ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah's greatness regarding the secret of Allah, why in paradise there must be a river that flows based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an found several verses that are the key to unlocking the secret of why in paradise there must be a flowing river, namely the following verses:

"Verily Allah will admit those who believe and do righteous deeds into gardens beneath which rivers flow. Verily Allah does what He wills (Al Hajj: 22:14)

"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they are adorned with gold and pearl bracelets, and their clothing is silk. (Al Hajj :22:23)

"Glory be to (Allah) who, if He willed, He would have made for you something better than this, (ie) gardens under which rivers flow, and He made (also) for you palaces. (Al Furqaan: 25:10)

"It is they (those who) for them Paradise 'Adn, rivers flow beneath; in that paradise they are decorated with gold bracelets and they wear green clothes of fine silk and thick silk, while they sit while leaning on the couch. - a beautiful couch. That is the best reward, and a beautiful resting place; (Al Kahf: 18: 31)

"And We remove all kinds of hatred that is in their chests; rivers flow under them and they say: "Praise be to Allah who has shown us to this (heaven). And we will never be guided if Allah does not guide us. Verily, the messengers of our Lord have come, bringing the truth." And it was called to them: "This is Paradise which has been bequeathed to you, because of what you used to do." (Al-A'raaf: 7:43)

In an effort to open the veil of Allah's secret why in heaven there must be a river that multiplies based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that in heaven there must be water that comes from oxygen atoms and hydrogen atoms when viewed from the point of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

To find out quarks, let's look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

IN PARADISE NEED WATER WITHOUT WATER PARADISE IS ARID AND DIE

Now let us together continue to uncover the secret behind the verse: *"Verily Allah will admit those who believe and do righteous deeds into paradises beneath which rivers flow... (Al Hajj: 22:14)*

We also explore the secret behind the verse: *"Glory be to Allah, who if He willed, He would have made for you something better than that, (i.e.) paradises where rivers flow beneath,... (Al Furqaan :25:10)*

And we also uncover the secret behind the verse: *"... rivers flow under them... (Al A'raaf: 7: 43)*

Well apparently, the secret behind the verses above was revealed, namely *"...the rivers flow..."*

This means that in heaven there needs to be water (H₂O) or in other words, in heaven it is necessary to have oxygen atoms (O) and hydrogen atoms (H).

So without oxygen atoms and hydrogen atoms there is no heaven.

WHERE THERE ARE OXYGEN ATOMS AND HYDROGEN ATOMS TO LIFE PARADISE

Well, it turns out that there are oxygen atoms and hydrogen atoms on our earth today.

It is only on our earth today that there are oxygen atoms and hydrogen atoms that make in heaven *"...flowing rivers beneath it,...(Al Furqaan: 25:10)*

BECAUSE OXYGEN ATOMS AND HYDROGEN ATOMS ARE IN OUR EARTH, THEN PARADISE IS ON OUR EARTH TOO

Now the secret behind the verse has been revealed: *"Indeed, Allah will admit those who believe and do righteous deeds to gardens beneath which rivers flow. In that paradise they will be adorned with gold and pearl rings, and their clothes are silk.(Al Hajj:22:23)*

Namely, in the presence of oxygen atoms and hydrogen atoms, then *"... Allah will admit those who believe and do righteous deeds to the heavens beneath which rivers flow... (Al Hajj: 22: 23)*

Therefore without oxygen atoms and hydrogen atoms there would be no paradise. Because of the existence of oxygen atoms and hydrogen atoms on our earth, paradise is also on our earth today.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"Verily Allah will admit those who believe and do righteous deeds into paradises beneath which rivers flow... (Al Hajj: 22:14)*

We also explore the secret behind the verse: *"Glory be to Allah, who if He willed, He would have made for you something better than that, (i.e.) paradises where rivers flow beneath,... (Al Furqaan :25:10)*

And we also uncover the secret behind the verse: *"... rivers flow under them... (Al A'raaf: 7: 43)*

Well apparently, the secret behind the verses above was revealed, namely *"...the rivers flow..."*

This means that in heaven there needs to be water (H₂O) or in other words, in heaven it is necessary to have oxygen atoms (O) and hydrogen atoms (H).

So without oxygen atoms and hydrogen atoms there is no heaven.

Well, it turns out that there are oxygen atoms and hydrogen atoms on our earth today.

It is only on our earth today that there are oxygen atoms and hydrogen atoms that make in heaven *"...flowing rivers beneath it,...(Al Furqaan: 25:10)*

Now the secret behind the verse has been revealed: *"Indeed, Allah will admit those who believe and do righteous deeds to gardens beneath which rivers flow. In that paradise they will be adorned with gold and pearl rings, and their clothes are silk.(Al Hajj:22:23)*

Namely, in the presence of oxygen atoms and hydrogen atoms, then *"... Allah will admit those who believe and do righteous deeds to the heavens beneath which rivers flow... (Al Hajj: 22: 23)*

Therefore without oxygen atoms and hydrogen atoms there would be no paradise. Because of the existence of oxygen atoms and hydrogen atoms on our earth, paradise is also on our earth today.
