ABSTRACT

Before I write down the problem of how Allah conveyed revelations to the Prophet Muhammad, I first ask for forgiveness from Allah SWT.

Here I try to remove the veil that covers the problem of Allah conveying revelations to the Prophet Muhammad from the point of view of the molecular structure of deoxyribonucleic acid (DNA).

There are several verses that are used as a secret opening tool regarding how Allah conveyed revelations to the Prophet Muhammad, namely the verses:

"Then We reveal to you (Muhammad):" Follow the religion of Ibrahim, a hanif "and he is not among those who associate God. (An Nahl: 16: 123)

"And it is impossible for a human being that Allah speaks with him except by means of revelation or behind the veil or by sending a messenger (angel) and then revealing to him with His permission what He wills. Verily He is Most High, Most Wise. Ash Shuura: 42: 51)

"and (angels) who conveyed revelations, (Al Mursalaat: 77: 5)

"And tell (O Muhammad to them) the story of Ismail (that one) in the Quran. Surely he is a person who is true to his promise, and he is an apostle and prophet. (Maryam: 19: 54)

In an effort to open the veil of Allah to convey revelations to the Prophet Muhammad, the writer used a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I am proposing a hypothesis on how Allah conveyed revelations to the Prophet Muhammad? And how do angels convey revelations to the Prophet Muhammad when using the basis of Deoxyribonucleic acid (DNA)?

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

THE EXISTENCE OF ALLAH CANNOT BE SEEN BY HUMAN EYES

Let us now try to unveil the secret in the verse: *"And it is impossible for any human being that Allah spoke with him except by means of a revelation or behind the veil or by sending a messenger (angel) and then being revealed to her with His permission what He said. will ... (Ash Shuura: 42: 51) We explore "... except by means of revelation or behind the veil or by sending a messenger (angel) ... (Ash Shuura: 42: 51)*

Now it turns out that it illustrates to us that the existence of Allah cannot be seen by our eyes. Why?

Because our eyes can only see light in the area of the electromagnetic spectrum between 430 and 740 nanometers. This means that the light that is below the area below 430 nanometers and above 740 nanometers is called unseen.

For example, the sunlight that we enjoy every day is in the area of the electromagnetic spectrum between 430 and 740 nanometers. So with the limited visibility of our eyes, it is impossible for humans with their eyes to see Allah.

Therefore, if Allah wants to talk to humans, the method is through revelation or by sending an angel or Allah is in a place where the human eye cannot reach him.

ALLAH SENDS REVELATION TO THE PROPHET OF MUHAMMAD THROUGH A VIBRATION OF VOTE FREQUENCY THAT CAN BE

Heard and Understood We explore the secret in the verse: *"... We reveal to you (Muhammad):" Follow the religion of Abraham, a Hanif "... (An Nahl: 16: 123)*

Now here it is clearly illustrated that Allah has conveyed His revelations to the Prophet Muhammad through the vibrations of the sound frequencies that the Prophet Muhammad could hear and understand *"... " Follow the religion of Abraham, a hanif "... (An Nahl: 16: 123)*

GOD IS BEHIND THE UNREADABLE TABIR BY THE PROPHET MUHAMMAD'S EYE POWER

Now we dig again into the verse: *"... tell (O Muhammad to them) the story of Ismail (that one) in the Quran ... (Maryam: 19: 54)*

Here it is illustrated that Allah is in a place that the Prophet Muhammad's vision cannot reach because Allah is behind the veil. Only the vibration of a frequency sound can be heard and understood by the Prophet Muhammad. As the sound of radio waves that we can hear and enjoy the sound.

ANGELS ARE THE SAME LIKE HUMAN WHO DELIVERES REVELATION TO MAN

Now, if we dig deeper, it is found that humans and angels actually contain the same Deoxyribonucleic acid (DNA). As stated in the verse *"... Then We sent Our spirit to him, so he incarnated before her (in the form of) a perfect human." (Maryam: 19:17)* Based on deoxyribonucleic acid (DNA) humans consist of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoebae, plants, bacteria and archaea. Now we can say that humans are

made up of almost a third of carbon atoms, a quarter of nitrogen atoms, almost a tenth of oxygen atoms and more than a third of hydrogen atoms which are all available around us, in the soil and in the atmosphere. Now if we are based on the verse *Maryam: 19:17* above, it is stated that the angel "... *incarnated before her (in the form) of a perfect human being.*", Then we can say that the angel's body contains the same atomic elements as the atomic elements that build human body.

So the angel's body contains carbon, nitrogen, oxygen and hydrogen atoms as in the human body. This human-like angel conveyed revelations to the Prophet Muhammad. As described in the verse: "... *then Gabriel has sent it down (Al Quran) into your heart with the permission of Allah; ... (Al Baqarah: 2: 97)* and the verse: "*His heart did not deny what he had seen. (An Najm: 53: 11)*

CONCLUSION

Based on the description above, we can conclude that Allah cannot be seen by our eyes.

Because our eyes can only see light in the area of the electromagnetic spectrum between 430 and 740 nanometers. This means that the light that is below the area below 430 nanometers and above 740 nanometers is called unseen. For example, the sunlight that we enjoy every day is in the area of the electromagnetic spectrum between 430 and 740 nanometers. With the limited ability of our eyes to see, it is impossible for humans with their eyes to see Allah.

Therefore, if Allah wants to talk to humans, the method is through revelation or by sending an angel or Allah is in a place where the human eye cannot reach him.

Here it is clearly illustrated that Allah has delivered His revelation
