ABSTRACT

I ask Allah SWT for forgiveness before continuing to reveal the secrets contained in the verse concerning grapes that bring balance to life from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Where are the signs of the greatness of Allah SWT regarding grapes that bring balance to life in the verses:

"And on this earth there are parts side by side, and vineyards, plants and palm trees that are branched and unbranched, are watered with the same water. We exaggerate some of the plants over others about their taste. . Verily in this there are signs (the greatness of Allah) for those who think (Ar Ra'd: 13: 4)

"Then after that will come the year in which people will be given rain (sufficiently) and during that time they squeeze the wine." (Joseph: 12: 49) "And from palm fruit and wine, you make an intoxicating drink and a good sustenance. In fact, in this there is a sign (the greatness of God) for those who think. (An Nahl: 16: 67)

In an effort to open the veil of the greatness of Allah SWT regarding grapes that bring balance to life, the author uses the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose a hypothesis of grapes that bring a balance of life between the drive towards the illusion and the push towards the light layer of God according to the molecular structure of deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoebae, plants, bacteria and archaea.

WINE FRUIT BRINGS A BALANCE BETWEEN FANTASY AND REALITY

We will now try to expose the secret behind the verse: "*... from the fruit ... grapes ... you make an intoxicating drink ... (An Nahl: 16: 67)*" then we dig deeper in the verse: "*.. from fruit ... grapes, ... good sustenance ... (An Nahl: 16: 67)*"

Well, it turns out that behind the grapes there is a fantasy "*... an intoxicating drink ... (An Nahl: 16: 67)*" and also stored "*... good sustenance ... (An Nahl: 16: 67)*" in other words that life we must have a balance between a life full of imagination with a life full of blessings from Allah. Why?

Because grapes contain sugar after fermentation, sugar is converted to alcohol, although not all sugar is converted to alcohol. In everyday language called alcohol is ethanol which contains 2 carbon atoms, 5 hydrogen atoms and 1 oxygen atom, the chemical formula is C_2H_5OH . Where all alcohol has a certain toxic effect, but ethanol is the least toxic than monohydric alcohol (OH)

This ethanol poison is what causes our brain tissue to be disrupted and makes the brain abnormal and the brain's function as a control tool does not run well.

This is what causes our bodies to not have a balance because it is out of control of the brain that we end up getting drunk. But behind it is hidden in the secret of the grapes that give "*... good sustenance ... (An Nahl: 16: 67)*"

Where grapes that contain sugar can be eaten directly and can be dried and sold to be eaten by us so that our brains and bodies have the energy to continue this life.

ALLAH HAS TURNED WINE FRUIT AS A BALANCED DESCRIPTION OF HUMAN LIFE TO REACH THE LAYER OF ALLAH'S LIGHT

This is the secret of the grapes that are stored in the verse: "*... We exaggerate some of the plants over the other part of the taste ... (Ar Ra'd: 13: 4)*" "*... such things really exist sign (the greatness of Allah) for those who think. (An Nahl: 16: 67)*"

Now it is revealed that through the grapes Allah has given us a test, if we want to come to the layer of Allah's light, we must see, study, understand and deepen what is contained in these grapes. "*... intoxicating drinks ... (An Nahl: 16: 67)*" and also stored "*... good sustenance ... (An Nahl: 16: 67)*"

CONCLUSION

Based on the description above, we can conclude that behind the grapes there is an imaginary "*... an intoxicating drinks ... (An Nahl: 16: 67)*" and also stored "*... good sustenance ... (An Nahl: 16: 67)*" in other words, that in our life there must be a balance between a life full of imaginative life with a life full of sustenance from Allah.

In that grapes contain sugar after fermentation, sugar is converted into alcohol, although not all sugar is converted into alcohol. In everyday language called alcohol is ethanol which contains 2 carbon atoms, 5 hydrogen atoms and 1 oxygen atom, the chemical formula is C_2H_5OH . Where all alcohol has a certain toxic effect, but ethanol is the least toxic than monohydric alcohol (OH)

This ethanol poison is what causes our brain tissue to be disturbed and makes the brain abnormal and the brain's function as a control tool does not run well.

This is what causes our bodies to not have a balance because it is out of control of the brain that we end up getting drunk. But behind it is hidden in the secret of the grapes that give "*... good sustenance*"

... (*An Nahl: 16: 67*)

Where grapes that contain sugar can be eaten directly and can be dried and sold to be eaten by us so that our brains and bodies have the energy to continue this life.

Through the grapes Allah has given us a test, if we want to reach the layer of Allah's light, we must see, study, understand and deepen what is contained in these grapes. "... *intoxicating drinks* ... (*An Nahl: 16: 67*) and also stored" ... *good sustenance* ... (*An Nahl: 16: 67*)
