ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding the spirit of Allah in the form of DNA from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding the spirit of Allah in the form of DNA from the verses:

"And (remember) Maryam bint Imran who kept her honor, so We breathed into her womb some of Our souls, and she confirmed the words of her Lord and His Books, and she was of the obedient ones. (At Tahrir: 66: 12)

"And (remember the story of) Maryam, who kept her honor, then We breathed into her a spirit from Us and We made her and her child a great sign (of Allah's power) for the worlds. (Al Anbiyaa ': 21: 91)

In an effort to unmask the greatness of Allah SWT regarding the spirit of Allah in the form of DNA, I uses the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that God's spirit is DNA which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms as seen from photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

THE SPIRIT OF ALLAH IN THE FORM OF DNA IS BLOWED INTO MARYAM'S WOMB

Now we are together to uncover the secret behind the verse: *"... then We breathed into her womb some of Our spirits,... (At Tahrir: 66: 12)* then we continue to dig up the secret behind the verse: *"... he confirmed words of his Lord and His Books,... (At Tahrir: 66:12)*

Now, it was revealed that the spirit of Allah that was breathed into Maryam's womb was in the form of DNA (deoxyribonucleic acid).

Why?

Because DNA is what makes the building of human life since the meeting of Y-DNA and mitochondrial DNA or the spirit of Allah in Mariyam's womb who then gave birth to Prophet Isa "... *he confirmed the words of his Lord and His Books,...* (At Tahrir: 66: 12)

So now it has been revealed that the spirit of Allah that entered Mariyam's womb was DNA.

Or in other words the Y-DNA that was blown into Maryam's womb then met the mitochondrial DNA in Maryam's womb, so that it became a fetus that would later become the prophet Isa.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: "... *then We breathed into her womb some of Our spirits,...* (At Tahrir: 66: 12) then we continue to dig up the secret behind the verse: "... *he confirmed the words of his Lord and His Books, ...* (At Tahrir: 66:12)

Now, it was revealed that the spirit of Allah that was breathed into Maryam's womb was in the form of DNA (deoxyribonucleic acid).

Why?

Because DNA is what makes the building of human life since the meeting of Y-DNA and mitochondrial DNA or the spirit of Allah in Mariyam's womb who then gave birth to Prophet Isa "... *he confirmed the words of his Lord and His Books,...* (At Tahrir: 66: 12)

So now it has been revealed that the spirit of Allah that entered Mariyam's womb was DNA.

Or in other words the Y-DNA that was blown into Maryam's womb then met with the mitochondrial DNA in Maryam's womb, so that it became a fetus that would later become the prophet Isa.
