ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT's greatness regarding young people who are still young serving believing women in paradise based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).)

In the Qur'an, several verses are found that are the key to unlocking the secret of young people who remain young serving believing women in paradise, namely the following verses:

"They are surrounded by young people who remain young, (Al Waaqi'ah: 56:17)

"And around them young people to (serve) them, as if they were pearls stored up. (Ath Thuur: 52:24)

"And they are surrounded by young servants who are still young. When you see them, you will think they are pearls that are scattered. (Al Insaan: 76: 19)

"So Allah saved them from the troubles of that day, and gave them clarity (face) and joy of heart. (Al Insaan: 76:11)

"And those who believe, and whose children and grandchildren follow them in faith, We connect their offspring with them, and We do not deduct anything from the reward of their deeds. Every human being is bound by what he does. (Ath Thuur: 52:21)

In an effort to open the veil about young people who remain young serving women of faith in paradise based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that young people who remain young are atoms of oxygen, hydrogen atoms, atoms, nitrogen and carbon atoms serving believing women in paradise from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

WOMEN WHO BELIEVE IN ALLAH IN PARADISE ENJOYING UNLIMITED FUN

Now, together we explore the secret that lies behind the verse: *"...Allah save them from the troubles of that day, and give them clarity (face) and joy of heart. (Al Insaan: 76:11)*

It turns out that the picture of pleasure in paradise is not only enjoyed by men but also women, where they are women who believe, who are submissive and obedient to Allah *"...Allah save them from the troubles of that day... (Al Insaan: 76:11)*

A pleasure that can not be compared with the pleasures that exist on this earth.

WOMEN WHO BELIEVE IN ALLAH SURROUNDED BY YOUNG CHILDREN WHO ARE YOUNG

We uncover the secret behind the verse: *"...Allah...gives them clarity (face) and joy of heart. (Al Insaan: 76:11) by "...going around them young people to (serve) them,...(Ath Thuur: 52:24)*

A pleasure for women of faith that is incomparable. *"And they are surrounded by young servants who remain young...(Al Insaan: 76: 19)*

YOUNG CHILDREN ARE LIKE PEARL STANDING AROUND THE WOMEN WHO BELIEVE IN ALLAH

We continue to dig the secret behind the verse: *"...you will think they are scattered pearls. (Al Insaan: 76: 19)*

It turns out that these are all pleasures that cannot be compared with the pleasures that exist on our earth today, where these women who believe in Allah get services that are hard to find on our earth, where young people who remain young are like *"... studded pearls. (Al Insaan: 76: 19) which "... as if they were pearls that are stored. (Ath Thuur: 52: 24)*

Now we continue to unravel the secret behind the verse: *"And those who believe, and whose offspring follow them in faith, We connect their offspring with them, and We do not reduce the reward of their deeds in the slightest. Every human being is bound by what he does. (Ath Thuur: 52:21)*

Apparently now, it was revealed that eternal pleasure is not only enjoyed by men who believe in Allah, but also by women who believe in Allah.

CONCLUSION

Based on the description above, we can conclude that the secret that lies behind the verse: *"...Allah*

save them from the troubles of that day, and give them clarity (face) and joy of heart. (Al Insaan: 76:11)

It turns out that the picture of pleasure in paradise is not only enjoyed by men but also women, where they are women who believe, who are submissive and obedient to Allah *"...Allah save them from the troubles of that day... (Al Insaan: 76:11)*
