ABSTRACT

Before the author writes about through what Allah sees, Allah's secret is revealed, the author first asked forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of through what Allah sees, Allah's secret is revealed, based on deoxyribonucleate (DNA).

There are several verses that reveal Allah's secrets regarding through what Allah sees, Allah's secret is revealed, namely the following verses:

"Allah...the light of the sky and the earth...Light above light...(An Nuur : 24: 35)

"So when I have perfected the body of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"...We have decorated the sky, which is near, with stars...(Al Mulk: 67: 5)

"Who has created the seven skys in layers. You do not see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

In an effort to open the veil of Allah's secrets about how Allah sees, Allah's secrets are revealed, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis through what Allah sees, Allah's secret is revealed, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen

bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

THROUGH WHAT ALLAH SEES, ALLAH'S SECRET IS REVEALED

So now, we still continue to concentrate our minds on uncovering the secret contained behind the verse: *"Allah...the light of the sky and the earth...Light above light...(An Nuur : 24: 35) "...I breathed into Adam my spirit...(Shaad : 38: 72)*

Here Allah declares *"Allah...the light of the sky and the earth...Light above light...(An Nuur : 24: 35)*

Now, the question arises,

What does Allah actually mean by *"Allah...the light of the sky and the earth...(An Nuur: 24: 35)?*

The answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out *"...the light of Allah...(An Nuur: 24: 35)* is *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)*

Where *"...the light of Allah...(An Nuur: 24: 35)* which is born through *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* in the form of hydrogen atoms, which are the fuel of the sun and the fuel of billions of stars in the universe.

Without *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* in the form of hydrogen atoms, there would be no sun and there would be no billions "...the stars...(Al Mulk: 67: 5) in the universe, which emits light.

Well, by colliding hydrogen atoms with each other, which form helium atoms, in the sun and in the billions of stars in the universe, energy emerges, which is carried by photons, which become rays of light, which come out of the sun and from billions of stars in the universe.

Well, *"...the light of Allah...Light above light...(An Nuur: 24: 35)* can be proven empirically, that *"...the light of Allah...(An Nuur: 24: 35)* is *"...Light above light...(An Nuur : 24: 35).*

Where *"...Light above light...(An Nuur: 24: 35)* or layer of light which is the energy carried by photons from the sun and from billions of stars in the universe.

Based on color, it can be seen that light is differentiated into various layers of light.

The layer of red light in the electromagnetic spectrum is between 625 and 740 nanometers.
The orange layer of light in the electromagnetic spectrum is between 590 and 625 nanometers.

The yellow layer of light in the electromagnetic spectrum is between 565 and 590 nanometers.

The green layer of light in the electromagnetic spectrum is between 520 to 565 nanometers.

The blue layer of light in the electromagnetic spectrum is between 450 and 520 nanometers.

Indigo light layers in the electromagnetic spectrum between 430 and 450 nanometers.

The purple layer of light in the electromagnetic spectrum is between 380 and 430 nanometers.

Well, 7 layers of light, which are "*...Light above light...(An Nuur: 24: 35)*", which comes from "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" in the form of hydrogen atoms.

So, in fact, Allah sees through "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" in the form of hydrogen atoms in "*.. seven skys...(Al Mulk: 67: 3)*" and which is in every human body.

So, now, if there are still many Muslims who think that Allah sees from a distant place, or from a place outside the earth, then that assumption is not true.

Why is this assumption not true?

Because Allah sees through "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" in the form of hydrogen atoms in "*...seven skys...(Al Mulk: 67: 3)*" and which is in every human body.

Well, if every Muslim understands the real Allah, through Allah's form, in the form of Allah's energy, in the form of Allah's particles and in the form of "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*", then you will understand that Allah actually sees through "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" in the form of hydrogen atoms which are in "*...seven skys...(Al Mulk: 67: 3)*" are also in every human body.

Or in other words, Allah sees through "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" in the form of hydrogen atoms that are in every human body.

CONCLUSION

Based on the description above, we can conclude that the secret contained behind the verse:

"Allah...the light of the sky and the earth...Light above light...(An Nuur : 24: 35) "...I breathed into Adam my spirit...(Shaad : 38: 72)

Here Allah declares "*Allah...the light of the sky and the earth...Light above light...(An Nuur : 24: 35)*
