ABSTRACT

Previously, the author asked forgiveness from Allah SWT. Here I try to open the veil that covers Allah's secret about how Allah conveys revelation from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses in the Qur'an that write about the problem of Allah conveying revelation, namely the following verses:

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger (angel) and then it is revealed to him with His permission what He wills..." "... Gabriel has sent it down (Al Quran) into your heart with Allah's permission;...(Al Baqarah: 2: 97)

"...then We sent our spirit to him, then he appeared before him (in the form of) a perfect human being. (Maryam: 19:17)

"...and (that Gabriel) appeared in his true form. (An Najm: 53: 6)

"... And indeed Muhammad saw Gabriel (in his original appearance) at another time, (An Najm: 53: 13)

"... And indeed Muhammad saw Gabriel on the horizon bright. (At Takwiir: 81: 23)

"Allah is the light of the heavens and the earth....Light upon light (in layers),...(An Nuur: 24: 35)

Where in an effort to open the veil about how Allah conveyed revelations, I based on deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah conveys revelation indirectly but through an intermediary based on the basis of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

ALLAH NEEDS A HUMAN MESSENGER TO SUBMIT REVELATION

Now, we concentrate on digging the secret behind the verse: *"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger (angel) and then it is revealed to him by His permission what He want...(Asy Shuura : 42:51)*

Well, it turns out that it is impossible for a human being to directly talk to Allah.

Why can't humans talk directly to Allah?

The answer is

"Allah is the light of the heavens and the earth....Light upon light (in layers),...(An Nuur: 24: 35)

This means that humans must understand and the brain must understand the vibrations of the frequency waves of Allah's light layer which are conveyed directly by Allah.

Therefore, to convey revelation to a human being, Allah *"... sent a messenger (angel) ... (Asy Syuura: 42: 51) "... then We sent Our spirit to him, then he incarnated before him (in form) perfect human (Maryam: 19:17)*

Well, the messenger of Allah is a perfect man.

Why does the messenger have to be a human?

The answer is

So that people who will be given revelation understand what will be revealed.

"...And indeed Muhammad saw Gabriel (in his original appearance) at another time, (An Najm: 53:13) "... We sent our spirit to him, so he appeared before him (in the form of) a perfect human. (Maryam: 19:17)

So it is revealed now that Gabriel, the messenger of Allah, is a human.

REVELATION WAS SUBJECT TO THE MIND OF THE PROPHET MUHAMMAD AND STORED IN THE MEMORY OR HIPPOCAMPUS IN THE BRAIN

Well, let's dig into the secret behind the verse: *"... Gabriel has sent it down (Al Quran) into your heart by Allah's permission; It turns out that what is meant by "...into your heart;...(Al Baqarah: 2:97)* is into your mind.

Because the heart is not to store information, where the term heart is only a symbol.

All the revelations conveyed are stored in a memory called the hippocampus in the brain.

Now, the secret behind the verse has been revealed: *"... Gabriel has sent it down (Al Quran) into your heart with Allah's permission;... (Al Baqarah: 2: 97)*

This means that Allah conveyed revelations to the Prophet Muhammad through messengers, where Allah's messengers were humans.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger (angel) and then it is revealed to him by His permission what He want... (Asy Shuura : 42:51)*
