ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about how Allah gathers humans to face Allah based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an there is a verse that is the key to unlocking the secret of how Allah gathers people to face Allah, namely the following verses:

"actually will be collected at a certain time on a known day. (Al Waaqi'ah: 56: 50)

"There is no shout except one shout, then suddenly they are all gathered to Us. (Yaasiin: 36: 53)

"And every one of them will all be gathered back to Us. (Yaasiin: 36: 32)

"So when I have perfected the event, and have breathed into it My spirit (creation), then submit to it prostrating yourselves (Al Hijr: 15: 29) "

(That is) on the day (when) the earth is replaced with another earth and (as well as) the sky, and they all (in the field of Mahsyar) gather to face the presence of Allah, the One, the Most Mighty. (Ibrahim: 14: 48)

In an effort to unmask how God gathers humans to face God based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that God collects humans in the form of oxygen atoms, hydrogen atoms, nitrogen atoms, carbon atoms based on photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

WHERE PEOPLE COLLECT TO FACE ALLAH

Now we explore the secret behind the verse: *"... on the day (when) the earth is replaced with another earth and (so) the sky, and they all (in the Mahsyar field) gather to face the presence of Allah, the One and the Most Mighty. (Ibrahim: 14:48)*

The question now is

Where is it *"...the earth is replaced with another earth and (so) the heavens,...(Ibrahim: 14:48)?*

The answer is Another earth and another sky whose contents are *"...my (creation) spirit,.. (Al Hijr: 15: 29)*

Which means *"...my (creation) spirit,..(Al Hijr: 15: 29)* is an oxygen atom, a hydrogen atom, a nitrogen atom and a carbon atom.

So now it has been revealed that the gathering place for humans to face Allah is on another earth and another sky where there is a spirit of Allah in the form of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

The location of another earth and another sky is on our earth and sky today.

Why in the same place as the earth and sky today?

The answer is

Because after all living things, in which there are living organisms starting from one cell to humans like us, when all of them are dead, then what comes out of the bodies of the dead creatures are oxygen atoms, hydrogen atoms, nitrogen atoms and atoms carbon.

So our earth and sky at that time was full of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Or in other words, another earth and another sky is actually our earth and sky as it is today, but its contents are full of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Finally now it has been revealed that *"... the earth was replaced with another earth and (as well as) the sky, ... (Ibrahim: 14: 48)* is actually our earth and sky as it is today, but its contents are full of oxygen atoms, hydrogen, nitrogen and carbon atoms.

THE FORM OF HUMANS COLLECTED TO FACE ALLAH IS A COLLECTION OF OXYGEN ATOMS, HYDROGEN ATOMS, NITROGEN ATOMS AND A CARBON ATOM

Now, the secret behind the verse has been revealed: *"There is no shout except one shout, then*

suddenly they are all gathered to Us. (Yaasiin: 36: 53)

That is, all humans collected on other earths and other heavens are in the form of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... on the day (when) the earth is replaced with another earth and (so) the sky, and they all (in the Mahsyar field) gather to face the presence of Allah, the One and the Most Mighty. (Ibrahim: 14:48)*
