ABSTRACT

Before the author wrote about Prophets Ibrahim, Ismail, Isaac were born from haplogroup J which was the ancestors of the Jews, which was formed 25,000 years ago in the border area between Saudi Arabia, Jordan and Egypt, has nothing to do with Arabs and Sundanese, first of all The author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers Allah's secret regarding Prophets Ibrahim, Ismail, Isaac were born from haplogroup J which was the ancestors of the Jews, which was formed 25,000 years ago in the border area between Saudi Arabia, Jordan and Egypt, has nothing to do with Arabs and Sundanese, based on deoxyribonucleic acid (DNA)

There are several verses that reveal Allah's secrets regarding Prophets Ibrahim, Ismail, Isaac were born from haplogroup J which was the ancestors of the Jews, which was formed 25,000 years ago in the border area between Saudi Arabia, Jordan and Egypt, has nothing to do with Arabs and Sundanese, namely the verses:

"Indeed, We created Adam, then We formed Adam's body, then We said to the angels: "Prostrate yourself to Adam", so they bowed down except the devil. He is not among those who prostrate. (Al A'raaf: 7: 11)

"Indeed, We have given revelations to you as We have given revelations to Noah and the subsequent prophets, and We have given revelations to Abraham, Isma'il, Isaac, Jacob and his descendants, Isa, Ayyub, Yunus, Harun and Solomon. And We gave Zabur to David. (An Nisaa' : 4: 163)

"And (We have also sent) Luth (to his people). (Remember) when he said to them: "Why are you doing those faahisyah deeds, which no one (in this world) has ever done before you?" (Al A'raaf : 7: 80)

"And indeed We have bestowed favors on Moses and Harun. (Ash Shaaffaat : 37: 114)

"...Idris (the one) in the Koran. Indeed, he was a very righteous man and a prophet. (Maryam : 19:56)

"...Ibrahim was afraid of them. They said: "Don't be afraid", and they gave him the good news of a pious son (Isaac) (Adz Dzaariyaat: 51: 28)

"Ibrahim said: "Did you give me good news even though I was old, then in what way did you give this good news?" (Al Hijr : 15: 54)

In an effort to open the veil of Allah's secret regarding Prophets Ibrahim, Ismail, Isaac were born from haplogroup J which was the ancestors of the Jews, which was formed 25,000 years ago in the border area between Saudi Arabia, Jordan and Egypt, has nothing to do with Arabs and Sundanese, the author uses deoxyribonucleic acid.

HYPOTHESES

Here the author proposes the hypothesis that Prophets Ibrahim, Ismail, Isaac were born from haplogroup J which was the ancestors of the Jews, which was formed 25,000 years ago in the border area between Saudi Arabia, Jordan and Egypt, has nothing to do with Arabs and Sundanese, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PROPHETS IBRAHIM, ISMAIL, ISAAC WERE BORN FROM THE HAPLOGROUP J WHICH WAS THE ANCESTORS OF THE JEWS, WHICH WAS FORMED 25,000 YEARS AGO IN THE BORDER AREA BETWEEN SAUDI ARABIA, JORDAN AND EGYPT, HAS NOTHING TO DO WITH ARABS AND SUNDANESE

So now, we are still concentrating our minds on uncovering the secrets contained behind the verses: *"...We have given revelations to Noah and the subsequent prophets, and We have given revelations to Abraham, Isma'il, Isaac, Jacob and his descendants, Isa, Ayyub, Yunus, Harun and Solomon. And We gave Zabur to David. (An Nisaa' : 4: 163)"...Idris...(Maryam : 19:56) "...Luth...(Al A'raaf :7: 80)"...Moses and Harun (Ash Shaaffaat : 37: 114)*

Well, it turns out, almost 98% of the prophets were descendants of Jews from Prophet Idris to Prophet Isa.

Now, these Jews were born from haplogroup J, which is the ancestor of the Jewish people (Familytreedna).

Haplogroup J was formed 25,000 years ago, in the border area between Saudi Arabia, Jordan and Egypt (Familytreedna)

The Jewish ancestors of haplogroup J who came from the border between Saudi Arabia and Jordan emigrated to Ur in Iraq, and to Egypt, around 2000-1500 BC.

Where in Ur the Prophet Ibrahim was born and in Egypt the Prophet Moses was born.

From Ur, before being appointed as a Prophet, Ibrahim, together with Terach, Ibrahim's father, went out of Ur to Harran, which is located on the border between Syria and Turkey.

After that, Ibrahim and his wife Sarah went to Egypt, working with Pharaoh. When a disaster struck Egypt, Sarah and Ibrahim left Egypt and in Egypt, Ibrahim got the Egyptian woman Hajar.

Then Abraham's family left Egypt and headed to Canaan, where in Canaan there were Canaanites and Palestinians. Here Abraham is a migrant from Ur who entered Canaan.

So, when Ibrahim was appointed as a Prophet, at the age of 85 he still had no children, Sarah decided to marry Hajar to Prophet Ibrahim. Because Sarah doesn't have children yet.

A year later, when the prophet Ibrahim was 86, Ismail was born.

Sarah has no children yet.

But 13 years later angels came to the Prophet Ibrahim *"...they gave him the good news of a pious son (Isaac) (Adz Dzariyaat: 51: 28)*

A year later, after Ismail was 14 years old, Ismail had a brother, Isaac, who was born to Sarah when Prophet Ibrahim was 100 years old.

So now, the question arises, which haplogroup do Arabs and Sundanese come from?

Well, it turns out that Arabs were born from haplogroup J1 which was formed around 10 000 years ago in Syria, Lebanon, Jordan, Palestine and on the Arabian Peninsula (National Geographic Genetic Project) (FamilyTreeDNA).

Meanwhile, Sundanese people born from haplogroup F-F14885, descendants of F-M89, formed 45,000 years ago in the Middle East, gave birth to descendants who now live in Saudi Arabia, Yemen, Oman, UAE, Qatar, Bahrain, Kuwait, Iraq, Iran and India (FamilyTreeDNA).

So, now, if the followers of Jesus and the Jews think that Imail was not a Jew, because Hajar was a woman from Egypt, then the opinion of the followers of Jesus and the Jews is wrong. Because, in Egypt there are many descendants of Jews, from haplogroup J. Because before being appointed as a Prophet, Abraham worked in Egypt with Pharaoh, and in Egypt, Ibrahim got Hajar, then she was taken to Canaan.

So, if Ismail has a wife, whether the wife is a Jewish woman or not, if you look at the YDNA haplogroup J, then Ismail's descendants will be Jews on the father's side.

So, for this reason, if there are followers of Jesus and Jews, assuming that Muslim Arabs are descendants of Ismail, a Jew, from YDNA haplogroup J, is not correct.

So, if there are followers of Jesus and Jews who think that a Muslim is dismantling the ideology of the Jewish Torah scrolls, he is considered, as the jealous descendants of Ismail, because he is not considered a Jew, then the thoughts and assumptions of the followers of Jesus and the Jews are completely wrong.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: *"...We have given revelations to Noah and the subsequent prophets, and We have given revelations to Abraham, Isma'il, Isaac, Jacob and his descendants, Isa, Ayyub, Yunus, Harun and Solomon. And We gave Zabur to David. (An Nisaa' : 4: 163)"...Idris...(Maryam : 19:56) "...Luth...(Al A'raaf :7: 80)"...Moses and Harun (Ash Shaaffaat : 37: 114)*

Well, it turns out, almost 98% of the prophets were descendants of Jews from Prophet Idris to Prophet Isa.

Now, these Jews were born from haplogroup J, which is the ancestor of the Jewish people (Familytreedna).

Haplogroup J was formed 25,000 years ago, in the border area between Saudi Arabia, Jordan and Egypt (Familytreedna)

The Jewish ancestors of haplogroup J who came from the border between Saudi Arabia and Jordan emigrated to Ur in Iraq, and to Egypt, around 2000-1500 BC.

Where in Ur the Prophet Ibrahim was born and in Egypt the Prophet Moses was born.
