## **ABSTRACT**

Previously I asked for forgiveness from Allah SWT because here I was trying to reveal the signs of the greatness of Allah SWT regarding how Allah spoke directly to the Prophet Musa based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There are several verses in the Al Quran that can be used as a basis for revealing the secret of how Allah spoke directly to the Prophet Moses, namely the following verses:

*"When he saw the fire, then he said to his family," Stay you (here), verily I see fire, hopefully I can bring some of it to you or I will get directions in the fire place (Thaahaa: 20:10)*

*"So when he came to the place of fire he was called," O Moses. (Thaahaa: 20:11) Behold, I am your God, so take off your two sandals; indeed you are in a holy place, Thuwa. (Thaahaa: 20:12) "And I have chosen you, so listen to what will be revealed (to you). (Thaahaa: 20:13) "Verily I am Allah, there is no God (the right) but Me, so worship Me and establish prayers to remember Me. (Thaahaa: 20:14)*

In an attempt to uncover the secret of how Allah spoke directly to the Prophet Musa, I used a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I am proposing a hypothesis on how Allah spoke directly to the Prophet Musa from the point of view of Deoxyribonucleic acid (DNA)?

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **THE FIRE IS CONTAINING OXYGEN ATOMES DESCRIBING GUIDE**

Let us uncover what is the secret behind the verse: *"... verily I saw fire, ... hopefully I will get directions in the place of fire (Thaahaa: 20:10)*

Now what is fire?

Fire arises because of the presence of oxygen atoms rubbing against flammable items.

Why did the Prophet Moses associate fire with a *"guide"*?

Because in that fire there are oxygen atoms containing quark quarks and giving rise to photons. Where the quark quark and the photon photon are waves of Allah's light layer.

This is the secret behind the verse: *"... I hope I will get directions in the fire place (Thaahaa: 20:10)* Namely the Prophet Moses will receive a revelation containing *"guide"* from Allah.

### **THE PROPHET MUSA SEES ALLAH THROUGH THE VIBRATION OF THE SOUND AND THE LIGHT OF ALLAH**

Then we break down the deeper verse: *"... to the place of fire he was called," O Moses. (Thaahaa: 20:11)*

Now here Allah through the vibrations of the sound frequency *"O Musa. (Thaahaa: 20: 11)* and the Prophet Musa knew and understood clearly that there was someone calling. *"... I am Allah, ... (Thaahaa: 20 : 14)*

So here Allah is a wave of the light layer of Allah that was heard and seen by the Prophet Musa.

### **ALLAH CAN BE HEARD, SEEN, AND FEELED THROUGH THE WAVES OF ALLAH'S LAYER AS THAT EXPERIENCED BY THE PROPHET MUSA**

So now the secret behind the verse is revealed: *"O Moses. (Thaahaa: 20: 11)* and *"... I am Allah, ... (Thaahaa: 20:14)*, which describes Allah through the vibrations of sound frequencies and waves.

Allah's layer of light can speak directly to ordinary people like us and like the Prophet Musa.

### **CONCLUSION**

Based on the description above we can conclude that there was a secret hidden behind the verse: *"... actually I saw fire, ... hopefully I will get a clue in the place of fire (Thaahaa: 20:10)*, namely fire.

Fire arises because of the presence of oxygen atoms rubbing against flammable items. Why did the Prophet Moses associate fire with a *"guide"*?

Because in that fire there are oxygen atoms containing quark quarks and giving rise to photons. Where the quark quark and the photon photon are waves of Allah's light layer. This is the secret behind the verse: *"... I hope I will get directions in the fire place (Thaahaa: 20:10)*

Namely the Prophet Moses will receive a revelation containing *"guide"* from Allah. Allah through the vibrations of the sound frequency *"O Musa. (Thaahaa: 20:11)* and the Prophet Musa knew and understood clearly that he was calling. *"... I am Allah, ... (Thaahaa: 20:14)*

So Allah is a wave of the light layer of Allah that was heard and seen by the Prophet Musa. Now revealed the secret behind the verse: *"O Moses. (Thaahaa: 20: 11)* and *"... I am Allah, ... (Thaahaa: 20:14)* which describes Allah through the vibrations of sound frequencies and layers of waves.

Allah's light can speak directly to ordinary people like us and like the Prophet Musa.
