### ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT regarding the holy wives in paradise based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

From the entire contents of the Qur'an there are several verses that can be used as the key to unlock the secret of the holy wives in heaven, namely the following verses:

*"Say: "Shall I tell you what is better than that?." For those who fear Allah, with their Lord there is Paradise under which rivers flow; they will abide therein. blessed) with purified wives and the pleasure of Allah. And Allah is All-Seeing of His servants. (Ali 'Imran: 3:15)*

*"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they are adorned with gold and pearl bracelets, and their clothing is silk. (Al Hajj :22:23)*

In an effort to unmask the holy wives in paradise I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

### HYPOTHESIS

Here I propose the hypothesis that the holy wives in paradise are the wives who come from our earth today from the point of view of Deoxyribonucleic acid (DNA).

### DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

### PARADISE IS ON OUR EARTH NOW

Now let us unravel the secret behind the verse: *"...with their Lord there is a paradise under which rivers flow; they will abide in it... (Ali 'Imran: 3:15)*

Then we continue to uncover the secret that is also behind the verse: *"...In paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj: 22:23)*

Now it is revealed that paradise in which there are holy wives, rivers, bracelets of gold and pearls, silk clothes, it turns out that this paradise is on our earth.

Why?

Because gold is the fragments of stars that exploded and died billions of years ago where the fragments of stars containing gold became our present earth which was formed five billion years ago. Likewise, pearls, silk and rivers are all on our earth today.

## **HOLY WIFES IN PARADISE**

Now, if we continue to dig deeper into the verse: "*...they will abide in it...(they are blessed with) purified wives and the pleasure of Allah...(Ali 'Imran: 3:15)*"

Now, holy wives in paradise come from our earth today. Where these wives after death, oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms out of their bodies gather in the afterlife and are in paradise.

So this picture of the sanctified wives is the picture that is shown to us on this earth which is actually these holy wives which are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

And we humans now on this earth are formed from oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

So actually the situation in paradise is no different from the situation on our earth today.

## **CONCLUSION**

Based on the description above we can conclude that the secret behind the verse: "*...with their Lord there is a paradise beneath which rivers flow; they will abide in it... (Ali 'Imran: 3:15)*"

Then we continue to uncover the secret that is also behind the verse: "*...In paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj: 22:23)*"

Now it is revealed that paradise in which there are holy wives, rivers, bracelets of gold and pearls, silk garments turns out to be heaven on our earth.

Why?

Because gold is the fragments of stars that exploded and died billions of years ago where the fragments of stars containing gold became our present earth which was formed five billion years ago.

Likewise, pearls, silk and rivers are all on our earth today.

If we continue to dig deeper into the verse: "*...they are eternal in it...(they are blessed with) purified wives and the pleasure of Allah...(Ali 'Imran: 3:15)*"

Now, holy wives in paradise come from our earth today. Where these wives after death, oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms out of their bodies gather in the afterlife and are in paradise.

So this picture of the sanctified wives is the picture that is shown to us on this earth which is actually these holy wives which are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

We humans now on this earth are formed from oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

So actually the situation in paradise is no different from the situation on our earth today.
