## **ABSTRACT**

Terlebih dahulu dengan memohon ampun kepada Allah SWT disini penulis mencoba untuk membuka tanda-tanda kebesaran Allah SWT mengenai Allah adalah yang awal dan yang akhir berdasarkan photon, quark dan struktur molekuler asam nukleat atau deoxyribonucleic acid (DNA)

Dari seluruh isi Al Quran hanya ada satu ayat yang bisa dijadikan kunci untuk membuka rahasia tentang Allah adalah yang awal dan yang akhir yaitu ayat:

***"Dialah Yang Awal dan Yang Akhir Yang Zhahir dan Yang Bathin; dan Dia Maha Mengetahui segala sesuatu. (Al Hadiid: 57: 3)***

Dalam usaha membuka tabir Allah adalah yang awal dan yang akhir ini penulis mempergunakan alat yang dinamakan deoxyribonucleic acid atau asam deoksiribonukleat atau struktur molekuler asam nukleat.

## **HIPOTESE**

Disini penulis mengajukan hipotese Allah yang awal dan yang akhir adalah photon dan quark dilihat dari photon, quark dan Deoxyribonucleic acid (DNA)

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA adalah tempat penyimpanan informasi genetik yang memiliki struktur rangkap yang membentuk heliks ganda dan yang mengandung makromolekul polinukleotida yang tersusun secara berulang dari polimer nukleotida. Nukleotida ini adalah terdiri dari folat, gula 5 karbon dan salah satu dari basa nitrogen. Basa nitrogen adalah Guanin (G), Adenin(A), Cytocine(C) dan Timin (T).

Guanin (G) adalah terdiri dari 5 buah atom karbon, 5 buah atom nitrogen, 1 buah atom oksigen dan 5 buah atom hidrogen. Adenin(A) memiliki 5 buah atom karbon, 5 buah atom nitrogen dan 5 buah atom hidrogen. Cytocine (C) berisikan 4 buah atom karbon, 3 buah atom nitrogen, 1 buah atom oksigen dan 5 buah atom hidrogen. Timin (T) mengandung 5 buah atom karbon, 2 buah atom nitrogen, 2 buah atom oksigen dan 6 buah atom hidrogen. Folat berisikan 1 buah atom fosfor, 4 buah atom oksigen dan 2 buah atom hidrogen. Adapun Gula 5 karbon memiliki 5 buah atom karbon, 2 buah atom oksigen dan 8 buah atom hidrogen.

## **YANG HIDUP AWAL DAN AKHIR ADALAH PHOTON DAN QUARK**

First, by asking forgiveness from Allah SWT, here I am trying to reveal the signs of the greatness of Allah SWT regarding Allah which is the beginning and the end based on photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

Of all the contents of the Al Quran, there is only one verse that can be used as the key to unlocking the secrets of Allah, namely the beginning and the end, namely the verse:

***"He is the First and the Last, the Zahir and the Bathin; and He is All-Knowing all things. (Al Hadiid: 57: 3)***

In an effort to open the veil of Allah, it is the beginning and the last one I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here the authors propose Allah's hypothesis that the first and last ones are photons and quarks seen from photons, quarks and Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **THAT LIFE BEGINNING AND END IS PHOTON AND QUARK**

Let us work together to uncover the secret behind the verse: ***"He is the First and the Last, the Truth and the Bathin; and He is All-Knower. (Al Hadiid: 57: 3)***

It turns out that if we dig from what is in the universe it will reveal that the first and last things are photons and quarks.

Where after 10 billion billion billion billion billion billion billion billion billion year from now our universe will return to nothing, unless there are only photons and quarks. Photons are elementary particles of the boson type and are carriers of electromagnetic interactions.

Meanwhile, if we want to find a quark, then we have to open the body of a hydrogen atom in which we will find one electron and one proton nucleus.

Then we split this proton, so we will find two upper quarks and one lower quark. Where these three quarks are combined with gluons.

## **ALLAH IS THE BEGINNING AND THE END OF THE PHOTON AND QUARK**

This is actually the secret behind the verse ***"He is the First and the Last ... (Al Hadiid: 57: 3)***

That is, Allah, the beginning and the end, is in the photon and the quark, meaning that if we want to explore and uncover the secrets of Allah, the beginning and the end, that is through the light of Allah, for example, sunlight is one of the proofs of Allah, the beginning and the end.

Where the sun's rays can be proven in fact, seen and felt. Inside are photons and quarks.

## CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"He is the First and the Last, the Truth and the Bathin; and He is All-Knower. (Al Hadiid: 57: 3)*

It turns out that if we dig from what is in the universe it will reveal that the first and last things are photons and quarks.
