ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding seven hundred times the reward of pleasure in the afterlife based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Of the entire contents of the Qur'an there is one verse that can be used as the key to unlock the secret of seven hundred times the reward of pleasure in the darul hereafter, namely the verse:

"The parable of those who spend their wealth in the way of Allah is like that of a seed that grows seven ears, in each ear a hundred grains. Allah multiplies (rewards) for whom He wills. And Allah is Most Merciful. Wide (His gift) and All-Knowing (Al Baqarah: 2:261)

In an effort to open the veil of humans getting seven hundred times the reward of pleasure in the afterlife, I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that seven hundred times the reward for pleasure in the afterlife is endless enjoyment from the point of view of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

SEVEN HUNDRED TIMES REWARDS OF ENJOYMENT IN DARUL AKHIRAT

Let's uncover the secret behind the verse: *"... those who spend their wealth in the way of Allah are like a seed that grows seven ears, in each ear a hundred seeds. Allah multiplies (rewards) for whom He wills. .. (Al Baqarah : 2:261)*

Continue to dig deeper behind the verse: *"...a seed that grows seven ears, in each ear a hundred seeds... (Al Baqarah: 2:261)*

It turns out that now it has been revealed that the rewards of pleasure in the afterlife are endless. So

life in the afterlife is a life that cannot be measured by the size that is on earth today.

This means that seven hundred times the reward of pleasure is a picture of pleasure that is felt forever.

EFFORT FOR THE ESTABLISHMENT OF ALLAH'S RELIGION ON THIS EARTH

Now, the pleasure that is felt forever in the afterlife is because humans have helped to establish Allah's religion on this earth. From starting to control the desires and impulses that come from within ourselves to the effort through the energy, thoughts, funds that are in us for the sake of maintaining and upholding Allah's religion "*... those who spend their wealth in the way of Allah...(Al Baqarah : 2:261)*

So the pleasure that is felt forever in the darul hereafter by someone is because "*...spend his wealth in the way of Allah... (Al Baqarah: 2: 261)*

CONCLUSION

Based on the description above we can conclude that the secret behind the verse: "*... those who spend their wealth in the way of Allah are like a seed that grows seven ears, in each ear a hundred seeds. Allah multiplies (rewards) for whom He wills...(Al Baqarah: 2:261)*

We dig deeper behind the verse: "*...a seed that grows seven ears, in each ear a hundred seeds... (Al Baqarah: 2: 261)*
