ABSTRACT

First, by asking forgiveness from Allah SWT, here the author tries to reveal the signs of Allah SWT's greatness regarding what form rewards are required by Allah's spirit in paradise, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about what form rewards are required by Allah's spirit in paradise, namely the verses:

"So when I have perfected the body of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"In paradise there is plenty of fruit for you, some of which you can eat. (Az Zukhruf: 43: 73)

"The paradise of 'Adn which they enter, has rivers flowing beneath it, in paradise which they get everything they desire. Thus Allah rewards those who are pious, (An Nahl: 16: 31)

In an effort to uncover the veil of Allah's secret regarding what form rewards are required by Allah's spirit in paradise, the author uses the basis of deoxyribonucleic acid.

HYPOTHESES

Here the author proposes a hypothesis of what form of reward is needed by God's spirit in heaven, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 nitrogen atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHAT FORM REWARDS ARE REQUIRED BY ALLAH'S SPIRIT IN PARADISE

So now, we still continue to focus all our thoughts on uncovering the secret hidden behind the verses: *"The paradise of 'Adn which they enter, has rivers flowing beneath it, in paradise which they get everything they desire...(An Nahl: 16: 31) "In paradise there is plenty of fruit...(Az Zukhruf: 43: 73)*

Well, here Allah declares *"The paradise of 'Adn which they enter, has rivers flowing beneath it, in*

paradise which they get everything they desire...(An Nahl: 16: 31) "In paradise there is plenty of fruit... (Az Zukhruf: 43: 73)

Well, the question arises,

Who exactly does Allah mean by *"... they enter The paradise of 'Adn...(An Nahl: 16: 31)?*

The answer is hidden behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out, what Allah means by *"... they enter The paradise of 'Adn...(An Nahl: 16: 31)* is *"...my spirit...(Shaad: 38: 72)* or *" ...Allah's spirit...(Shaad : 38: 72)* which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which *"...enter The paradise of 'Adn...(An Nahl: 16: 31)*

So, actually, *"...my spirit...(Shaad: 38: 72)* or *" ...Allah's spirit...(Shaad : 38: 72)* which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen, who will live in *"The paradise of 'Adn... has rivers flowing beneath it, in paradise which they get everything they desire...(An Nahl: 16: 31)* *"...there is plenty of fruit...(Az Zukhruf: 43: 73)*

Another question arises,

What is actually in *"...rivers...(An Nahl: 16: 31)* and what is in *"...everything they desire...(An Nahl: 16: 31)* *"...there is plenty of fruit...(Az Zukhruf: 43: 73)?*

The answer is,

In *"...rivers...(An Nahl: 16: 31)* there is water, in the water contains hydrogen atoms and oxygen atoms.

Likewise in *"...everything they desire...(An Nahl: 16: 31)"...there is plenty of fruit...(Az Zukhruf: 43: 73)*, where in *"...fruits...(Az Zukhruf: 43: 73)* contain carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

So, Allah gives reward to *"...my spirit...(Shaad: 38: 72)* or *" ...Allah's spirit...(Shaad : 38: 72)* which is in *"The paradise of 'Adn...(An Nahl: 16: 31)* in the form of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Well, it turns out that the rewards given by Allah are in the form of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which are needed by Allah's spirit in *"...The paradise of 'Adn... (An Nahl: 16: 31)*

Well, this is something that most Muslims in the world still don't understand.

CONCLUSION

Based on the description above we can conclude that the secret hidden behind the verses: *"The paradise of 'Adn which they enter, has rivers flowing beneath it, in paradise which they get everything they desire...(An Nahl: 16: 31) "In paradise there is plenty of fruit...(Az Zukhruf: 43: 73)*

Well, here Allah declares *"The paradise of 'Adn which they enter, has rivers flowing beneath it, in paradise which they get everything they desire...(An Nahl: 16: 31) "In paradise there is plenty of fruit... (Az Zukhruf: 43: 73)*

Well, the question arises,

Who exactly does Allah mean by "*... they enter The paradise of 'Adn...(An Nahl: 16: 31)?*"

The answer is hidden behind the verse: "*...I breathed into Adam my spirit...(Shaad : 38: 72)*"

Well, it turns out, what Allah means by "*... they enter The paradise of 'Adn...(An Nahl: 16: 31)*" is "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad : 38: 72)*" which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which "*...enter The paradise of 'Adn...(An Nahl: 16: 31)*"

So, actually, "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad : 38: 72)*" which is built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen, who will live in "*The paradise of 'Adn... has rivers flowing beneath it, in paradise which they get everything they desire...(An Nahl: 16: 31)*" "*...there is plenty of fruit...(Az Zukhruf: 43: 73)*"

Another question arises,

What is actually in "*...rivers...(An Nahl: 16: 31)*" and what is in "*...everything they desire...(An Nahl: 16: 31)*" "*...there is plenty of fruit...(Az Zukhruf: 43: 73)?*"

The answer is,

In "*...rivers...(An Nahl: 16: 31)*" there is water, in the water contains hydrogen atoms and oxygen atoms.

Likewise in "*...everything they desire...(An Nahl: 16: 31)*" "*...there is plenty of fruit...(Az Zukhruf: 43: 73)*", where in "*...fruits...(Az Zukhruf: 43: 73)*" contain carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

So, Allah gives reward to "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad : 38: 72)*" which is in "*The paradise of 'Adn...(An Nahl: 16: 31)*" in the form of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Well, it turns out that the rewards given by Allah are in the form of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which are needed by Allah's spirit in "*...The paradise of 'Adn...(An Nahl: 16: 31)*"

Well, this is something that most Muslims in the world still don't understand.
