## **ABSTRACT**

First of all, by asking forgiveness from Allah SWT here I am trying to reveal the signs of Allah SWT about Allah's secret about where gold comes into paradise based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an found several verses that are the key to unlocking the secret of where gold comes into paradise, namely the following verses:

*"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they are adorned with gold and pearl bracelets, and their clothing is silk. (Al Hajj :22:23)*

*"Glory be to (Allah) who, if He willed, He would have made for you something better than this, (ie) gardens under which rivers flow, and He made (also) for you palaces. ( Al Furqaan: 25:10)*

In an effort to unmask the secret of Allah from which gold comes into paradise based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose a hypothesis in paradise that gold comes from the fragments of a dead star, then the shards of stars containing gold enter paradise from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

To find out quarks, let's look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## **STARS THAT DIE SPREAD MILLIONS OF MILLIONS OF STAR CONTENTS, WHERE THE SHARES THAT BECOME GOLD ENTER THE EARTH'S GRAVITY AND STORED IN THE EARTH'S BELLY**

When a star that has run out of hydrogen atoms and helium atoms to burn finally finds its end by spewing out millions of fragments of its contents, it spreads throughout the Milky Way galaxy.

Where the broken entrails of the dead star turn to gold. This lump of gold continues to float in the universe which is finally attracted by the earth's gravity and enters the bowels of the earth.

Finally a lump of gold from a dead star is in the bowels of the earth, then dug up by humans to be used as jewelry and a medium of exchange for money.

## **IN PARADISDE THERE IS GOLD**

Now, let's unveil the secret behind the verse: *"...In heaven they will be decorated with gold bracelets...* (Al Hajj: 22: 23)

It turns out, seen and clearly revealed, that because gold cannot be made by humans, it occurs when a dead star spews out millions of its contents, some of the contents of the star containing gold then enter the bowels of the earth because of the earth's gravity.

Well, finally this gold is in paradise.

How can gold be in paradise?

The answer is

Because paradise is on our earth today.

So that gold is made as jewelry bracelets for women who believe in Allah, in paradise.

These women who believe in Allah were not only *"...given adornments with bracelets of gold..."* but were also given *"...pearls, and their garments were silk. (Al Hajj: 22:23)*

## **PARADISE IS CREATED ON OUR EARTH NOW**

Now, the secret behind the verse has been revealed: *"...In Paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj: 22: 23)*

It turns out that this paradise is a paradise created by Allah on our earth today.

## **CONCLUSION**

Based on the description above, we can conclude that When a star that has run out of hydrogen

atoms and helium atoms to burn finally finds its end by spewing out millions of fragments of its contents, it spreads throughout the Milky Way galaxy.

Where the broken entrails of the dead star turn to gold. This lump of gold continues to float in the universe which is finally attracted by the earth's gravity and enters the bowels of the earth.

Finally a lump of gold from a dead star is in the bowels of the earth, then dug up by humans to be used as jewelry and a medium of exchange for money.

Now, let's unveil the secret behind the verse: *"...In heaven they will be decorated with gold bracelets... (Al Hajj: 22: 23)*

It turns out, seen and clearly revealed, that because gold cannot be made by humans, it occurs when a dead star spews out millions of its contents, some of the contents of the star containing gold then enter the bowels of the earth because of the earth's gravity.

Well, finally this gold is in paradise.

How can gold be in paradise?

The answer is

Because paradise is on our earth today.

So that gold is made as jewelry bracelets for women who believe in Allah, in paradise.

These women who believe in Allah were not only *"...given adornments with bracelets of gold..."* but were also given *"...pearls, and their garments were silk. (Al Hajj: 22:23)*

Now, the secret behind the verse has been revealed: *"...In Paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj: 22: 23)*

It turns out that this paradise is a paradise created by Allah on our earth today.
