## **ABSTRACT**

Before I write Allah's secret problem about why Allah rewards humans with hell from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking tool about why Allah rewards humans with hell, namely the verses:

*Allah says: "Enter all of you into hell with the jinn and humans who went before you... (Al A'raaf: 7: 38)*

*"Do you know what (hell) Saqar is? (Al Muddatstsir: 74: 27)*

*"Saqar does not leave and does not allow (Al Muddatstsir: 74: 28)*

*"(Remember) the day they will be dragged to hell on their faces. (Told them): "Feel the touch of hellfire!" (Al Qamar: 54:48)*

*"When the sun is rolled up, (At Takwiir: 81: 1)*

In an effort to unmask Allah's secret about why Allah rewards humans with hell, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose the hypothesis that Allah will reward humans with hell because in hell there are hydrogen atoms that are the same as hydrogen atoms in the human body from a basic point of view of Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## HELL = HYDROGEN ATOM

Let us now think again and focus our minds to reveal the secret behind the verse: *"... "Feel the touch of hell fire!" (Al Qamar: 54:48)*

Well, here it was revealed that *"... hellfire!" (Al Qamar: 54: 48)* is a fire that occurs due to the collision of fellow hydrogen atoms.

Why the hydrogen atom?

The answer is

There is a hidden secret behind the verse: *"When the sun is rolled up, (At Takwiir: 81: 1)*

That is, the sun rolled up is a dead sun, because there are no more hydrogen atoms that can be collided with each other with the help of nuclear fusion power to produce helium atoms and gamma-ray photons.

So, Allah created hell as a recompense for humans and jinn who do not believe in Allah with hydrogen atoms colliding with each other with the help of nuclear fusion.

Now the question arises

Where did these hydrogen atoms come from?

The answer is from the human body and the jinn *"... in hell with the jinn and humans ... (Al A'raaf: 7: 38)* because in the human body and the jinn contain hydrogen atoms.

## IN HELL DO NOT LEAVE AND DO NOT LET

Now, in hell, humans and jinn whose form is built from oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms *"...do not leave and do not let (Al uddatstsir: 74: 28)*

It means

Humans who are in hell *"... don't leave..."* because humans who have died emit oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms out of their bodies.

When oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are in a hell containing hydrogen atoms, then the hydrogen atoms coming from the dead human body collide with each other with the help of nuclear fusion, turning into helium atoms.

So here it means that the hydrogen atoms that come from the human body that dies are not dead, but because they collide with each other and turn into helium atoms.

Or in other words, hydrogen atoms colliding with each other and turning into helium atoms are *"...not letting (Al Muddatstsir: 74: 28)* hydrogen atoms disappear.

## ALLAH CREATED HELL AS A RESPONSIBILITY BECAUSE OF THE HYDROGEN ATOMS OF THE HUMAN BODY AND THE JINN AS THE FIRE TO BURN IT

Now, the secret hidden behind the verse is revealed: *"Allah says: "Enter all of you into hell with the*

*jinn and humans who were before you... (Al A'raaf: 7: 38)*

Namely Allah created hell as a reward for humans and jinn who do not believe in Allah because the hydrogen atom from the human body and the jinn is used as a burning fire.

Or in other words, the human spirit and the spirit of the jinn which contain hydrogen atoms are made into hellfire.

## CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"...Feel the touch of hell fire!" (Al Qamar: 54:48)*

Well, here it was revealed that *"... hellfire!" (Al Qamar: 54: 48)* is a fire that occurs due to the collision of fellow hydrogen atoms.

Why the hydrogen atom?

The answer is

There is a hidden secret behind the verse: *"When the sun is rolled up, (At Takwiir: 81: 1)*

That is, the sun rolled up is a dead sun, because there are no more hydrogen atoms that can be collided with each other with the help of nuclear fusion power to produce helium atoms and gamma-ray photons.

So, Allah created hell as a recompense for humans and jinn who do not believe in Allah with hydrogen atoms colliding with each other with the help of nuclear fusion.

Now the question arises

Where did these hydrogen atoms come from?

The answer is from the human body and the jinn **"... in hell with the jinn and humans ... (Al A'raaf: 7: 38)** because in the human body and the jinn contain hydrogen atoms.

Now, in hell, humans and jinn whose form is built from oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms *"...do not leave and do not let (Al uddatstsir: 74: 28)*

It means

Humans who are in hell *"... don't leave..."* because humans who have died emit oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms out of their bodies.

When oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are in a hell containing hydrogen atoms, then the hydrogen atoms coming from the dead human body collide with each other with the help of nuclear fusion, turning into helium atoms.

So here it means that the hydrogen atoms that come from the human body that dies are not dead, but because they collide with each other and turn into helium atoms.

Or in other words, hydrogen atoms colliding with each other and turning into helium atoms are

*"...not letting (Al Muddatstsir: 74: 28) hydrogen atoms disappear.*

Now, the secret hidden behind the verse is revealed: *"Allah says: "Enter all of you into hell with the jinn and humans who were before you... (Al A'raaf: 7: 38)*

Namely Allah created hell as a reward for humans and jinn who do not believe in Allah because the hydrogen atom from the human body and the jinn is used as a burning fire.

Or in other words, the human spirit and the spirit of the jinn which contain hydrogen atoms are made into hellfire.
