ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about the light of Allah is the seat of Allah based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking tool about the light of Allah is Allah's chair, namely the verses:

“God, there is no god but He Who Lives eternally and continually takes care of; no sleep and no sleep. To Him belongs what is in the heavens and in the earth. No one can intercede with Allah without His permission? Allah knows what is before them and what is behind them, and they know nothing of Allah's knowledge except what He wills. Allah's seat covers the heavens and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Great. (Al Baqarah: 2:255)

"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24: 35)

“So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him.” (Shaad: 38: 72)

In an effort to open the veil of Allah's secret about the light of Allah is Allah's chair, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis because Allah's light shines on the heavens and the earth, then Allah's light is Allah's seat seen from the basic point of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE SPIRIT OF ALLAH ETERNALLY LIVING

Now, let's go back to focusing and focusing our minds to reveal the secret behind the verse: *"...I breathed into him my spirit...(Shaad: 38:72)* and the verse: *"...He Who Lives Eternally.. (Al Baqarah: 2:255)*

It turns out that what is contained in *"... my spirit...(Shaad : 38: 72)* is an oxygen atom, a hydrogen atom, a nitrogen atom and a carbon atom. Where the nucleus of each atom is a quark. Quarks are the beginning and the end. Or in other words, it is these quarks that live eternally.

Well, now it is revealed, indeed Allah *"...He Who Lives eternally...(Al Baqarah: 2:255)*

ALLAH WITH HIS SPIRIT IS NOT SLEEPY AND DOES NOT SLEEP

Well, then we unpack the secrets contained in the verse: *"Allah,...is not sleepy and does not sleep...(Al Baqarah: 2:255)* and the verse: *"Allah is the light of the skys and the earth...(An Nuur: 24 : 35)*

Now, it is more and more revealed now that Allah's light contains photons. Where this photon is eternal life.

So *"God the light of the heavens and the earth ... (An Nuur: 24: 35)* is eternal, where *"Allah of light ... (An Nuur: 24: 35)* continues to illuminate *"... the skys and the earth ..."*

Or in other words, Allah is not sleepy and does not sleep, because he constantly illuminates this universe.

ALLAH WITH HIS SPIRIT KNOWS WHAT IS AHEAD AND BEHIND PEOPLE

Next, we uncover the secret behind the verse: *"...Allah knows what is in front of them and behind them,...(Al Baqarah: 2:255)* and the verse: *"...I breathed into him my spirit. ..(Shaad : 38:72)*

Now, it's getting revealed, where in every human body, Allah has breathed *"...my spirit...(Shaad: 38:72)* That means, Allah knows *"...what is in front of them and behind them, ...(Al Baqarah: 2:255)*

ALLAH'S LIGHT IS ALLAH'S SEAT

Well, now it has been revealed, where *"Allah is light... (An Nuur: 24: 35)* which continuously illuminates *"...sky and earth..."* is *"...Allah's seat covers the skys and the earth... (Al Baqarah: 2:255)*

Whatever is in this universe is *"... His... (Al Baqarah: 2:255)*

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"...I breathed into*

him my spirit...(Shaad: 38:72) and the verse: "...He Who Lives Eternally.. (Al Baqarah: 2:255)

It turns out that what is contained in "*... my spirit...(Shaad : 38: 72)* is an oxygen atom, a hydrogen atom, a nitrogen atom and a carbon atom. Where the nucleus of each atom is a quark. Quarks are the beginning and the end. Or in other words, it is these quarks that live eternally.

So "*God the light of the heavens and the earth ... (An Nuur: 24: 35)* is eternal, where "*Allah of light ... (An Nuur: 24: 35)* continues to illuminate "*... the skys and the earth ...*"
