

EXPLORING ALLAH'S SECRETS ABOUT HOW
ALLAH REPLACED THE EARTH AND SKY WITH
ANOTHER EARTH AND SKY

ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about how Allah replaced the earth and sky with another earth and sky based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an there is a verse that is the key to unlocking the secret of how Allah replaced the earth and sky with another earth and sky, namely the verse:

"(That is) on the day (when) the earth is replaced with another earth and (as well as) the sky, and they all (in the field of Mahsyar) gather to face the presence of Allah, the One, the Most Mighty. (Ibrahim: 14: 48)

"Allah is the light of the heavens and the earth....Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24:35)

In an effort to unmask how Allah replaced the earth and sky with another earth and sky based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah replaces the earth and sky with another earth and sky which contains atoms, oxygen, atoms, hydrogen, nitrogen atoms, carbon atoms based on photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building

blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

WHERE TO MEET TO FACE ALLAH

Well, now we focus on revealing the secret behind the verse: *"(That is) on the day (when)... they all (in the Mahsyar field) gathered to face the presence of Allah... (Ibrahim: 14: 48)*

It turns out that the gathering place is somewhere that is *"...another earth...(Ibrahim: 14:48)*

What is another earth?

The answer is Earth which contains oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms, before these atoms disappear from this universe.

Why do humans gather in other places on earth that contain oxygen atoms, atoms, hydrogen atoms, nitrogen atoms, carbon atoms?

The answer is

Because humans gathered on other earths are also in the form of oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms.

ATOMS WILL BE GONE WHICH LEAVE PHOTON AND QUARK

We continue to explore the secret behind the verse: *"... on the day (when)... the sky is replaced... (Ibrahim: 14: 48)*

Well, it turns out that it is clearly illustrated here, not only the earth is replaced with another earth, but also the sky is replaced with another sky.

What is another sky?

The answer is A sky filled with oxygen atoms, atoms, hydrogen atoms, nitrogen atoms, carbon atoms

So, before the atoms disappear, only photons and quarks remain, then humans in the form of oxygen atoms, atoms, hydrogen atoms, nitrogen atoms, carbon atoms are gathered before Allah.

**AFTER 10000000000 0000000000 0000000000 0000000000 0000000000 0000000000
0000000000 0000000000 0000000000 0000000000 YEARS FROM NOW THE UNIVERSE
WILL RETURN WITHOUT PHOTON AND QUARK**

Now, when will the Day of Judgment occur when *"...the sky is rolled up..." (Az Zumar: 39: 67) ?*

The answer is

"...Indeed the knowledge of the Day of Judgment is with Allah..." (Al A'raaf: 7: 187)

Well, the time *"... the Day of Judgment is with Allah..." (Al A'raaf: 7: 187)*

Why?

Because for example, if the space of our Milky Way galaxy is rolled up, it's not called doomsday, why?

Because in our universe there are still billions of galaxies that have not been rolled up.

So because billions of galaxies have not been rolled up, the so-called apocalypse has not yet happened. The time *"... the Day of Judgment is with Allah..." (Al A'raaf: 7: 187)*

Only, we can now calculate, when the apocalypse will occur, namely after 10 billion billion billion billion billion billion billion billion years from now.

Why did the apocalypse happen after 10 billion billion billion billion billion billion billion billion billion billion billion years from now?

The answer is After 10 billion billion billion billion billion billion billion billion billion billion billion years from now the energy holding the atoms together is gone so that the atoms will be destroyed, leaving only photons and quarks

Or in other words, the one who remains eternally alive is Allah. Apart from Allah everything is lost.

BEFORE THE UNIVERSE AND ITS CONTENTS WAS GONE HUMANS COLLECTED IN OTHER EARTH AND SKY

This is the secret that was revealed from the verse: *"... on the day (when)... they all (in the field of Mahsyar) gathered to face the presence of Allah... (Ibrahim: 14: 48)*

Namely humans in the form of oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms that are gathered on the earth and other heavens, asked for all their worship by Allah So before the atoms that make up humans on the earth and other skies disappear, because after 10 billion billion billion billion billion billion billion billion years from now there are only photons and quarks left.

ALL THE ATOMS IN THIS UNIVERSE WILL RETURN TO QUARK

This is the secret revealed from the verse: *"(That is) on the day (when) the earth is replaced with another earth and (as well as) the sky, and they all (in the Mahsyar field) gather to face the presence of Allah, the One, the Most Mighty. (Abraham: 14:48)*

Or in other words, before all the atoms that exist in this universe disappear, only quarks remain, then humans in the form of oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms are collected in the earth and other heavens, to be asked for all their deeds of worship by Allah.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"(That is) on the day (when)... they all (in the Mahsyar field) gathered to face the presence of Allah... (Ibrahim: 14: 48)*

It turns out that the gathering place is somewhere that is *"...another earth...(Ibrahim: 14:48)*

destroyed, leaving only photons and quarks

Or in other words, the one who remains eternally alive is Allah. Apart from Allah everything is lost.

This is the secret that was revealed from the verse: *"... on the day (when)... they all (in the field of Mahsyar) gathered to face the presence of Allah... (Ibrahim: 14: 48)*

Namely humans in the form of oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms that are gathered on the earth and other heavens, asked for all their worship by Allah So before the atoms that make up humans on the earth and other skies disappear, because after 10 billion billion billion billion billion billion billion billion years from now there are only photons and quarks left.

This is the secret revealed from the verse: *"(That is) on the day (when) the earth is replaced with another earth and (as well as) the sky, and they all (in the Mahsyar field) gather to face the presence of Allah, the One, the Most Mighty. (Abraham: 14:48)*

Or in other words, before all the atoms that exist in this universe disappear, only quarks remain, then humans in the form of oxygen atoms, atoms, hydrogen, nitrogen atoms, carbon atoms are collected in the earth and other heavens, to be asked for all their deeds of worship by Allah.
