## **ABSTRACT**

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding the love of the Prophet Yusuf in the palace based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Of the entire contents of the Qur'an, there are two verses that can be used as keys to unlock the secret of Prophet Yusuf's love in the palace, namely the following verses:

*"And the woman (Zulaikha) whom Yusuf lived in his house tempted Yusuf to submit himself (to her) and she closed the doors, saying: "Come here." Yusuf said: "I take refuge in Allah, indeed my master has treated me with kindness. good." Indeed, those who do wrong will not be successful. (Yusuf: 12: 23)*

*"Indeed the woman had intended (to do that) with Yusuf, and Joseph also intended (to do) with the woman if he had not seen the sign (of) his Lord. Thus, that We may turn away from him evil and abominations. Indeed, Joseph is a slave. -Our chosen servant (Joseph: 12:24)*

In an effort to open the veil of love for the prophet Yusuf in the palace, I used a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose the hypothesis that the love of the prophet Yusuf in the palace is love that can be controlled from the point of view of Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **THE CONTROLLED LOVE OF THE PROPHET JOSEPH**

Let's explore the secret behind the verse: *"... the woman (Zulaikha) whom Yusuf lived in his house tempted Yusuf to submit himself (to him) and he closed the doors, saying: "Come here."... ( Joseph: 12:23)*

Then the encouragement and stimulation that came from outside that made a man's desire to hear

the sound of *"Come here."... (Yusuf: 12:23)* apparently the strain of voice that made men melt, it turned out to be a sound filled with the sweetness can be diverted to the path of soothing strains as expressed in the verse: *"... Yusuf said: "I take refuge in Allah, indeed my master has treated me well." (Yusuf: 12: 23)*

Now, here it is revealed that the impulses and desires that come from outside can be diverted and diverted to a path that can calm the heart.

This means that the impulse and desire to aspire is diverted to a normal and natural love path, as husband and wife do in our world.

## **POWERFUL DRIVES AND DESIRE CAN BE CONTROLLED BY THE BRAIN**

Then we uncover the secret behind the verse: *"Indeed the woman had intended (to do the deed) with Joseph, and Yusuf also intended (to do) with the woman... (Yusuf: 12: 24)*

Well, from both directions there is mutual desire, but the control power of the brain that has been embedded in behavior and personality that can change circumstances and situations that are likely to lead to destruction.

Then what is the control power of the brain?

The answer is *"...if he did not see the sign (of) his Lord...(Yusuf: 12:24)*

Well, *"... seeing the sign (from) his Lord... (Yusuf: 12: 24)* means that the prophet Yusuf with the power of his brain control which had previously been doused with a layer of Allah's light that could save him from the desires and impulses of love that could bring to destruction.

Now it is revealed that the urge and desire to make love that can lead to destruction can be controlled by the brain through a layer of Allah's light that has been embedded in the memory in the brain

Or in other words, behavior and personality that have been bathed by a layer of Allah's light that can lead to a natural, normal, pure and holy path of love and desire.

## **CONCLUSION**

Based on the description above, we can conclude that the secret behind the verse: *"... the woman (Zulaikha) who Joseph lived in his house tempted Yusuf to submit himself (to her) and she closed the doors, saying: "Come here. "... (Joseph: 12:23)*

Then the encouragement and stimulation that came from outside that made a man's desire to hear the sound of *"Come here."... Yusuf said: "I take refuge in Allah, indeed my master has treated me well." (Yusuf: 12: 23)*

Here it is revealed that the impulses and desires that come from outside can be diverted and diverted to a path that can calm the heart.

This means that the impulse and desire to aspire is diverted to a normal and natural love path, as husband and wife do in our world.

The secret behind the verse: *"Indeed the woman had intended (to do the deed) with Joseph, and Yusuf also intended (to do also) with the woman...(Yusuf: 12: 24)*

From both directions there is mutual desire, but the control power of the brain that is embedded in behavior and personality that can change circumstances and situations that are likely to lead to destruction.

Then what is the control power of the brain?

It was revealed that the urge and desire to make love that could lead to destruction can be controlled by the brain through a layer of Allah's light that has been embedded in the memory in the brain

Or in other words, behavior and personality that have been bathed by a layer of Allah's light that can lead to a natural, normal, pure and holy path of love and desire.
