## ABSTRACT

Before the author writes about the Hajar Asswad or black stone, which there is the spirit of Allah, is the split of a dead star, which attracted by earth's gravity, because paradise is on earth, then Muslims assumes, Hajar Asswad comes from paradise, the autgor first begs forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of the Hajar Asswad or black stone, which there is the spirit of Allah, is the split of a dead star, which attracted by earth's gravity, because paradise is on earth, then Muslims assumes, Hajar Asswad comes from paradise, based on to Deoxyribonucleic acid (DNA)

There are a number of verses that become Allah's secret about the Hajar Asswad or black stone, which there is the spirit of Allah, is the split of a dead star, which attracted by earth's gravity, because paradise is on earth, then Muslims assumes, Hajar Asswad comes from paradise, namely the following verses:

*"Then when I have perfected the body and I have breathed on him my spirit, then you will fall down prostrating to him." (Shaad: 38: 72)*

*"Who has created the seven skys in layers. You never see in the creation of God the Most Gracious something that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)*

*"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Surely Allah is All-Wise, All-Knowing. (Al Baqarah: 2: 115)*

*"So He made seven skys in two days. He revealed to each sky its affairs. And We decorated the near sky with brilliant stars and We took care of it in the best way. Such is the provision of the Almighty, All-Knowing. (Fushshilat) :41:12)*

*"God created the skys and the earth with haq (right). Indeed, in that there are signs of God's power for the believers (Al 'Ankabuut: 29: 44)*

In an effort to open the veil of Allah's secret about the Hajar Asswad or black stone, which there is the spirit of Allah, is the split of a dead star, which attracted by earth's gravity, because paradise is on earth, then Muslims assumes, Hajar Asswad comes from paradise, the author uses an acid base deoxyribonucleate.

## HYPOTHESIS

Here the author proposes the hypothesis that the Hajar Asswad or black stone, which there is the spirit of Allah, is the split of a dead star, which attracted by earth's gravity, because paradise is on earth, then Muslims assumes, Hajar Asswad comes from paradise, based on Deoxyribonucleic acid (DNA). )

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20 % atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

**THE HAJAR ASSWAD OR THE BLACK STONE, WHICH THERE IS THE SPIRIT OF ALLAH, IS THE SPLIT OF A DEAD STAR, WHICH ATTRACTED BY EARTH'S GRAVITY, BECAUSE PARADISE IS ON EARTH, THEN MUSLIM ASSUMES, HAJAR ASSWAD COMES FROM PARADISE**

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"...He made seven skys...and...decorated the near sky with brilliant stars...(Fushshilat: 41: 12)" ...I breathed into human my spirit...(Shaad : 38: 72)*

Apparently, here Allah or Jahve or Adonai declares to all mankind, *"...He made seven skys...and...decorated the near sky with brilliant stars...(Fushshilat: 41: 12)*

Well, it turns out that in the *"...the near sky...(Al Mulk : 67: 5)* there are 100 000 000 000 galaxies, each galaxy consisting of 150 100 000 stars.

In the Milky Way galaxy, where the sun, earth, moon and other planets exist, there are about 150 100 000 stars.

When a star has reached the end of its age, some die by exploding, if the star's mass is greater than the sun's mass. However, if a star has the same mass as the sun's mass or less than the sun's mass, then when the star dies, it does not explode, but instead shrinks, without light, because the hydrogen

atoms and helium atoms, which make up the star's fuel, run out.

If a star has a mass of at least five times that of the sun, then when the star dies, it will explode, which is called a supernova.

Now, the material that contains, ferrum or iron atoms, or carbon, hydrogen atoms, that is ejected from this exploding star, or this supernova, reaches the earth, and is pulled by the earth's gravity.

Well, one of the materials that reached Earth from the shards of an exploding star or supernova is Hajar Asswad or black stone.

Well, because paradise is on earth, most Muslims think Hajar Asswad or black stone came from paradise.

Indeed, Hajar Asswad is from paradise, on earth, because Hajar Asswad, or black stone, comes from the split of an exploding star or supernova, then it is attracted by the earth's gravity.

Well, in this Hajar Asswad or black stone, it contains *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai, which is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

That is, in the Hajar Asswad there are carbon atoms, hydrogen atoms and ferrum atoms.

So, in fact, Hajar Asswad, which is placed in the eastern corner of the Kaaba, 1.5 meters from the ground, is not worshiped, as most followers of Jesus think, who consider Hajar Asswad or Black Stone, to be worshiped by Muslims.

When the Prophet Muhammad saw kissed Hajar Asswad or the black stone, it was not because the Prophet Muhammad saw worshiped Hajar Asswad or black stone, but because inside Hajar Asswad or black stone was *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai, as *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai which is in the body of the Prophet Muhammad saw and in all human bodies living on earth.

That is, humans and Hajar Asswad or the black stone have a kinship through *"...my spirit...(Shaad : 38: 72)* or *"...the spirit of Allah...(Shaad : 38: 72)* or the spirit of Jahve or the spirit of Adonai.

Well, this is what almost all people in the world do not understand, including the followers of Jesus in the world, and most Muslims in the world.

## CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"...He made seven skys...and...decorated the near sky with brilliant stars...(Fushshilat: 41: 12)" ...I breathed into human my spirit...(Shaad : 38: 72)*
