ABSTRACT

Before the author writes about is it true that the most Muslims in the world believe that Allah's spirit exits the human body when they are sleeping, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil covering the secret of is it true that the most Muslims in the world believe that Allah's spirit exits the human body when they are sleeping, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about is it true that the most Muslims in the world believe that Allah's spirit exits the human body when they are sleeping, namely the verses:

"Allah holds the soul when a human dies and the soul that has not yet died while a human is sleeping, He holds the soul that He has ordained for human death and He releases the other soul until the appointed time. Verily in this there are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"Angels and spirits ascend to God one day is worth fifty thousand years (Al Ma'aarij :70:4)

"So when I have perfected the events of Adam and breathed into Adam my spirit, then you should fall down and prostrate yourself to him (Shaad: 38: 72)

"He regulates affairs from sky to earth, then ascends to Him in one day which is worth a thousand years according to your calculations (As Sajdah: 32:5)

In an effort to uncover is it true that the most Muslims in the world believe that Allah's spirit exits the human body when they are sleeping, the author relies on deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis is it true that the most Muslims in the world believe that Allah's spirit exits the human body when they are sleeping, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Berdasarkan asam deoksiribonukleat (DNA) manusia, terdiri dari 32,20% atom karbon, 25,43% atom nitrogen, 6,78% atom oksigen, dan 35,59% atom hidrogen. Dimana atom Karbon, nitrogen, oksigen dan hidrogen banyak terdapat di sekitar kita dan di atmosfer.

IS IT TRUE THAT THE MOST MUSLIMS IN THE WORLD BELIEVE THAT THE SPIRIT OF ALLAH EXITS THE HUMAN BODY WHEN THEY ARE SLEEPING

So now, we are still concentrating our minds on uncovering the secret stored in the verse: *"Allah holds the soul when a human dies and the soul that has not yet died while a human is sleeping, He holds the soul that He has ordained for human death and He releases the other soul until the appointed time... (Al An'aam: 6: 9)*

Well, here Allah declares *"Allah holds the soul when a human dies...(Al An'aam: 6: 9)*

Now the question arises,

What does Allah really mean by *"...the soul...(Al An'aam: 6: 9)*

Well, the answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

So it turns out, what Allah means by *"...the soul...(Al An'aam: 6: 9)* is *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)*

This means, *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* is the source of life for humans and is the building block of Deoxyribonucleic acid (DNA) where humans based on DNA consist of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

This is the true secret of Allah, which most Muslims throughout the world do not yet understand, so that the belief arises that *"...the soul...(Al An'aam: 6: 9)* of human comes out of the human body, when human is sleeping.

Where this belief is an incorrect belief.

So now, when *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is in the human body, conveys information to Allah via frequency waves with the speed of light **109 502 073 292.0968** km per second, that the condition of the human body is no longer able to maintain life, then Allah, wherever the human is, even though in fact, Allah is in every human body, decides by means of frequency waves with speed of light **5 475 103 664 604.84** km per second holding *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* through the stopping of oxygen atoms which is the source of human life. In just a few seconds, without oxygen atoms as a source of

human life, the body's functions can no longer function, which ultimately causes the entire body to become paralyzed and die.

Why did Allah stop the oxygen atom?

Because the oxygen atom is one of the atoms that builds "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)*

So, by stopping the oxygen atom means "*...He holds the soul that He has ordained for human death ... (Al An'aam: 6: 9)*

The living remains "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* which will come out of the body of the dead between 2 and 30 days of being buried in the ground.

So, actually, "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* does not come out of the human body, when humans are sleeping, not like Most Muslims around the world believe, "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* comes out of the human body, when humans are sleeping .

"*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* continues to exist in the human body, until the human dies.

CONCLUSION

Based on the description above, we can conclude that the secret stored in the verse: "*Allah holds the soul when a human dies and the soul that has not yet died while a human is sleeping, He holds the soul that He has ordained for human death and He releases the other soul until the appointed time...(Al An'aam: 6: 9)*
