## **ABSTRACT**

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding the parables and humans who were misled by Allah based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

From the entire contents of the Qur'an there are several verses that can be used as keys to unlock the secret of the parables and humans who were misled by Allah, namely ayat:

*"Indeed, Allah does not hesitate to make parables in the form of a mosquito or something lower than that. As for those who believe, they believe that the parable is true from their Lord, but those who disbelieve say: "What is the purpose of Allah making this an example? "With this parable Allah has misled many people, and with this parable (also) many people He has guided. And Allah has not misled except those who are wicked, (Al Baqarah: 2:26)*

In an effort to open the veil of parables and people who have been misled by Allah, I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose a hypothesis that parables can open the mind to the level of Allah's light layer seen from the perspective of Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PARABLES ARE LESSONS THAT CAN UNLOCK THE HUMAN MIND THE LEVEL OF ALLAH'S LAYER**

Now we are together to reveal the secret behind the verse: *"... those who believe,... believe that the parable is true from their Lord... (Al Baqarah: 2: 26)*

Anything on earth and in this universe can be used as a parable.

Why?

Because with parables, the human mind will be filled with great lessons that can bring humans to the level of the layers of Allah's light.

Or in other words, the parable is the opening of the human mind to the path and direction to God.

For example, bacteria are found everywhere in the air, in water, in the soil, on the skin, in the mouth and in the intestines. In our intestines these bacteria help to break down the food we eat.

So this bacteria Allah created to help humans and at the same time as a parable.

Now with the parable of the bacteria, humans who have been given the mind to take lessons from the bacteria, which results from understanding, understanding and deepening these bacteria, humans will reach the highest level of Allah's light layer.

### **THE PARABLE IS THAT YOU CAN BRING THE NATURE OF THE HUMAN MIND TO A PATH THAT GROWS TO THE VALLEY OF ILLUSION**

Why is this parable on earth and the universe able to lead the human mind to a path that slides into the abyss of fantasy?

The answer is *"...With this parable, many people have been misled by Allah.. And none has been misled by Allah except the wicked, (Al Baqarah: 2:26)*

That is, the parables that exist on earth and in the universe cannot fill the human mind to be processed, thought about, analyzed, lived and explored, in the end the parable which is full of secrets only becomes something that is meaningless to him.

For example, with the parable of bacteria, humans who do not use their minds, consider bacteria to be useless and meaningless. And it is considered that bacteria only make human disease and are of no use.

Or in other words, for humans this parable of bacteria is just an illusion or something that has no meaning or something that is destructive and harmful.

### **CONCLUSION**

Based on the description above we can conclude that the secret behind the verse: *"... those who believe,... are sure that the parable is true from their Lord... (Al Baqarah: 2: 26)*

Anything on earth and in this universe can be used as a parable.

Why?

Because with the parable of the human mind, it will be filled with great lessons that can bring humans to the level of the layers of Allah's light.

Or in other words, the parable is the opening of the human mind to the path and direction to God.

For example, bacteria are found everywhere in the air, in water, in the soil, on the skin, in the mouth and in the intestines.

In our intestines these bacteria help to break down the food we eat.

So this bacteria Allah created to help humans and at the same time as a parable.

With the parable of the bacteria, humans who have been given the mind to take lessons from the bacteria, which results from understanding and deepening these bacteria, humans will reach the highest level of Allah's light layer.

Why is this parable on earth and the universe able to lead the human mind to a path that slides into the abyss of fantasy?

The answer is *"...With this parable, many people have been misled by Allah.. And none has been misled by Allah except the wicked, (Al Baqarah: 2:26)*

That is, the parables that exist on earth and in the universe cannot fill the human mind to be processed, thought about, analyzed, lived and explored, in the end the parable which is full of secrets only becomes something that is meaningless to him.

For example, with the parable of bacteria, humans who do not use their minds, consider bacteria to be useless and meaningless. And it is considered that bacteria only make human disease and are of no use.

Or in other words, for humans this parable of bacteria is just an illusion or something that has no meaning or something that is destructive and harmful.
