ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about why Allah is not sleepy and does not sleep based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an there is a verse that is the key to unlocking the secret of why Allah is not sleepy and does not sleep, namely the verse:

"Allah, there is no Allah (who has the right to be worshiped) but He Who Lives eternally and continuously takes care of (His creatures); is not sleepy and does not sleep. To Him belongs whatever is in the heavens and the earth... Allah's seat covers the heavens and the earth. Earth... (Al Baqarah : 2:255)

"Allah is the light of the heavens and the earth....Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24:35)

In my attempt to unmask why Allah is not sleepy and does not sleep based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis why Allah is not sleepy and does not sleep because Allah is the light of the heavens and the earth based on photons, quarks and Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building

blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE EARTH ROTATES ON ITS AXIS AROUND THE SUN

Now, we focus on uncovering the secret behind the verse: *"...His is what is in the heavens and the earth...God's seat covers the heavens and the earth...(Al Baqarah: 2:255)*

Apparently, now it was revealed that *"Allah is the light of the heavens and the earth.... Light on the light (in layers)...(An Nuur: 24: 35) "... covers the heavens and the earth...(Al Baqarah: 2:255)*

The earth that surrounds the sun, where the layer of Allah's light through the waves of the sun's light illuminates our earth.

When the earth rotates and turns its back to the sun, the surface of the earth that is not facing the sun becomes dark because it is not illuminated by a layer of Allah's light.

While the surface of the earth facing the sun is completely illuminated by a layer of Allah's light.

So, the part of the earth's surface that is facing away from the sun becomes dark. The part of the earth's surface that faces the sun remains brightly lit by a layer of Allah's light.

THE EARTH'S SURFACE WHICH BACKS THE SUN BECOMES DARK BECAUSE THERE'S NO ALLAH'S LIGHT LAYER AND HUMAN IN SLEEP

Now, we dig and uncover the secret behind the verse: *"...He Who Lives eternally again continuously takes care of (His creatures); does not sleep and does not sleep... (Al Baqarah: 2:255)*

Well it turns out, it was revealed, where the light of Allah's layer continues to illuminate the earth and sky, while those who sleep are humans who live on the surface of the earth with their backs to the sun that emits layers of Allah's light.

So, here it is clear, that sleeping is humans while the layers of Allah's light continue to illuminate the earth and sky around it.

Or in other words *"Allah,...not sleepy and not sleeping...(Al Baqarah: 2:255)* because *"Allah is the light of the heavens and the earth....Light upon light (in layers)...(An Nuur: 24:35)*

ALLAH IS NOT SLEEPY AND DOES NOT SLEEP

Well, because Allah's layer of light continues to illuminate the earth and the sky around it, while those who sleep are humans who live on the surface of the earth with their backs to the sun which is not illuminated by Allah's light layer.

Now it is revealed what is the secret behind the verse: *"Allah,...is not sleepy and does not sleep...(Al Baqarah: 2:255)* because *"Allah is the light of the heavens and the earth....Light above the light (in layers).)...(An Nuur: 24:35)*

Because the layer of Allah's light continues to illuminate the earth and the sky around it, while those who sleep are humans who live on the surface of the earth with their backs to the sun which is not illuminated by the layers of Allah's light.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"...His is what is in the heavens and the earth...God's seat covers the heavens and the earth...(Al Baqarah: 2:255)*

Apparently, now it was revealed that *"Allah is the light of the heavens and the earth.... Light on the light (in layers)...(An Nuur: 24: 35) "... covers the heavens and the earth...(Al Baqarah: 2:255)*

The earth that surrounds the sun, where the layer of Allah's light through the waves of the sun's light illuminates our earth.

When the earth rotates and turns its back to the sun, the surface of the earth that is not facing the sun becomes dark because it is not illuminated by a layer of Allah's light.

While the surface of the earth facing the sun is completely illuminated by a layer of Allah's light.

So, the part of the earth's surface that is facing away from the sun becomes dark. The part of the earth's surface that faces the sun remains brightly lit by a layer of Allah's light.

Now, we dig and uncover the secret behind the verse: *"...He Who Lives eternally again continuously takes care of (His creatures); does not sleep and does not sleep... (Al Baqarah: 2:255)*

Well it turns out, it was revealed, where the light of Allah's layer continues to illuminate the earth and sky, while those who sleep are humans who live on the surface of the earth with their backs to the sun that emits layers of Allah's light.

So, here it is clear, that sleeping is humans while the layers of Allah's light continue to illuminate the earth and sky around it.

Or in other words *"Allah,...not sleepy and not sleeping...(Al Baqarah: 2:255)* because *"Allah is the light of the heavens and the earth....Light upon light (in layers)...(An Nuur: 24:35)*

Well, because Allah's layer of light continues to illuminate the earth and the sky around it, while those who sleep are humans who live on the surface of the earth with their backs to the sun which is not illuminated by Allah's light layer.

Now it is revealed what is the secret behind the verse: *"Allah,...is not sleepy and does not sleep...(Al Baqarah: 2:255)* because *"Allah is the light of the heavens and the earth....Light above the light (in layers).)...(An Nuur: 24:35)*

Because the layer of Allah's light continues to illuminate the earth and the sky around it, while those who sleep are humans who live on the surface of the earth with their backs to the sun which is not illuminated by the layers of Allah's light.
