## **ABSTRACT**

First, by asking for forgiveness from Allah SWT, here I am trying to reveal the signs of the greatness of Allah SWT regarding the secret of Allah regarding harut and confusion in the land of Babylon from the point of view of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

The signs of the greatness of Allah SWT regarding the secret of Allah regarding harut and confusion in the land of Babylon are found in the verse:

*"And they followed what was read by the devils at the time of Solomon's kingdom (and they say that Solomon was doing magic), even though Solomon was not kafir (did not do magic), only the devils were disbelievers (doing magic). magic to humans and what was revealed to two angels in the land of Babylon, namely Harut and Marut, while both of them did not teach (anything) to anyone before saying: "We are only a trial (for you), therefore do not disbelieve." from the two angels what with magic, they can divorce a (husband) with his wife. And they (sorcerers) do not give harm with their magic to anyone, except with the permission of Allah. And they learn something that does not harm him. and it does not benefit. For the sake of, in fact they have believed that whoever exchanges it (the book of Allah) with magic that, there is no profit to him in the hereafter, and it is very evil for them to sell themselves with magic, if they know. (Al Baqarah: 2: 102)*

In an effort to unveil the greatness of Allah SWT regarding Allah's secret of harut and marut in the land of Babylon, I use the basis of photons, quarks and the molecular structure of deoxyribonucleic acid (DNA).

## **HYPOTHESIS**

Here I am proposing God's secret hypothesis about harut and marut, is the human secret in the land of Babylon in terms of photons, quarks and the molecular structure of deoxyribonucleic acid (DNA)?

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Photons are elementary particles of the boson type and are carriers of electromagnetic interactions. Whereas quarks are also elementary particles contained in the protons of two upper and one lower quarks. Where these three quarks are combined with gluons.

## **DEVILS IS CREATED FROM OXYGEN ATOMES**

Now, let us explore the secret contained in the verse: *"... only the devils will disbelieve (do magic). They teach magic to humans ... (Al Baqarah: 2: 102) Who is the real devil? It turns out that "... devils ... (and of the kind) jinn, ..." (Al An'aam: 6: 112) "... We have created the jinn before (Adam) from a very hot fire" (Al Hijr: 15: 27) where the hot fire is the oxygen atom.*

Because based on the molecular structure of nucleic acids which contain nitrogenous bases, we can observe that the oxygen atom or what is called an acid is a colorless, odorless and tasteless gas. Where oxygen combines with most of the other elements to form oxides. This oxygen is also very important for plants, animals and humans.

But this oxygen can cause fire through oxidation, for example in the presence of flammable materials and in the presence of friction. Oxygen is very easily oxidized with other atoms, for example the result of oxidation between oxygen atoms and hydrogen atoms is water.

Now uncovered what is behind the veil *"... a very hot fire ..." (Al Hijr: 15:27)* illustrates that actually behind the hot fire is hidden the element of the oxygen atom which is very easily oxidized by combustible materials and by the presence of friction.

Therefore, in the presence of the element oxygen, combustible material and the result of friction, a hot fire will arise. This is the veil behind the letter *(Al Hijr: 15:27)*.

## **ANGEL HARUT AND ANGEL MARUT IN BABYLON**

So now we dig deeper into the verse: *"... and what was revealed to the two angels in the land of Babylon, namely Harut and Marut, ... they (shaitan) learned from the two angels what with magic they can divorce a (husband) with his wife ... (Al Baqarah: 2: 102)*

Where the land of Babylon is located now in Iraq and Syria. Where the land of Babylon appeared in 3915 which was ruled by the Amorites.

Where Angel Harut and Angel Marut *"... did not teach (anything) to anyone before saying:" We are only a trial (for you), therefore do not disbelieve ... "(Al Baqarah: 2: 102)*

## **THE ANGEL IS A MAN**

If we dig what is behind the verse: *"And if We made him an angel, of course We made him a man and (if We made him a man), ... (Al An'aam: 6: 9 )*

It turns out that it is clearly illustrated to us that an angel is a man like us human men.

## **HUMANS ARE CREATED FROM OXYGEN ATOMIC, NITROGEN HYDROGEN AND CARBON**

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atom, 6.78% oxygen atom and 35.59% hydrogen atom. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available all around us and in atmosphere. These atoms are the raw material for the manufacture of humans, animals, fungi, amoebae, plants, bacteria and archaea.

We can say that humans are made up of almost a third of carbon atoms, one-fourth of the nitrogen atom, nearly one-tenth of the oxygen atom and over one-third hydrogen atom which is all the atoms available around us, in the ground and on atmosphere.

## **DEVILS IS IN THE HUMAN BODY**

Now we dig deeper based on the molecular structure of the nucleic acid, which is clearly illustrated between carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms that cannot be separated. All these atoms are interacting with each other and forming one life. Where *"... devil ... (and of the kind) jinn, some of them whisper to some others ..."* (Al An'aam: 6: 112) And *"who whisper (evil) into human breasts. , ... "* (An-Naas: 114: 5-6)

Because indeed the evil that is built up by the oxygen atom every second enters the lungs in the human chest through the respiratory tract.

So the secret behind the above verses is uncovered where the shaitan *"... devils ... (and of kind) jinn, ..."* (Al An'aam: 6: 112) is in the human body which is always whispering every second. with potential energy vibrations to humans through tens of billions of nerve cell networks of the human brain.

So now we continue to unpack what is written in the verses: *"... only the shamans disbelieve (do magic). They teach magic to humans ... they learn from both ... the angels in the land of Babylon, namely Harut and Marut ... with magic, they can divorce a person (husband) and his wife ..."* (Al Baqarah: 2: 102)

It turns out that the so-called devils are humans themselves, humans like us today.

## **CONCLUSION**

Based on the description above, we can conclude that *"... only the devils are kafir (working magic). They teach magic to humans ..."* (Al Baqarah: 2: 102) Where *"... devils ... (and of the kind) jinn, ..."* (Al An'aam: 6: 112) *"... We have created the jinn before (Adam) from a very hot fire"* (Al Hijr: 15: 27) where the hot fire is oxygen atoms.

Based on the molecular structure of nucleic acids which contain nitrogenous bases, we can observe that the oxygen atom or what is called an acid is a colorless, odorless and tasteless gas. Where oxygen combines with most of the other elements to form oxides.

This oxygen is also very important for plants, animals and humans. But this oxygen can cause fire through oxidation, for example in the presence of flammable materials and in the presence of friction.

Oxygen is very easily oxidized with other atoms, for example the result of oxidation between oxygen atoms and hydrogen atoms is water. Now uncovered what is behind the veil *"... a very hot fire ..."* (Al Hijr: 15:27) illustrates that actually behind the hot fire is hidden the element of the oxygen atom which is very easily oxidized by combustible materials and by the presence of friction.

Therefore, in the presence of the element oxygen, combustible material and the result of friction, a hot fire will arise. This is the veil behind the letter (Al Hijr: 15:27). *"... and what was sent down to two angels in the land of Babylon, namely Harut and Marut, ... they (shaitan) learned from the two angels what with magic they can divorce a (husband) and his wife. ..."* (Al Baqarah: 2: 102)

This country of Babylon is located today in Iraq and Syria. Where the land of Babylon appeared in 3915 which was ruled by the Amorites.

Where the angel Harut and the angel Marut *"... did not teach (anything) to anyone before saying: " We are only a trial (for you), therefore do not disbelieve ... " (Al Baqarah: 2: 102)*

What is behind the verse: *"And if We made him an angel, of course We made him a man and (if We made him a man), ... (Al An'aam: 6: 9)*

It turns out that it is clearly illustrated to us that an angel is a man like us human men. Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atom, 6.78% oxygen atom and 35.59% hydrogen atom. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available all around us and in atmosphere.

These atoms are the raw material for the manufacture of humans, animals, fungi, amoebae, plants, bacteria and archaea.

We can say that humans are made up of almost a third of carbon atoms, one-fourth of the nitrogen atom, nearly one-tenth of the oxygen atom and over one-third hydrogen atom which is all the atoms available around us, in the ground and on atmosphere. based on the molecular structure of nucleic acids, it is clearly defined that the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms cannot be separated.

All these atoms are interacting with each other and forming one life. Where *"... devil ... (and of the kind) jinn, some of them whisper to some others ..." (Al An'aam: 6: 112)* And *"who whisper (evil) into human breasts. , ... ". (An-Naas: 114: 5-6)*

Because indeed devil that is built up by the oxygen atom every second enters the lungs in the human chest through the respiratory tract. The secret behind the above verses is uncovered where the satanic *"... devils ... (and of the kind) jinn, ..." (Al An'aam: 6: 112)* are in the human body which every second is always whispering with potential energy vibrations to humans through the tens of billions of nerve cell networks of the human brain.

Also *"... only the devils disbelieve (do magic). They teach magic to humans ... they learn from the two ... the angels in the land of Babylon, namely Harut and Marut ... who with that magic, they can divorce a (husband) with his wife ... (Al Baqarah: 2: 102)*

So what is called devil is man himself, a human like us today.
