ABSTRACT

First, by asking forgiveness from Allah SWT, here I am trying to reveal the signs of the greatness of Allah SWT regarding Allah being above 'arsh through photons and quarks based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

In the Al Quran, several verses are found which are the keys to unlocking Allah's secret that are above 'arsh, namely the verses:

"It is Allah Who exalts the sky without pillars (as) you see, then He dwells on 'Arash, and subdues the sun and moon. Each of them circulates until the appointed time. Allah regulates the affairs (of His creatures), explains the sign -a sign (His greatness), so that you may believe in meeting (mu) with your Lord. (Ar Ra'd: 13: 2)

"And you (Muhammad) will see the angels circling around the 'Throne, praising his Lord; and given the verdict among the servants of Allah fairly and pronounced:" Praise be to Allah, Lord of the worlds. "(Az Zumar: 39: 75)

"And the angels were in the corners of the sky. And on that day eight angels upheld 'Throne of your Lord above (their heads). (Al Haaqqah: 69: 17)

In an effort to open the veil of Allah to be on this level I am basing it on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I am proposing a hypothesis of how Allah is above the 'level of our earth today when viewed from the point of view of photons, quarks and Deoxyribonucleic acid (DNA)?

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Photons are elementary particles of the boson type and are carriers of electromagnetic interactions.

If we want to know the **quark**, then we should pay attention to one of the hydrogen atoms which is the building block for the human body, animals, plants and fruits and inanimate objects. Then we

open the body of the hydrogen atom, we will find an electron and a proton nucleus. So if this proton is split, then we will find two upper quarks and one lower quark. Where these three quarks are combined with gluons.

SKY WITHOUT POLE IS AN EXPOSURE OF THE SPACE WHERE THE SUN, THE EARTH, THE MOON AND THE ARSY ARE

Now if we dig into what is contained in the verse: *"It is Allah Who has lifted the heavens without pillars (as) which you see, then He resides on 'Arash, ... (Ar Ra'd: 13: 2)*

Now we examine the secret behind the verse: *"... the sky is without pillars (as) which you see ... (Ar Ra'd: 13: 2)" ... subdues the sun and moon ... "(Ar Ra ' d: 13: 2)*

It turns out that if we dig into what is contained in this verse, it is a stretch of space where there is the sun, earth and moon above it. *"Each of them circulates until the appointed time ... (Ar Ra'd: 13: 2)*

This means that the moon revolves around the earth and the earth revolves around the sun. So actually 'this Throne in our earth which is in a stretch of room or in other words' Throne is on our earth with the sky.

ANGELS FORMING A CIRCLE AROUND 'ARSY ON EARTH

Then we unpack again the verse: *"... the angels are circling around the 'Throne ..." (Az Zumar: 39: 75)* This means that here are angels who are similar to humans forming a circle around the 'Throne in our earth.

ALLAH IS ABOVE 'ARSY DESCRIBE THE LAYER OF LIGHT

As described in the verse: *"... the parable of the light of Allah, is like a hole that is not transparent, in which there is a large lamp ... Light above the light (in layers), ..." (An Nuur: 24 : 35).*

So Allah is above the Throne is a picture of *"... the light above the light ..."* which means that the light above this light is everywhere, around us today.

CONCLUSION

Based on the description above we can conclude that *"... the sky is without pillars (as) which you see ... (Ar Ra'd: 13: 2)" ... subdues the sun and moon ... "(Ar Ra ' d: 13: 2)* is a expanse of space where there is the sun, earth and moon above.

"Each of them circulates until the appointed time ... (Ar Ra'd: 13: 2) This means that the moon revolves around the earth and the earth revolves around the sun . So actually 'this Throne in our earth which is in a stretch of room or in other words' Throne is on our earth with the sky.

Where angels who are similar to humans form a circle around the 'Throne in our earth.

The description in the verse: *"... The parable of the light of Allah, is like a hole that is not transparent, in which there is a large lamp ... Light above the light (in layers), ..." (An Nuur: 24: 35)* is a picture of *"... the light above the light ..."* which means the light above this light is everywhere, around us right now.
