## **ABSTRACT**

Before I wrote about the secret issue of Allah about Satan being the same as humans, I first asked Allah SWT for forgiveness. Here I am trying to open the veil that covers Allah's secret about Satan being the same as humans from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become tools for opening Allah's secrets about Satan and humans, namely:

*"O son of Adam, do not you may be deceived by Satan as he took your father's two mothers out of heaven, he took off his clothes to show them both his genitals. Surely he and his followers see you and a place where you are not. can see them. Verily We have made the shaitan as a leader-leader for people who do not believe. (Al A'raaf: 7: 27)*

*"And thus We made for each prophet an enemy, namely shaitan (of) human kind and (and kind) jinn, some of them whispered to the others beautiful words to deceive (humans) ... (Al An'aam: 6: 112)*

In an attempt to unveil the cover of Allah's secret about Satan and humans, I use the basic deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose the hypothesis that Satan is human from a basic point of view Deoxyribonucleic acid (DNA)

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **SATAN IS THE SAME WITH HUMAN**

Let us now go back to exposing the secret behind the verse:

"O son of Adam, do not ever be deceived by Satan ... (Al A'raaf: 7:27)

Now, who is the devil?

Now we continue to explore the secret in the verse: *"... Behold, he and his followers see you and a place where you can not see them ... (Al A'raaf: 7:27)*

Now, *"... namely the shaitan (of a) human kind ... (Al An'aam: 6: 112)* and *" ... Satan. He is from the jinn class, ... "(Al Kahf: 18:50)* and *"And We created the jinn before (Adam) from a very hot fire" (Al Hijr: 15:27)*

It turns out that Satan, the devil and jinn are formed from oxygen atoms.

Why?

Because the jinn, the devil and the devil were created *"... from a very hot fire" (Al Hijr: 15:27)* Based on the molecular structure of nucleic acids which contain nitrogenous bases, we can observe that the oxygen atom or what is called an acid is a colorless, odorless and tasteless gas.

Where oxygen combines with most of the other elements to form oxides. This oxygen can cause fire through oxidation, for example in the presence of flammable materials and in the presence of friction. Oxygen is very easily oxidized with other atoms, for example the result of oxidation between oxygen atoms and hydrogen atoms is water.

The secret of this Satan is *"... a very hot fire ..." (Al Hijr: 15:27)* in which is hidden the element of the oxygen atom which is very easily oxidized by combustible material and in the presence of friction.

So in the devil's body, Satan and the jinn contain oxygen atoms

## **SATAN, DEVIL AND JIN ARE PEOPLE**

Now, because humans contain Deoxyribonucleic acid (DNA) which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Because oxygen atoms are in the bodies of devils, shaitan, and jinn, where oxygen atoms are also in the human body, where this oxygen atom is in Deoxyribonucleic acid (DNA), therefore in humans there are satan, devil and jinn.

In other words, Satan, the devil and the jinn are human beings. Satan, devil and Jin are invisible because they are in human beings

Now, why can't humans see the satan, the devil and the jinn?

Because Satan, devil and jinn exist in the human body. Whereas Satan, the devil and the jinn see humans because Satan, devil and jinn are in the human body.

This is the secret revealed in the verse *"Verily he and his followers saw you and a place where you could not see them ... (Al A'raaf: 7:27)*

## **CONCLUSION**

Based on the description above, we can conclude that Satan, the devil and the jinn are formed from oxygen atoms. Jin, devil and Satan were created *"... from a very hot fire" (Al Hijr: 15:27)*

Based on the molecular structure of nucleic acids which contain nitrogenous bases, we can observe

that the oxygen atom or what is called an acid is a colorless, odorless and tasteless gas. Where oxygen combines with most of the other elements to form oxides.

This oxygen can cause fire through oxidation, for example in the presence of flammable materials and in the presence of friction. Oxygen is very easily oxidized with other atoms, for example the result of oxidation between oxygen atoms and hydrogen atoms is water.

The secret of this Satan is *"... a very hot fire ..."* (Al Hijr: 15:27) in which is hidden the element of the oxygen atom which is very easily oxidized by combustible material and in the presence of friction.

So in the devil's body, Satan and the jinn contain oxygen atoms Humans contain Deoxyribonucleic acid (DNA) which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Because oxygen atoms are in the bodies of devils, satan, and jinn, where oxygen atoms are also in the human body, where this oxygen atom is in Deoxyribonucleic acid (DNA), therefore in humans there are shaitan, devil and jinn.

In other words, Satan, the devil and the jinn are human beings.

Because Satan, demons and jinn exist in the human body.

Whereas Satan, the devil and the jinn see humans because Satan, devil and jinn are in the human body.

This is the secret revealed in the verse *"Verily he and his followers saw you and a place where you could not see them ..."* (Al A'raaf: 7:27)
