ABSTRACT

Before I wrote about Allah's secret problem about Allah is unseen but humans can feel and learn it from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking tool about the unseen Allah but humans can feel and learn them, namely the verses:

"Allah is the light of the skys and the earth...Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24: 35)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)

"Indeed, you only warn those who follow the warning and who fear the Most Gracious Allah even though he does not see it. So give them good tidings with forgiveness and a noble reward. (Yaasiin: 36:11)

In an effort to open the veil of Allah's secret about the unseen Allah but humans can feel and learn it, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah is unseen because the human eye is limited, but humans can feel and study it from the basic point of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

HUMAN EYES LIMITED

Now, we are together again to try to uncover the secrets that are hidden in the verse: *"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

Well, it was revealed that, the human eye is limited, as described *"... in front of them a wall and behind them a wall, ... (Yaasiin: 36: 9)*

Where the human eye because it is limited, looking ahead and looking back, will not reach Allah. So that Allah is invisible to our eyes or unseen *"...so that they cannot see. (Yaasiin: 36: 9)*

Then if we unravel the secret behind the verse: *"... people who... fear the Most Gracious Allah even though he doesn't see it... (Yaasiin: 36:11)*

Obviously, it appears here that Allah is unseen *".. he does not see it ... (Yaasiin: 36: 11)*

Why is the human eye limited?

The answer is

Because our eyes can only see light in the area of the electromagnetic spectrum between 430 and 740 nanometers.

This means that light in the electromagnetic spectrum area below 430 nanometers and light in the electromagnetic spectrum area above 740 nanometers is called unseen.

For example, the sunlight we enjoy every day is in the electromagnetic spectrum between 430 and 740 nanometers. So the human eye can see sunlight. Therefore sunlight is not unseen.

If there is light in the electromagnetic spectrum area below 430 nanometers or light in the electromagnetic spectrum area above 740 nanometers, then the human eye cannot see it.

ALLAH IS GHAIB BECAUSE HUMAN EYES CAN'T SEE ALLAH

Now, let's dismantle the secret behind the verse: *"Allah is the light of the skys and the earth...Light upon light (in layers), .. (An Nuur: 24: 35)*

It is now revealed that light in the region of the electromagnetic spectrum above 740 nanometers cannot be seen by the human eye.

For example, radio waves are located in the electromagnetic spectrum area of 1 centimeter to 1 kilometer.

Microwaves (microwaves) are located in the electromagnetic spectrum region between 100 micrometers and 1 centimeter.

Infrared rays are located in the electromagnetic spectrum region 740 nanometers to 100 micrometers.

Likewise, light in the area of the electromagnetic spectrum below 430 nanometers cannot be seen by the human eye.

For example, ultraviolet light is located in the electromagnetic spectrum region of 10 to 100 nanometers.

X-rays are located in the electromagnetic spectrum region of 0.05 to 10 nanometers.

Gamma rays are located in the electromagnetic spectrum region that is formed around a wavelength between 0.00001 to 0.05 nanometers.

ALLAH CAN BE SEEN IF WE LEARN THE SPIRIT OF ALLAH

Now, we continue to explore the secret hidden behind the verse: *"... when I have perfected the event and I breathed into it My spirit;... (Shaad: 38: 72)*

Well, *"... my spirit;...(Shaad : 38: 72)* which is deoxyribonucleic acid (DNA) in which there is *"...His spirit...(As Sajdah : 32: 9)* which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So now it is revealed that the unseen Allah has been transformed into be seen and we can study, understand and explore it through deoxyribonucleic acid (DNA) which contains *"...His spirit...(As Sajdah: 32: 9)* which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden in the verse: *"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

Well, it was revealed that, the human eye is limited, as described *"... in front of them a wall and behind them a wall, ... (Yaasiin: 36: 9)*

Where the human eye because it is limited, looking ahead and looking back, will not reach Allah. So that Allah is invisible to our eyes or unseen *"...so that they cannot see. (Yaasiin: 36: 9)*

Then if we unravel the secret behind the verse: *"... people who... fear the Most Gracious Allah even though he doesn't see it... (Yaasiin: 36:11)*

Obviously, it appears here that Allah is unseen *".. he does not see it ... (Yaasiin: 36: 11)*

Why is the human eye limited?

The answer is

Because our eyes can only see light in the area of the electromagnetic spectrum between 430 and 740 nanometers.

This means that light in the electromagnetic spectrum area below 430 nanometers and light in the electromagnetic spectrum area above 740 nanometers is called unseen.

For example, the sunlight we enjoy every day is in the electromagnetic spectrum between 430 and 740 nanometers. So the human eye can see sunlight. Therefore sunlight is not unseen.

If there is light in the electromagnetic spectrum area below 430 nanometers or light in the electromagnetic spectrum area above 740 nanometers, then the human eye cannot see it.

Now, let's dismantle the secret behind the verse: ***"Allah is the light of the skys and the earth...Light upon light (in layers), .. (An Nuur: 24: 35)***

It is now revealed that light in the region of the electromagnetic spectrum above 740 nanometers cannot be seen by the human eye.

For example, radio waves are located in the electromagnetic spectrum area of 1 centimeter to 1 kilometer.

Microwaves (microwaves) are located in the electromagnetic spectrum region between 100 micrometers and 1 centimeter.

Infrared rays are located in the electromagnetic spectrum region 740 nanometers to 100 micrometers.

Likewise, light in the area of the electromagnetic spectrum below 430 nanometers cannot be seen by the human eye.

For example, ultraviolet light is located in the electromagnetic spectrum region of 10 to 100 nanometers.

X-rays are located in the electromagnetic spectrum region of 0.05 to 10 nanometers.

Gamma rays are located in the electromagnetic spectrum region that is formed around a wavelength between 0.00001 to 0.05 nanometers.

Now, we continue to explore the secret hidden behind the verse: ***"... when I have perfected the event and I breathed into it My spirit;... (Shaad: 38: 72)***

Well, ***"... my spirit;...(Shaad : 38: 72)*** which is deoxyribonucleic acid (DNA) in which there is ***"...His spirit...(As Sajdah : 32: 9)*** which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So now it is revealed that the unseen Allah has been transformed into unseen and we can study, understand and explore it through deoxyribonucleic acid (DNA) which contains ***"...His spirit...(As Sajdah: 32: 9)*** which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.
