ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding how things really are in heaven from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding how things really are in heaven in the verses:

"In Paradise there are many fruits for you, some of which you eat. (Az Zukhruf: 43: 73)

"And give good tidings to those who believe and do good, that for them there are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say: "This is what was given to them. us first." They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah: 2:25)

"(And Allah said): "O Adam, dwell you and your wife in Paradise and both of you eat (fruit) wherever you like, and do not both of you approach this tree, then be both of you of those who unjust." (Al A'raaf: 7: 19)

In an effort to unveil the greatness of Allah SWT regarding how things really are in heaven, I use the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that the conditions in heaven are the same as the conditions in heaven when Prophet Adam and his wife were expelled from heaven in terms of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoeba, plants, bacteria and archaea.

THE STATE OF PARADISE WHEN THE PROPHET ADAM AND HIS WIFE STILL LIVED IN IT

Now let's explore what is behind the verse: *"(And Allah said): "O Adam, dwell you and your wife in Paradise and eat both of you (fruits) wherever you like, and do not both of you approach this tree. , then be both of you of the wrongdoers." (Al A'raaf: 7: 19)*

Well, it turns out that the fruits and trees in heaven have the same deoxyribonucleic acid (DNA) as the DNA in the bodies of Prophet Adam and his wife.

Why do the fruits and trees that are in heaven have the same DNA as the DNA in the body of the Prophet Adam and his wife?

The answer is

Because the fruits in heaven can be eaten by Prophet Adam and his wife, because they contain carbon atoms, oxygen atoms, hydrogen atoms and carbon atoms.

There are also similarities in the DNA composition of fruits with the DNA of the Prophet Adam and his wife.

So the state of paradise when Prophet Adam and his wife still lived in it was not much different from the situation on our earth today.

The DNA of the Prophet Adam and his wife is the same as the DNA of humans today, which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

THE PARADISE THAT THE BELIEVERS WILL ENTER IS THE SAME PARADISE WITH THE PARADISE WHICH WERE INHALED BY THE PROPHET ADAM AND HIS WIFE

Now we unpack the secret behind the verse: *"(And Allah said): "O Adam, dwell you and your wife in heaven and eat both of you (fruits) wherever you like,...(Al A'raaf :7:19)*

It turns out that the fruits eaten by Prophet Adam and his wife are the same fruits as the fruits that exist on our earth today. T

hen we dig up the secret behind the verse: *"And convey good news to those who believe and do good, that for them there are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say : " This is what was given to us before . " They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah : 2:25)*

Now, it was revealed that the fruits that are intended for believers in heaven are the same as the fruits that are on our earth today. It is also the same with the fruits eaten by Adam and his wife when Adam and his wife were still in heaven.

THE PARADISE INHALED BY THE PROPHET ADAM AND HIS WIFE IS IN OUR EARTH

Because the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms in the bodies of Prophet Adam and his wife are the same as carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms in the soil of our earth.

THE PARADISE THAT THE BELIEVERS WILL ENTER IS IN OUR EARTH

So, let's dig into the secret behind the verse: *"...Every time they are given sustenance of fruits in those paradises, they say: "This is what was given to us before."... (Al Baqarah: 2: 25)*

It turns out that now it is revealed that the fruits that are given in heaven are the same as the fruits on this earth *"This is what was given to us before."... (Al Baqarah: 2: 25)*

This means that the fruits eaten in Paradise are the same as the fruits eaten by believers when that person was still alive on earth.

WHERE REALLY IS PARADISE

Well, because humans who have died and are buried in the ground, what comes out of their bodies are carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms. Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are all around us and in the atmosphere.

Because humans who enter heaven are in the form of carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, where human humans in the form of these atoms are invisible to our eyes.

But they actually live and exist all around us and exist in our nature.

They enjoy the paradise that Allah has promised us all. When they ate the fruit they said: *"This is what was given to us before." (Al Baqarah: 2: 25)*

CONCLUSION

Based on the description above, we can conclude that what is behind the verse: *"(And Allah said): "O Adam, dwell you and your wife in Paradise and eat both of you (fruits) wherever you like, and do not both of you approach this tree. , then be both of you of the wrongdoers." (Al A'raaf: 7: 19)*

Well, it turns out that the fruits and trees in heaven have the same deoxyribonucleic acid (DNA) as the DNA in the bodies of Prophet Adam and his wife.

Why do the fruits and trees that are in heaven have the same DNA as the DNA in the body of the Prophet Adam and his wife?

The answer is

Because the fruits in heaven can be eaten by Prophet Adam and his wife, because they contain carbon atoms, oxygen atoms, hydrogen atoms and carbon atoms.

There are also similarities in the DNA composition of fruits with the DNA of the Prophet Adam and his wife.

So the state of paradise when Prophet Adam and his wife still lived in it was not much different from the situation on our earth today.

The DNA of the Prophet Adam and his wife is the same as the DNA of humans today, which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Now we unpack the secret behind the verse: ***"(And Allah said): "O Adam, dwell you and your wife in heaven and eat both of you (fruits) wherever you like,...(Al A'raaf :7:19)***

It turns out that the fruits eaten by Prophet Adam and his wife are the same fruits as the fruits that exist on our earth today. T

hen we dig up the secret behind the verse: ***"And convey good news to those who believe and do good, that for them there are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say : " This is what was given to us before . " They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah : 2:25)***

Now, it was revealed that the fruits that are intended for believers in heaven are the same as the fruits that are on our earth today. It is also the same with the fruits eaten by Adam and his wife when Adam and his wife were still in heaven.

Because the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms in the bodies of Prophet Adam and his wife are the same as carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms in the soil of our earth.

So, let's dig into the secret behind the verse: ***"...Every time they are given sustenance of fruits in those paradises, they say: "This is what was given to us before."...(Al Baqarah: 2: 25)***

It turns out that now it is revealed that the fruits that are given in heaven are the same as the fruits on this earth ***"This is what was given to us before."... (Al Baqarah: 2: 25)***

This means that the fruits eaten in Paradise are the same as the fruits eaten by believers when that person was still alive on earth.

Well, because humans who have died and are buried in the ground, what comes out of their bodies are carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms. Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are all around us and in the atmosphere.

Because humans who enter heaven are in the form of carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, where human humans in the form of these atoms are invisible to our eyes.

But they actually live and exist all around us and exist in our nature.

They enjoy the paradise that Allah has promised us all. When they ate the fruit they said: ***"This is what was given to us before." (Al Baqarah: 2: 25)***
