ABSTRACT

Before I write God's secret problem about why God created Satan to be a rival to God from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking tool about why Allah created Satan to be Allah's rival, namely the following verses:

"And thus We made enemies for every prophet, namely satan-satan human and jinn, some of them whispering to others beautiful words to deceive. If your Lord had willed, they would not have done it, then leave them and what they invented. (Al An'aam: 6:112)

"And (remember) when We said to the angels: "Prostrate yourselves to Adam, then prostrate them except Devil. He is from the group of jinn, so he disobeys the command of his Lord. Should you take him and his descendants as leaders other than Me, while they are your enemies? Very bad is the devil as a substitute (from Allah) for the wrongdoers. (Al Kahf: 18: 50)

"Have I not commanded you, O Children of Adam, that you do not worship Satan? Verily, Satan is a real enemy to you." (Yaasiin: 36:60)

In an attempt to unmask Allah's secret about why Allah created Satan to be a rival to Allah, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah created Satan to be Allah's rival so that it is easy to filter out people who believe in Allah from the basic point of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

ALLAH CREATED SATAN

Now, we are trying to focus our minds to reveal the secret hidden behind the verse: *"And thus We made enemies for every prophet, namely satan-satan human and jinn, .. (Al An'aam: 6: 112)*

It turns out that there are similarities between the devil, humans and jinn. Where the similarities are because *"... the human devils... (Al An'aam: 6 112) "... We created the jinn before (Adam) from a very hot fire". (Al Hijr: 15: 27)*

"... a very hot fire..." (Al Hijr: 15:27) in which hidden elements of oxygen atoms are very easily oxidized with combustible materials and with friction.

So in the body of devil, satan, humans and jinn there contain oxygen atoms

Now because humans contain Deoxyribonucleic acid (DNA) which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So in the body of the devil, the satan and the jinn also contain 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

SATAN BECOME ALLAH'S COMPETITION

Now, if we reveal the secret behind the verse: *"Didn't I command you, O Children of Adam, that you not worship the devil? Verily, Satan is a real enemy to you." (Yaasiin: 36:60)*

Apparently the devil created by Allah from *"... a very hot fire..." (Al Hijr: 15:27)* in which hidden oxygen atoms have become Allah's rival, Allah's opponent and Allah's enemy.

WHY ALLAH NEEDS SATAN AS ALLAH'S COMPETITION

Now, let's unveil the secret behind the verse: *"... the devil. He is from the jinn group,... should you take him and his descendants as leaders other than me,.. (Al Kahf: 18: 50)*

Apparently, the devil is the same as the jinn, the same as humans and the same as the satan. They contain oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Now it has been revealed that Allah created the devils and satans on our earth so that it is easy for Allah to filter out *"... whoever among them truly believes in Allah, the Last Day and does good deeds, they will receive a reward from their Lord, no there is concern for them, ... (Al Baqarah: 2: 62)*

Because without the devil and the satan, we don't know *"...who... truly believes in Allah, the last day and does good deeds,..(Al Baqarah: 2: 62)*

CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: *"And thus We made enemies for every prophet, namely satan-satan human and jinn, .. (Al An'aam: 6: 112)*

It turns out that there are similarities between the devil, humans and jinn. Where the similarities are because *"... the human devils... (Al An'aam: 6 112) "... We created the jinn before (Adam) from a very hot fire". (Al Hijr: 15: 27)*

"... a very hot fire..." (Al Hijr: 15:27) in which hidden elements of oxygen atoms are very easily oxidized with combustible materials and with friction.

So in the body of devil, satan, humans and jinn there contain oxygen atoms

Now because humans contain Deoxyribonucleic acid (DNA) which consists of 32.20% carbon

atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So in the body of the devil, the satan and the jinn also contain 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Now, if we reveal the secret behind the verse: ***"Didn't I command you, O Children of Adam, that you not worship the devil? Verily, Satan is a real enemy to you."*** (Yaasiin: 36:60)

Apparently the devil created by Allah from ***"... a very hot fire..."*** (Al Hijr: 15:27) in which hidden oxygen atoms have become Allah's rival, Allah's opponent and Allah's enemy.

Now, let's unveil the secret behind the verse: ***"... the devil. He is from the jinn group,... should you take him and his descendants as leaders other than me,.."*** (Al Kahf: 18: 50)

Apparently, the devil is the same as the jinn, the same as humans and the same as the satan. They contain oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Now it has been revealed that Allah created the devils and satans on our earth so that it is easy for Allah to filter out ***"... whoever among them truly believes in Allah, the Last Day and does good deeds, they will receive a reward from their Lord, no there is concern for them, ..."*** (Al Baqarah: 2: 62)

Because without the devil and the satan, we don't know ***"...who... truly believes in Allah, the last day and does good deeds,.."***(Al Baqarah: 2: 62)
