ABSTRACT

Previously, I asked forgiveness from Allah SWT. Here the author tries to open the veil of love in paradise from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

In the Qur'an there are several verses that the author considers to be able to reveal the secret of making love in paradise, namely the verse:

"They reclined on couches in a row and We married them to beautiful fair-eyed nymphs. (Ath Thuur: 52:20)

Where in an effort to open the veil of love in heaven I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis of making love in paradise is eternal love according to the basis of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

MARRIED IN PARADISE

Let us now together to reveal the secret behind the verse: *"they are lying on the couch in a row...(Ath Thuur: 52:20)*

It turns out that here it is revealed that the male couple who are waiting and will perform the marriage contract to be married to an nymph in paradise.

Who will marry the male who are waiting while sitting on this couch?

The answer is *"... We married them to nymph..." (Ath Thuur: 52:20)*

It turns out that Allah married a male to an nymph in paradise.

The question now is

What if the man already had a wife when he was alive on this earth?

The answer is Men who already have wives and they are both in paradise, then they no longer need to be married.

They are living already as husband and wife.

Why should we marry in paradise?

The answer is Family life in paradise is not much different from family life on our earth today.

The difference is that family life in paradise is a family life that does not increase and grow.

This means that family life is only for husband and wife for all time and eternal.

LOVE IN PARADISE IS ETERNAL LOVE

Then we explore the secret behind the verse: *"... We married them to nymph..." (Ath Thuur: 52:20)* is not for them to build a household and give birth to children, but to build a household for a life full of love love forever, everlasting.

Now it is revealed that marrying and making love in paradise is to enjoy the pleasures of life in paradise that will never end. A life full of love forever.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"they are lying on the couch in a row...(Ath Thuur: 52:20)*
