ABSTRACT

Previously, I asked for forgiveness from Allah SWT. Here I am trying to unmask an nymph that has never been touched by humans and jinn from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

In the Al Quran there are several verses that I think can reveal the secrets of the nymphs that have never been touched by humans and jinn in heaven, namely:

"In heaven there are nymphs who politely lower their gaze, never been touched by humans before them, nor by jinn. (Ar Rahmaan: 55: 56)

"Verily We created them (nymphs) directly (Al Waaqi'ah: 56: 35)

Where in an effort to open the veil of an nymph that has never been touched by humans and the genie, the author uses a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis of an nymph that has never been touched by humans and the jinn is an nymph in this world according to the basis of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

NYMPH WHO HAS NEVER BEEN TOUCHED BY HUMANS AND JINN

Now we uncover the secret behind the verse: *"In heaven there are nymphs ..., never been touched by humans before them, nor by jinn. (Ar Rahmaan: 55: 56)*

Well, humans and jinn are living in today's world. If there is an nymph who has never been touched by humans and the jinn is describing an nymph who is in the world today. Or in other words, a beautiful woman, pure white, secluded in the house.

Now *"In heaven there are nymphs ... (Ar Rahmaan: 55: 56)* what kind of nymphs?

It turns out that if we dig deeper, it will be revealed that the nymphs in heaven are nymphs who come from the world today.

Why?

Because the nymphs in heaven are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that come out of the bodies of nymphs who have died and gather in the afterlife.

So if there is an nymph who has not been touched by humans and jinn, it means a beautiful woman, pure white, secluded in the house, who has never been married and has never been approached by a jinn in this world.

So now it is revealed that the nymphs in heaven are nymphs who come from our earth today, when that nymph died, then the oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that came out of the bodies of the dead nymph gathered in the afterlife.

NYMPH IS CREATED DIRECTLY

Then we uncover the secret behind the verse: *"Verily We created them (nymphs) directly (Al Waaqi'ah: 56: 35)*

It turns out that this describes the oxygen atom, hydrogen atom, nitrogen atom and carbon atom that came out of the body of a deceased nymph and gathered in the afterlife.

Or in other words, the nymphs does not need to be created again, because there are already oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that have come out of the bodies of nymphs who have died and gathered in the afterlife.

CONCLUSION

Based on the description above we can conclude that the secret behind the verse: *"In heaven there are nymphs ..., never been touched by humans before them, nor by jinn. (Ar Rahmaan: 55: 56)*

Humans and jinn are living in today's world. If there is an nymph who has never been touched by humans and the jinn is describing an nymph who is in the world today. Or in other words, a beautiful woman, pure white, secluded in the house.

Now *"In heaven there are nymphs ... (Ar Rahmaan: 55: 56)* what kind of nymphs?

If we dig deeper, it will be revealed that the nymphs in heaven are nymphs who come from the world today. Why? Because the nymphs in heaven are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that come out of the bodies of nymphs who have died and gather in the afterlife. So if there is an nymph who has not been touched by humans and jinn, it means a beautiful woman, pure white, secluded in the house, who has never been married and has never been approached by jinn in this world.

So now it is revealed that the nymphs in heaven are nymphs who come from our earth today, when that nymph died, then the oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that came out of the bodies of the dead nymph gathered in the afterlife.

The secret behind the verse: *"Verily We created them (nymphs) directly (Al Waaqi'ah: 56: 35)*

It turns out that this describes the oxygen atom, hydrogen atom, nitrogen atom and carbon atom that came out of the body of a deceased nymph and gathered in the afterlife.

Or in other words, the nymphs does not need to be created again, because there are already oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms that have come out of the bodies of nymphs who have died and gathered in the afterlife.
