## ABSTRACT

Before I write about the problem of Allah's spirit, soul and mind, I first ask forgiveness from Allah SWT. Here the author tries to open the veil that covers the secrets of Allah's spirit, soul and inner from the point of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about Allah's spirit, soul and inner, namely the following verses:

*"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)*

*"So when I have perfected the event, and have breathed My spirit into it, then submit to it prostrating yourselves (Al Hijr: 15:29)*

*"... Isa, the son of Maryam, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4: 171)*

*"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)*

*"Have you not seen that Allah has subjected to you what is in the heavens and what is in the earth and has perfected for you His blessings both outwardly and inwardly. And among mankind there are those who dispute about Allah without knowledge or guidance and without an enlightening Book. (Luqman: 31:20)*

In an effort to open the veil of Allah's secret about Allah's spirit, my soul and inner use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I put forward the hypothesis that Allah's spirit is not a soul and not a inner seen from the basic point of Deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains

1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## ALLAH'S SPIRIT, SOUL AND INNER

Now, we still focus our minds to reveal the secret hidden behind the verse: "*...I...blow into it my spirit... (Al Hijr: 15: 29)*" and the verse: "*Allah holds the soul when it dies and the soul that hasn't died in its sleep... (Az Zumar: 39: 42)*" and verse: "*... Allah has... perfected for you His blessings outwardly and inwardly... (Luqman: 31: 20)*"

Well here, "*Allah holds the soul when it dies... (Az Zumar: 39: 42)*" shows the soul to "*... My spirit... (Al Hijr: 15: 29)*"

Now that, the soul according to Allah, is not the same as the soul according to human.

The soul or nafs according to human understanding is human behavior.

So the understanding of the soul which is equated with nafs is to show human behavior.

As for the inner, it is something invisible to the human eye. Because the human eye has limited vision. Where the human eye can only see light in the electromagnetic spectrum region between 430 and 740 nanometers.

If the light rays in the electromagnetic spectrum area are below 430 nanometers and the light in the electromagnetic spectrum area is above 740 nanometers, then the light rays are invisible to the human eye.

Or in other words, the ray of light is the inner.

As for the spirit of Allah "*...I breathed into him my spirit... (Shaad: 38:72)*" is Deoxyribonucleic acid (DNA). Where according to Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

## ALLAH'S SPIRIT IS NOT THE SAME WITH THE SOUL AND ALSO NOT THE SAME WITH THE INNER

Now, if someone says: "**I will purify my soul**", it means that that person will behave in a good manner that does not violate applicable laws and regulations.

Likewise, if there are people who say: "**I will build physically and mentally to obtain eternal happiness**". This means that here the person will build good behavior or behavior in order to get happiness in his life.

So here the soul and inner are not something that can be purified.

Why can't the soul and inner be purified?

The answer is

Because the soul and the inner are not "*...my spirit... (Shaad: 38:72)*"

While the holy is "*... my spirit... (Shaad: 38: 72)*"

So if there are people who want to purify the soul and inner, it is directed to behavior so that it becomes good.

## CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: "*...I...blow into it my spirit... (Al Hijr: 15: 29)*" and the verse: "*Allah holds the soul when it dies and the soul that hasn't died in its sleep... (Az Zumar: 39: 42)*" and verse: "*... Allah has... perfected for you His blessings outwardly and inwardly... (Luqman: 31: 20)*"

Well here, "*Allah holds the soul when it dies... (Az Zumar: 39: 42)*" shows the soul to "*... My spirit... (Al Hijr: 15: 29)*"

Now that, the soul according to Allah, is not the same as the soul according to human.
