Allah...(Al Baqarah: 2: 255)*

So actually, paradise, hell and "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* is uneternal.

Why paradise, hell and "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* is uneternal?

Because paradise, hell and "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit..(Shaad : 38: 72)* are built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms .Where these atoms will not be eternal, these atoms have a limited life.

Hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will disappear when the nuclear energy that holds the quarks in the atom is lost. According to human calculations, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will disappear, returning to Allah's energy, after reaching the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, in fact what Allah declared "*...for them paradise ...They remain in it eternally...(At Taubah: 9: 100)*" "*...whoever disobeys Allah and His Messenger...Allah will surely put him in the fire of hell...he will*

remain in it eternally... (An Nisaa' : 4: 14) is *"...eternal...(At Taubah: 9: 100)* according to human calculations with a period of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

Paradise is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Hell is built with hydrogen atoms, as fuel for hell.

Well, this is the secret of Allah, that paradise, hell and *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit..(Shaad : 38: 72)* lives *"...eternally. ..(At Taubah: 9: 100)* as long as the hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are the building blocks of paradise, hell and *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit..(Shaad : 38: 72)* has not disappeared.
