ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding time, prayer and the spirit of Allah from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding time, prayer and the spirit of Allah from the verses:

*"So be patient with what they say, and glorify by praising your Lord, before the sun rises and before it sets, and glorify at the times of the night and during the day, so that you may be happy."
(Thaahaa: 20 : 130)*

"If they repent, establish prayer and pay zakat, then (they are) your brethren of the same religion. And We explain the verses for a people who know. (At Taubah: 9:11)

"So when I have perfected the event, and have breathed into it My spirit (creation), then submit to it prostrating yourselves (Al Hijr: 15: 29)

In an effort to unveil the greatness of Allah SWT regarding time, prayer and the spirit of Allah, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis of time, prayer and the spirit of Allah, so that humans remember the time and are grateful for the presence of Allah's spirit in their bodies, seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

TIME IS ILLUSION

Now let's unveil the secret behind the verse: *"...and glorify your Lord before the sun rises and before it sets, and glorify it at night and during the day...(Thaahaa: 20: 130)*

It turns out that here illustrates that time is actually not there.

Why?

Because the time when we are on earth with the time when we are thousands of kilometers above the earth is different.

Well because the time was different means that time was just an illusion.

Now to solve the time which is an illusion, a compensation is made for the time difference between the time we are on earth and the time when we are thousands of kilometers above the earth, so that the time is the same.

Or in other words, we divide the time *"...before sunrise and before sunset and...in the times of the night and during the times of the day,...(Thaahaa: 20: 130)*

So now the time that was previously an illusion becomes a factor that can be used as a guide, such as *"...before sunrise..."* can be determined at 05:00 in the morning if in areas below the equator.

PRAYER IS FOR REMEMBERING TIME AND REMEMBERING THE SPIRIT OF ALLAH IN THE HUMAN BODY

Then we uncover the secret behind the verse: *"...establish prayer...(At Taubah: 9:11)* then we explore the secret behind the verse: *"...before the sun rises and before it sets and... time at night and at times during the day,...(Thaahaa: 20: 130)*

It turns out that now it is revealed that to establish prayer must be associated with following the time, *"...before the sun rises and before sunsets and ... at times of the night and at times during the day, ... : 130)*

Why should prayer be related to time?

Because by following and remembering time, humans will know that life on earth had a beginning and an end.

Now, through prayer, humans must remember the time and must remember that in their bodies there is the spirit of Allah *"...has breathed into it my (creation) spirit,... (Al Hijr: 15: 29)*

So humans when praying remember the time and remember the spirit of Allah who composes the building of the human body which consists of a third of carbon atoms, a quarter of nitrogen atoms, almost a tenth of oxygen atoms and more than a third of hydrogen atoms which all atoms are available all around us, in the soil and in the soil. in the atmosphere.

Or in other words, humans when praying express gratitude to God with the time and with the presence of God's spirit in his body.

CONCLUSION

Based on the description above we can conclude that the secret behind the verse: *"...and glorify by praising your Lord, before the sun rises and before sunsets and glorify at night and during the day,... (Thaaha: 20: 130)*

Here illustrates that time is actually non-existent.

Why?

Because the time when we are on earth with the time when we are thousands of kilometers above the earth is different.

Because the time is different means that time is just an illusion.

Now to solve the time which is an illusion, a compensation is made for the time difference between the time we are on earth and the time when we are thousands of kilometers above the earth, so that the time is the same.

Or in other words, we divide the time *"...before sunrise and before sunset and...in the times of the night and during the times of the day,...(Thaahaa: 20: 130)*

Now the time that was previously an illusion becomes a factor that can be used as a guide, such as *"...before the sun rises..."* can be determined at 05:00 in the morning if in areas below the equator.

We uncover the secret behind the verse: *"...establish prayer...(At Taubah: 9:11)* then we explore the secret behind the verse: *"...before the sun rises and before it sets and... at night and at times of the day,...(Thaahaa: 20: 130)*

Now it is revealed that to establish prayer must be associated with following the time, *"...before the sun rises and before sunsets and ... at times of the night and during the times of the day,...(Thaahaa: 20: 130)*

Why should prayer be related to time?

Because by following and remembering time, humans will know that life on earth had a beginning and an end.

Through prayer, man must remember the time and must remember that in his body is the spirit of Allah *"...has breathed into it my (creation) spirit,... (Al Hijr: 15: 29)*

So humans when praying remember the time and remember the spirit of Allah who composes the building of the human body which consists of a third of carbon atoms, a quarter of nitrogen atoms, almost a tenth of oxygen atoms and more than a third of hydrogen atoms which all atoms are available all around us, in the soil and in the soil. in the atmosphere.

Or in other words, humans when praying express gratitude to Allah with the time and with the presence of Allah's spirit in his body.
