ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to open up the signs of Allah SWT regarding when we pray and ask Allah not to include time based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

In the Qur'an found several verses that are the key to unlocking the secret about when we pray and ask Allah not to include time, namely the following verses:

"Allah is the light of the sky and the earth "... Light upon light (in layers), Allah guides to His light whom He wills,"... (An Nuur: 24: 35)

"The angels and Gabriel ascended (to face) Allah in a day whose level is fifty thousand years. (Al Ma'aarij: 70: 4)

"And your Lord said: "Pray to Me, I will surely allow you. Verily, those who pride themselves on worshiping Me will enter Hell in a state of humiliation." (Al Mu'min: 40:60)

"Man has been made hasty. Later I will show you the signs of My doom. So don't ask Me to bring it right away. (Al Anbiyaa ': 21: 37)

In an effort to open the veil about when we pray and ask Allah, do not include when I base on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis because there is a difference in the calculation of time between humans and Allah, so when we pray and ask Allah not to include time from the point of view of photons, quarks and Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

ALLAH'S TIME IS DIFFERENT WITH HUMAN TIME

Now we are trying to unravel the secrets that are hidden behind the verse: "*Humans have been made hasty... (Al Anbiyaa': 21: 37) Mu'min: 40: 60*)

Apparently, it is proven that humans are people who want to happen as soon as possible and do it.

However, if it has anything to do with Allah, then the human desire to be carried out immediately and the result will be disastrous.

Why ?

The answer is

Hidden in the verse, namely, Allah's time is "*... in a day the measure of which is fifty thousand years. (Al Ma'aarij: 70: 4)*

So, if we compare the calculation of **1 hour** according to Allah's calculation, it is equal to **760 932 days** or equal to **2 083.38 years**.

HUMANS HAVE BEEN RUSH

Well, it is proven, whatever is desired and yearned for by humans, wants to be immediately granted, but Allah has warned: "*...So do not ask Me to bring it immediately. (Al Anbiyaa ' : 21: 37)*

Now, why does Allah forbid us to ask and pray to Allah to be granted soon?

The answer is

The secret is kept in the verse: "*... in a day whose levels are fifty thousand years. (Al Ma'aarij: 70: 4)*

This means, for example, if we ask and pray to Allah: **O Allah, give us abundant sustenance today.**

So, what happens to time, if our prayers are answered?

The answer is

It must be a disaster for us.

Why?

Because, we ask and pray to Allah to be given sustenance today.

So if today, for example, within 1 hour, what happens to the prayer that is answered by Allah?

It turns out that **1 hour** according to Allah's reckoning is equal to **2 083.38 years** according to human reckoning.

This is what is called a catastrophe, because of our ignorance about the calculation of time according to Allah which is different from the time of reckoning according to humans.

WHEN WE PRAY AND ASK ALLAH DO NOT INVEST TIME

Now, for example, we pray and ask Allah: **O Allah, give us lots of sustenance.**

Well, in the above prayer, we do not include time. Time is left to God. Because time belongs to Allah.

"And your Lord said: *"Pray to Me, I will surely allow it to you... (Al Mu'min: 40: 60)*

CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden behind the verse: *"Humans have been made hasty... (Al Anbiyaa': 21: 37) Mu'min: 40: 60)*

Apparently, it is proven that humans are people who want to happen as soon as possible and do it.
