ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT regarding the secret of Allah where Allah is close based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an found several verses that are the key to unlocking the secret of Allah's secret where Allah is near, namely the following verses:

"Allah is the light of the heavens and the earth"....Light upon light (in layers), Allah guides to His light whom He wills,...(An Nuur: 24: 35)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth.(Al Baqarah: 2:186)

"The angels and Gabriel ascended (to face) God in a day whose level is fifty thousand years. (Al Ma'aarij: 70: 4)

"... We are closer to him than his jugular vein, (Qaf: 50:16)

"...Indeed the Messiah, Jesus the son of Mary, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4:171)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)

"... Moses said: "O my Lord, show me (yourself) so that I can see you." The Lord said: "You can never see me, but look at that hill, so if he stays on where it was (as before) you will surely see Me." When his Lord appeared to the mountain, he made the mountain crumble and Moses fell unconscious..." (Al A'raaf: 7: 143)

In an effort to unmask the mystery of Allah where Allah is near, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah is near because the spirit of Allah is in the human body from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen

atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

ALLAH IS NEAR

Now, let's focus fully on exploring and revealing the secret behind the verse: *"And when My servants ask you about Me, then, that I am near.. (Al Baqarah: 2: 186)*

The question now is

To what extent is Allah close to our bodies?

The answer is

Stored in a secret contained in the verse: *"...Indeed the Messiah, Jesus son of Mary, is...a spirit from Him... (An Nisaa ': 4: 171)*

Well, now it is clearly revealed, where Jesus son of Mary is a human like us today.

Now, because Jesus son of Mary is a human like us, then in our bodies we also contain *"...spirit from Him... (An Nisaa': 4:171)*

That is, all humans on this earth contain *"... a spirit from Him... (An Nisaa ': 4: 171)*

Where *"...the spirit from Him... (An Nisaa' : 4: 171)* is no different from Allah *"...has breathed into it my spirit,... (Al Hijr: 15: 29)* into the body Adam.

So now it is revealed, Adam, Isa son of Maryam and all humans on earth contain *"... a spirit from Him... (An Nisaa ': 4:171)*

TO MEET ALLAH MUST SEE INSIDE OURSELVES

Now, *"...that I am near...(Al Baqarah: 2: 186)* where near is *"...closer to him than his jugular vein, (Qaaf: 50:16) .*

So, actually to meet Allah is we have to see and study our own circumstances.

As the Prophet Moses pointed out *"...When his Lord appeared to the mountain, he made it crumble and*

Moses fell unconscious..." (Al A'raaf: 7: 143)

Well, here it is clearly seen that the Prophet Moses saw Allah not in the body of a living creature like us humans, but in the form of ***".. my spirit, ... (Al Hijr: 15: 29)*** or ***"... the spirit of- Nya... (An Nisaa' : 4: 171)***

It means, ***".. My spirit, ... (Al Hijr: 15: 29)*** which is the origin and source of human life.

The origin and source of human life is Deoxyribonucleic acid (DNA).

Where based on todeoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Or in other words, if we study oxygen atoms or hydrogen atoms or nitrogen atoms or carbon atoms, then we will arrive and meet Allah.

Why?

The answer is

Because carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are the building blocks of ***".. My spirit,...(Al Hijr: 15: 29)*** or ***"...spirit from Him... (An Nisaa': 4 : 171)***

Now the secret behind the verse has been revealed: ***"And when My servants ask you about Me, then, that I am near... (Al Baqarah: 2: 186)***

Namely ***"...I am near...(Al Baqarah: 2: 186)*** because the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are the building blocks of ***".. My spirit,...(Al Hijr: 15: 29)*** or ***"...the spirit from Him... (An Nisaa' : 4:171)*** is in our bodies.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: ***"And when My servants ask you about Me, then, that I am near... (Al Baqarah: 2: 186)***

The question now is

To what extent is Allah close to our bodies?

Now, because Jesus son of Mary is a human like us, then in our bodies we also contain ***"...spirit from Him... (An Nisaa': 4:171)***

Where ***"...the spirit from Him... (An Nisaa' : 4: 171)*** is no different from Allah ***"...has breathed into it my spirit,... (Al Hijr: 15: 29)*** into the body Adam.
