ABSTRACT

I ask Allah SWT for forgiveness before continuing to reveal the secrets contained in the verse concerning female cow members to revive people who have died from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

Where are the signs of the greatness of Allah SWT regarding members of female cows to revive people who have died as written in the verses:

"And (remember), when Moses said to his people:" Verily Allah has told you to slaughter a cow. "They said:" Are you going to make us a fruit of ridicule? " those who are ignorant "(Al Baqarah: 2: 67)

"Then We said," Strike the corpse with part of the cow's member! "Thus Allah brings back to life those who have died, and shows you the signs of His power so that you will understand (Al Baqarah: 2: 73)

In an effort to unveil the greatness of Allah SWT regarding the members of female cows to revive people who have died, the author uses the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose a hypothesis that the atoms present in female cow members meet the atoms of people who have died according to the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms. Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoebae, plants, bacteria and archaea.

STATE OF THE HUMAN BODY AND PART OF THE MEMBERS OF THE COW AFTER HUMAN AND COW DEAD

Now let us uncover what is the secret in the verse: "... *Beat the corpse ... (Al Baqarah: 2: 73)* and the verse: "... *with a part of the female cow!*" (*Al Baqarah: 2: 73*)

Well, what happens after a few minutes after humans and cows die. Body temperature drops according to the temperature of the surrounding environment.

Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, clot, stop, and prevent the muscles from contracting. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints remain in place, the whole body stiffens.

A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by body enzymes. Loss of all color, caused when the blood cells begin to break away from the blood vessels, then gravity pulls them into the smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body.

The changing color of the body occurs gradually and in line with the process of destruction in the body, the colors green, blue, red, purple and finally black arise. Decay occurs when blood vessels and tissues are damaged. Gas and fluids build up and swell which causes the body to become swollen in certain areas.

For example, the eyeball is pushed out a little or the tongue is slowly coming out of the mouth. Then the swelling is most noticeable in the stomach. Billions of bacteria take part in the decomposition of the body which has died.

The whole body basically becomes liquid, the large organs and vessels in it become solid. When enough fluid has accumulated the body becomes cracked. This is where the breeding ground for billions of bacteria.

THE PROCESS OF DETERMINATION

In this process of decay of carbon atoms and oxygen atoms to form carbon dioxide or charcoal acid. Then the carbonic acid substance is absorbed by plants and converted into oxygen and glucose through photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in green parts of plants. Where glucose is used as food by plants, while oxygen is used for foodstuffs through the respiratory process by humans and animals.

In this process of putrefaction too, the bodies of humans and the bodies of dead cows turn into ammonia. Furthermore, this ammonia is converted into nitrite by nitrosoma bacteria. Then the nitrite is on convert to nitrate by nitrobaktor bacteria. Finally, the nitrate goes through a denitrification process back into nitrogen and up into the atmosphere.

ATOMIC ATOMIC FROM THE CORNAL BODY AND PART OF THE MEMBERS OF THE COW OF THE BEAUTIFUL COMES BACK

Furthermore, what happened after the corpse and some members of the cow died was revealed in the verse: "... *Allah brings back to life those who have died, ... (Al Baqarah: 2: 73)*

Now it turns out that what comes back to life from the human body and the body of the dead female

cow is the carbon, nitrogen, oxygen and hydrogen atoms which are the building materials for the human body and the dead female cow comes back out and gathers around us and some climb up into the atmosphere . Then these atoms will be used again to become raw materials for making humans, animals and other new living organisms.

This is the secret contained in the verse: "*... Allah brings back to life those who have died, and shows you the signs of His power ... (Al Baqarah: 2: 73)*

CONCLUSION

Based on the description above, we can conclude that what happens after a few minutes after humans and cows die. Body temperature drops according to the temperature of the surrounding environment.

Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, clot, stop, and prevent the muscles from contracting. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints remain in place, the whole body stiffens.

A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by body enzymes. Loss of all color, caused when the blood cells begin to break away from the blood vessels, then gravity pulls them into the smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body.

The changing color of the body occurs gradually and in line with the process of destruction in the body, the colors green, blue, red, purple and finally black arise. Decay occurs when blood vessels and tissues are damaged. Gas and fluids build up and swell which causes the body to become swollen in certain areas.

For example, the eyeball is pushed out a little or the tongue is slowly coming out of the mouth. Then the swelling is most noticeable in the stomach. Billions of bacteria take part in the decomposition of the body which has died. The whole body basically becomes liquid, the large organs and vessels in it become solid.

When enough fluid has accumulated the body becomes cracked. This is where the breeding ground for billions of bacteria.

Where those that come back to life from the human body and the body of the dead female cow are carbon, nitrogen, oxygen and hydrogen atoms which are the building materials for the human body and the dead female cow comes back out and gathers around us and there are those that go up into the atmosphere.

Then these atoms will be used again to become raw materials for making humans, animals and other new living organisms. This is the secret contained in the verse: "*... Allah brings back to life those who have died, and shows you the signs of His power ... (Al Baqarah: 2: 73)*
